Senate Bill S. 2012 (Murkowski, AK) has secretly swallowed up S. 3085 (Roberts,KS) - a Forestry Management Bill that transfers management of any national forest within 100 miles of a tribal reservation, or to any tribe with ancestral or cultural ties to a national forest. This will give tribal governments: 1) control of all water (snowpack mountain runoff); and 2) let tribal governments determine appropriate uses of the national forests regarding hunting, fishing, trail-hiking, recreating by non-tribal citizens.

When strong opposition emerged opposing numerous forestry management bills in the Senate and House that were transferring forestry management to tribal governments, Senators and Congressmen played "hide the ball" quickly last week by tucking this egregious Tribal Forestry Management provision into an Energy Bill that is close to a vote - perhaps this week or next.

Call your Senators and Congressmen and raise holy hell. This could easily transfer national forestry management to tribes for every national forest in the Western States.

## Are Laws Proposed in Congress Intended to Protect Native Americans ...at Everyone Else's Expense?

A number of likely well intended, but poorly r

asoned and written bills dealing with Indigenous People, U.S. Forest Management, Reservation Water Rights, and Tribal Governments have been funneled through the U.S. Congress and Senate over the past year and are neatly tucked into the massive Bipartisan Energy Bill (S.2012) that has broad support from both houses of Congress. What is the connection between Indigenous People and U. S. Energy Policy? Was this done to hide the true intent of these separate pieces of legislation from the American public to speed passage of some very unconstitutional legislation, or are our elected representatives just completel y out

of touch with their responsibility to serve the people and defend the U.S. Constitution against all enemies foreign and domestic? Are Tribal Governments sovereign nations as many assume, or are we handing State Powers and responsibilities over to an out of control Federal Leviathan that is intent on honoring U.N. Treaties and policies that promote the Marxist/socialist program known as U.N. Agenda 21.

Tonight's program will discuss recently passed legislation that is part of the Energy Bill (S.2012) and why it is important for Americans to understand the loss of liberty and the destruction of personal, state and national sovereignty that will follow passage of this legislation.

# [DRA] #1359 THE DAINES' BILL SHELL GAME

## THE DAINES' BILL SHELL GAME

While Senator Daines desperately tries to walk back from his bill S.3014, the fact is he is part and parcel of a coordinated effort to push globalist U.N. agendas that cede control of our lands and resources nationwide to Indian tribal control—all while we are kept in the dark.

Daines' response to my exposure of S.3014 has been varied: 1) try to calm things down, 2) failing that trying to look innocent and accommodating, while hanging onto the idea of off-reservation tribal forest management, and finally 3) play a shell game by moving the tribal forest management language into other bills, namely S.3085, S.2012, and HR.2642. It appears their primary strategy now is to get it passed as an amendment to the S.2012 omnibus, a bill that is far along in the process and up for final vote before long. Quick! Get it done before the elections preferably, or at least before Obama steps down! All this is happening even as reservations are declaring themselves separate nations, not subject to state authority, or even federal authority, and I've learned they even have separate standing in the United Nations! Separate from the federal government! Wow! Thus, in pushing these bills, Daines, Tester, and the rest expose the fact they no longer fulfill any constitutional duties, and choose instead to represent foreign and globalist interests.

Meanwhile, the state and county governments remain silent.

Here is my original flyer, as well as a copy of the recent Press Release for those who want to read more details.
