## ANALYSIS

### THE POLITICS OF GLOBAL WARMING

In summary, our position on global warming is that it is a real phenomenon but it is cyclical, has occurred many time before in Earth's history, is caused primarily by cycles in solar activity, is NOT caused by industrial activity, is NOT dangerous (in fact is beneficial), and is being used as a scare tactic to frighten us into accepting greater government control over our activities and our lives. This page is devoted to a hefty sampling of the reasons for this view.

**Can you pass the global-warming test?**
