Subject: Downsizing The Federal Government And How Progressives Rewrote the Constitution

To Freedom, May It Rise Again Above All Those Who Take From It:

Here is some great reading that all rural property owners, some urban property owners, and those people who understand how freedom works can relate too. I have turned off all TV, all radio except for Savage and select my news sources carefully and read extensively. America is dumbed down because our mainstream news sources, educational system, government, political parties, entertainment and all those in America who support any of these taking establishments are in denial of the consequences of their actions.

American brilliance is in its freedom. This has been snuffed out. Brilliant people, are not found in the above sources. Our brilliance is dying because the government has bought us out. We The People, must relearn to walk and talk the basics to take back our freedoms, one person at a time.

Freedom grows with individual independence. Tyranny takes by dependency, ignorance and force. Knowledge is the weapon of choice. Spread the word that

our government at all levels is corrupt, political parties are corrupt, the educational system including most of the teachers have turned against freedom. Freedom is always sacrificed over power and money until the majority understand.

Our most basic freedoms are lost in history. They have become more ornamental and cosmetic. The constitution is ignored. The courts are biased to more big government, not more freedom and more truth. The legislature no longer represents the people, it lies, cheats and steals our sacred freedoms away daily. The executive offices at all levels can only take our freedoms. All three branches and are condemned to serve taking groups who choose money and power over freedom. Those who sue the Boy Scouts and symbols of God grow rich and strong.

When private property is taken for ANY reason, you know freedom is gone. This is a wake up call. Many of us know it is much worse. The majority takes whatever they wish with their progressive ideology and the minority are left with only their principles. If you think I over state the problem, I invite you to read and talk to property owners who have been taken by government.

The minority are raped of their land, homes, water, assets, income, education, history, borders, security, one common language, honest elections. The majority does not know any different. The prison systems are full, 30% with illegal immigrants, the public infrastructure is collapsing, home and land prices are unaffordable, home owners can no longer improve their homes or land, money is worthless, highways are at grid lock. Fuel prices are held artificially high because of radical environmental extortion.

Cities, counties and state government are destroying freedom faster than any free society can regenerate itself. I reiterate what Ron Ewart has been saying for decades, "Why is it that others can't see what we see?" Why, is it only those who have had their constitutional freedoms stolen can see? Second Amendment gun owners know, Fifth Amendment property owners know, many others know and more are learning.

The day will come, when the era of big taking government will be reversed and seen for what it is. This 100 year tidal wave of socialism and environmental hysteria will dwarf the Inquisition and the Salem Witch trials in history.

Welfare for Politicians? Taxpayer Financing of Campaigns

Edited by John Samples

Has public funding of political campaigns protected the integrity of the process, as intended,

or simply become a handout for politicians who are unable or unwilling to raise campaign funds voluntarily? This collection of essays examines the issue from a wide range of insightful perspectives.

"A tantalizing and frequently brilliant book."

— **WILLIAM H. PETERSON,**
Washington Times

Regulation

Imagine how much easier your life and livelihood would be if you received immediately usable insights about regulatory issues from leading economists, policy analysts, and legal experts every year. That's what *Regulation* offers. Since 1977 it has covered every market, from agriculture to health and transportation, every government intervention, from interstate commerce regulation to labor law and price controls.

The Marketplace of Democracy: Electoral Competition and American Politics

Edited by John Samples and Michael P. McDonald

In this book, copublished by

the Cato Institute and the Brookings Institution, top-tier political scholars address the startling lack of competition in our democratic system. More than a dozen essays explore the historical development, legal background, and political

Downsizing the Federal Government

By Chris Edwards

Budget expert Chris Edwards provides an effective blueprint to the government mess. He

precisely identifies more than 100 federal programs to terminate, transfer to states, or privatize in order to balance the budget and details a balanced reform package that includes cuts in entitlements, domestic programs, and excess defense spending.

UNSTOPPABLE GLOBAL WARMING

Every 1,500 Years

by S. Fred Singer and Dennis T. Avery

April Winner!

Using extensive historic data and the natural physical records found in ice cores, seabed sediment, cave stalagmites, and tree rings, Singer and Avery argue that a 1,500 year solar-driven cycle that has always controlled the earth's climate and is the driving force in the current warming trend.

The authors claim that reducing fossil fuel use will not affect the rising temperatures. They recommend focusing on adaptation, not fruitless attempts at prevention. They also offer convincing evidence that civilization's most successful eras have coincided with the cycle's warmest peaks, suggesting that humanity can not only survive global climate change, but thrive during it.

"Singer and Avery present in popular language supported by in-depth scientific evidence the compelling concept that global temperatures have been rising mostly or entirely because of a natural cycle. *Unstoppable Global Warming* explains why we're warming, why it's not very dangerous, and why we can't stop it anyway." —*Science Daily*
