

FREE PUBLIC MEETING

Federal and Tribal Takeover of Private Land & Water Rights?

S.2012: The North American Energy Security and Infrastructure Act

This massive 792 page Senate Energy Committee bill is sponsored by Rep. Lisa Murkowski (R-AR) and co-sponsored by Rep. Mike Simpson (R-ID) and Rep. Cathy McMorris Rogers (R-WA). This bill has now been passed by the U.S. Senate and House of Representatives with a yea vote by most western Senators and Representatives. According to Congress.Gov it is now at the "Resolving Differences" stage. Once that step is completed it will go to the president for signature.

Just like Obamacare, we fear it is yet another 'we'll read it after it becomes law' transaction. Virtually no one understands the likely devastating impacts it will have on our rural land, property and water rights throughout the USA, or on families and communities whose lives will be upended.

This bill began behind closed doors with no opportunity for meaningful public examination or comment, even by those who will be most affected. The **tribal government forest management provisions** could diminish private property owners' constitutional rights. Western States Constitutional Rights, LLC says that this may, indeed, be unconstitutional.

WHAT WE MUST DO ABOUT IT!
