Hello friends,

The New American Magazine has published a substantial discussion on the escalation of federal and tribal governance rolling out to state authority and jurisdiction. The stark reality is that every single federal policy or statute is enacted by our own federal and state elected officials...not tribes. This recent explosion of land, water, forest grabs is coming directly from the people elected to serve their states and citizens. Far too many elected officials seem to have transferred their Oaths of Allegiance to tribal governments, to the detriment of all state constituents.

I encourage you to click on the link below, and if you find the information helpful, please feel free to share far and wide with your friends, organizations, publications, everywhere. The goal is to raise awareness wherever we can - and most especially in urban areas that are utterly uninformed and similarly harmed.

Also, if you're aware of local radio talk shows willing to discuss this subject, I'm very available:
