**Subject:** Say NO to Waxman Markey Cap & Trading - Political Ignorance at its Best

[http://www.geocraft.com/WVFossils/greenhouse\\_data.html](http://www.geocraft.com/WVFossils/greenhouse_data.html)

"This is the statistically correct way to represent relative human contributions to the greenhouse effect.

From **Table 4a**, both natural and man-made greenhouse contributions are illustrated in this chart, in gray and green, respectively. For clarity only the man-made (anthropogenic) contributions are labeled on the chart.

📍 **Water vapor**, responsible for **95%** of Earth's greenhouse effect, is **99.999% natural** (some argue, 100%). Even if we wanted to we can do nothing to change this.

📍 **Anthropogenic** (man-made) **CO2 contributions** cause only about **0.117%** of Earth's **greenhouse effect**, (factoring in **water vapor**). This is insignificant!

📍 Adding up all **anthropogenic** greenhouse sources, the **total human contribution to the greenhouse effect** is around **0.28%** (factoring in **water vapor**)."

---

Congressman Reichert, I just called your Mercer Island office and left a message, your aide had little time to listen why this Waxman Markey bill is fraudulent. All he wanted was a yes or no not unlike you wanting to say no, without reading the bill? How much longer must we beat this long dead horse, "man caused" global warming ?

- **There is no "man caused global warming", man's share is insignificant, i.e. 117% or .00117**
  - See 5 years of proof here from independent sources not lying to keep their green grant political careers
    - <http://www.freedomforallseasons.org/FreedomFromManCausedGlot>
- **There is no "Alternative energy" to fossil and nuclear energy - it is not cost effective & will never be**
  - See 5 years of proof here from independent sources not lying to keep their green political jobs
    - <http://www.freedomforallseasons.org/FreedomFromAlternativeEner>
- **Making policy on green myths is perjury and fraud to your oath of office**
  - You have no scientific credentials to make these decisions
  - Nor do you apparently have the ability to listen to anyone who does
  - Please don't feel alone, the rest of your fellow CONgress types don't either
  - Except for Texas Representative Ron Paul

This is more political nonsense from green government and non government

types who have more agenda than credentials. CONgress has conned the sovereignty and wealth out of America long ago and left us/US bankrupted financially, monetarily, judicially and morally based on agendas.

The greedy puppeteers from the east coast to the global banking interests are pulling the strings of blind political puppets who can't read the bills let alone understand them. Thus the state of the once nation. Even if they could read, listen and understood the bills, the political parties wouldn't let them make the right decision, it might cost them their job. A "good" job is hard to find now-a-days, one must do what one must do.

It would be interesting to study the 535 political puppets sent to D.C. Inc as well as some 7000 individual state legislative and congressional Senators and Representatives to see what credentials they have. This is another reason we do not have a "representative" government for those who still think we do. These some 7535 (less Ron Paul) are appointed by the political parties who are appointed by the multinational and municipal corporations who are appointed by the globalists groups, e.g. Bilderbergers, CFR and Trilaterals, where membership is appointed by the Central Bankers who are in turn given direction by some 300 super wealthy families in the world.

Campaigning, elections, "representation", "judication", "administration", ad government nausea, are all politically erotic dances designed for those who need political "turnons" to make them feel good. While in fact, they have no control of the dancers at all. The dancers are all hired by the shadow government. The stage is set, the acts are written, all performers play their given roles. You only buy a ticket to see the show.

"But still it is much more comforting for most of us to believe that our weather and our alternative energy, monetary system, lending system, "judicial systems" are controlled by the central government and the illusion goes on. It is further assuring that each of the two political parties run the show and give us the choices we all deserve."

Keep investing your life into Wall Street and Main Street and they will take care of all your needs as long as you give them what their police state demands. The

bad news is they need your sovereignty, liberty, free choice and every unalienable right you have and it still won't be enough.

American politics and its bankrupt government is built on the greater fool principal.

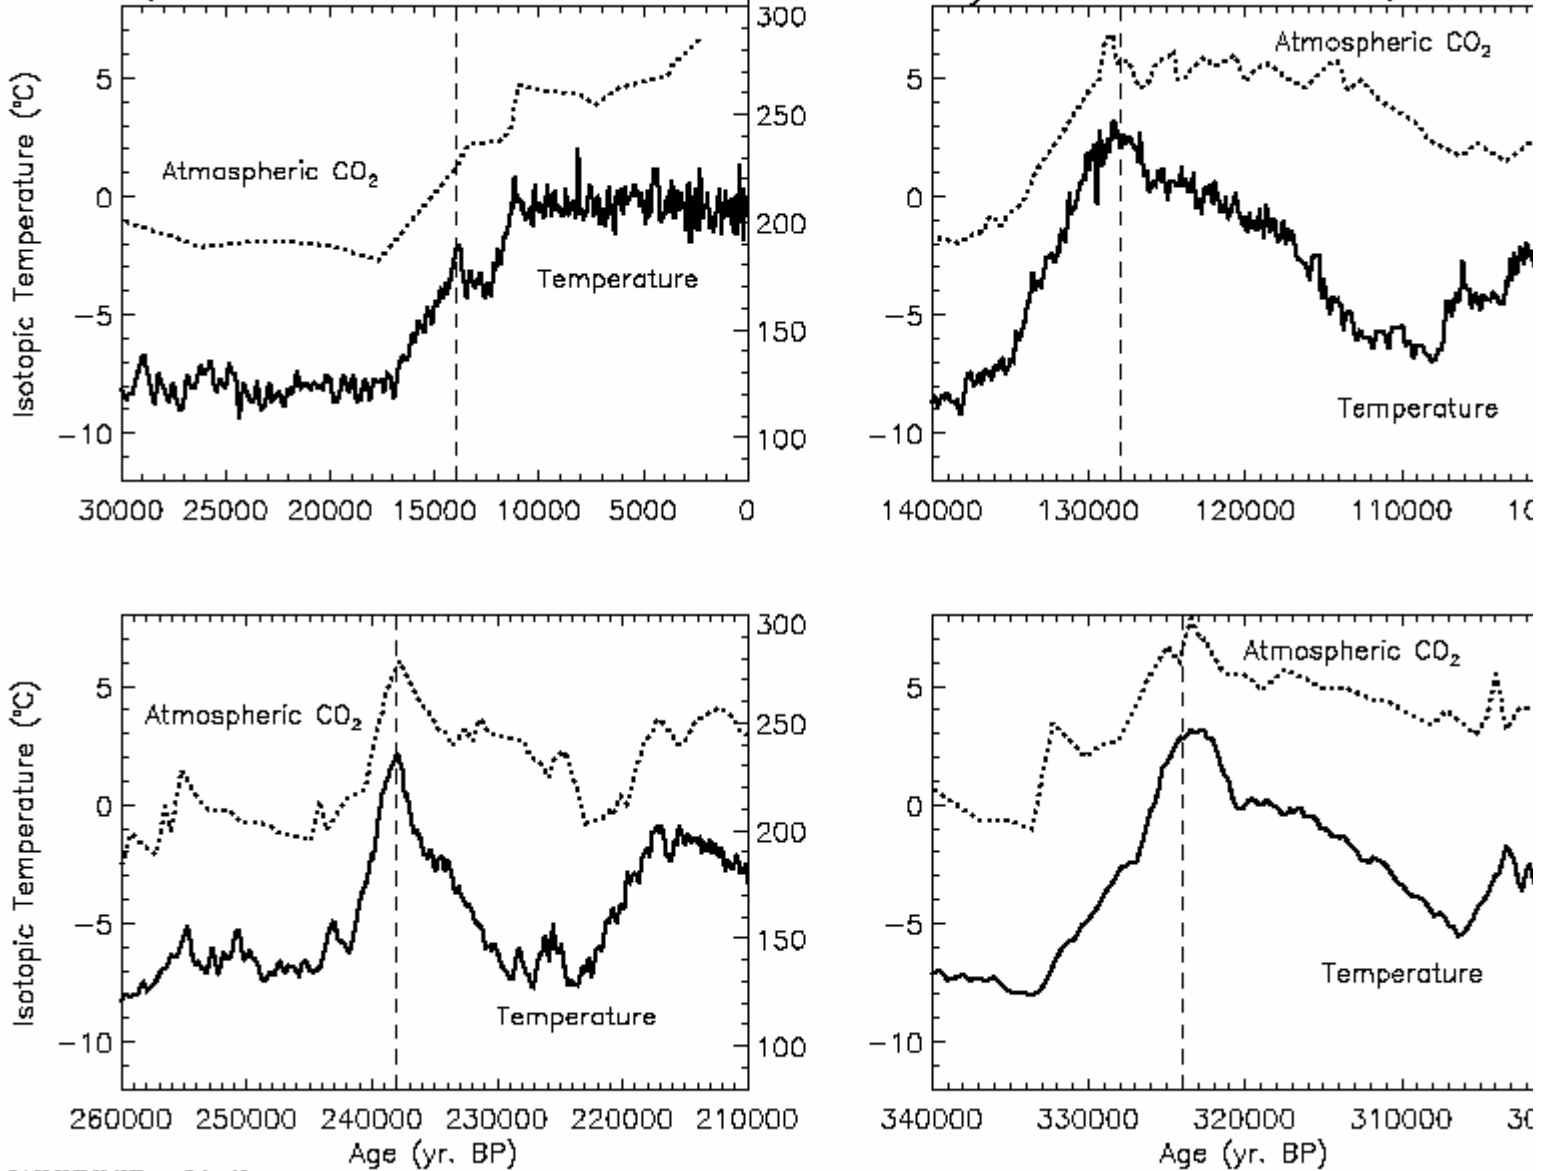

Trade on Trade On Oh Ship of State  
Oh Ship of Fools

Subject: cap & TradeWaxman-Markey BILLS

If you have time please call Congressman Dave Reichert today and urge him to vote no on CAP and Trade

I heard from a very well respected member of Congress that Dave is going to vote for the bill.  
Mercer Island office= 206-275-3438

DC office- 202-225-7761

**Subject:** Waxman-Markey Bills

**Importance:** High

Dave,

I heard from a respected member of Congress that you are going to vote for the job killer Waxman-Markey Bill.

I urge you to reconsider your position. If you vote for this bill you are voting for the largest tax increase in US history and the largest job killer bill.

Dave, I urge you to:

(1) read the bill first. Even Chair Waxman has admitted he hasn't read the bill and he really doesn't know what is in the bill.

The Heritage analysis( below) indicates that by 2035:

- gas prices will rise by 58%
- Natural gas prices will rise by 55%
- home heating oil will rise by 56%
- electricity prices will rise by 90%

(2) this bill is not based on sound science.

(3) this bill is a job killer in your district. From a report by the State Department of Ecology we know the following industries and WORKERS in King County will be negatively impacted :  
Aerojet Redmond

Alcoa  
Alliance Packaging  
Ash Grove  
Boeing  
Box maker  
Crane Electronics  
Esterline Korry  
Exotic Metals Forming  
Flow International  
Genie Industries  
Glacier Northwest  
Goodrich Aerospace  
Honeywell aerospace  
Jorgensen Steel  
Kimberly Clark  
Leviton  
National Frozen Foods Corp  
National Semi Conductor Corp  
Northwestern Industry Inc  
Nucor Steel Seattle  
PACCAR  
Panasonic Avionics  
Puget Sound Energy  
Seattle Steam  
Skills Inc  
Smith Aerospace  
Spectrum Glass  
Stoneway Concrete  
Tensolite Co  
TrueSoups  
United States Gypsum Co  
UW-Natural gas power plant  
Weyerhaeuser

I would be glad to send you a list of job killers in other Counties if you do not have the information.

If you have any questions, please call.  
Bob

**Subject:** Morning Bell: Waxman-Markey Bill Is An Energy Tax That Doesn't Work

**Morning Bell**  
 FRIDAY, JUNE 26, 2009

## [Waxman-Markey Bill Is An Energy Tax That Doesn't Work](#)

Later today, the House of Representatives is slated to vote on the most convoluted attempt at economic central-planning this nation has ever attempted: cap and trade. The 1,200-plus page Waxman-Markey climate change legislation is nothing more than an energy tax in disguise that by 2035 will raise:

- Gasoline prices by 58 percent
- Natural gas prices by 55 percent

### Recent Entries

- ☐ [New Heritage Video: Cap & Tax Won't Save the Earth](#)
- ☐ [No More Competition: Demerits for Valedictorians](#)

- Home heating oil by 56 percent
- Worst of all, electricity prices by 90 percent

Although proponents of the bill are pointing to [grossly underestimated and incorrect costs](#), the reality is when [all the tax impacts have been added up](#), the average per-family-of-four costs rise by \$2,979 per year. In the year 2035 alone, the cost is \$4,609. And the costs per family for the whole energy tax aggregated from 2012 to 2035 are \$71,493.

But on second thought, cap and trade is much more than that.

**It Kills Jobs:** Over the 2012-2035 timeline, job losses average over 1.1 million. By 2035, a projected 2.5 million jobs are lost below the baseline (without a cap and trade bill). Particularly hit hard are sectors of the economy that are very energy-intensive: Manufacturers, farmers, construction, machinery, electrical equipment and appliances, transportation, textiles, paper products, chemicals, plastics and rubbers, and retail trade would face staggering employment losses as a result of Waxman-Markey. It's worth noting the job losses come after accounting for the green jobs policymakers are so adamant about creating. But don't worry because the architects of the bill built in unemployment insurance; too bad it will [only help 1.5%](#) of those losing their jobs from the bill.

**It Destroys Our Economy:** Just about everything we do and produce uses energy. As energy prices increase, those costs will be passed onto the consumer and reflected in the higher

prices we pay for products. Higher energy prices will cause reduced income, less production and an economy that falls way short of its potential. The average Gross Domestic Product (GDP) lost is \$393 billion, hitting a high of \$662 billion in 2035. From 2012-2035, the accumulated GDP lost is \$9.4 trillion. The negative economic impacts accumulate, and the national debt is no exception. The increase in family-of-four debt, solely because of Waxman-Markey, hits an almost unbelievable \$114,915 by 2035.

**It Provides Red Meat for Lobbyists:** Businesses, knowing very well this would impose a severe cost on their bottom line, sent their lobbyists to Washington to protect them. [And it worked.](#) Most of the allowances (the right to emit carbon dioxide) have been promised to industry, meaning less money will be rebated back to the consumer. Free allowances do not lower the costs of Waxman-Markey; they just shift them around. In other words, every day Americans are going to be footing the bill. Although the government awarded handouts to businesses, the carbon dioxide reduction targets are still there, and the way they will be met is by raising the price of energy and thereby inflicting more economic pain. Prices have to go up enough to force people to use less energy, and so if anyone is bought off with free allowances, the costs for everyone else are that much higher.

There's one thing the Waxman-Markey cap and trade bill doesn't do: **Work.** All of the above-mentioned costs accrue in the first 25 years of a 90-year program that, as calculated by

climatologists, will lower temperatures by [only hundredths of a degree](#) Celsius in 2050 and no more than two-tenths of a degree Celsius at the end of the century. In the name of saving the planet for future generations, Waxman-Markey does not sound like a great deal: Millions of lost jobs, trillions of lost income, 50-90 percent higher energy prices, and stunning increases in the national debt, all for undetectable changes in world temperature. Who's buying that?

## QUICK HITS

Yesterday, the State Department announced it will resume [full diplomatic relations with Venezuela](#). On Wednesday, the U.S. sent an Ambassador to Syria for the first time since 2005.

Yesterday, nearly 100,000 North Koreans attended a mass rally against the U.S. as the communist nation vowed to build its nuclear capacity and warned of a [“fire shower of nuclear retaliation.”](#)

Russian Foreign Minister Sergei Lavrov signaled that they would not join other nations at the G8 Summit in condemning Iran, calling the protests and violence an [“exercise in democracy.”](#)

President Obama met with a bipartisan group of lawmakers on Thursday on [immigration reform](#), cautioning that nothing should be expected this year.

ABC News' Wednesday night special 'Questions for the President' [struggled for viewers](#), attracting the lowest number of viewers in its timeslot.
