Federal & Tribal Takeover?

S2012, the North American Energy Security and Infrastructure Act

This massive 792 page Senate Energy Committee bill is sponsored by AR Senator Lisa Murkowski & co-sponsored by ID Senator Mike Simpson & WA Senator Cathy McMorris Rogers. This bill has now been passed by the US Senate & House of Representative with a yea vote by most Western Senators & Representatives. According to Congress. Gov is now at the “Resolving Differences” stage. When that is completed it will go to POTUS for his signature.

We fear it is another “we’ll read it after it becomes law” deal. Virtually no one understands the likely impact on rural land, property & water rights throughout the USA, or on families and communities whose lives will be upended.

This deal began behind closed doors with no opportunity for meaningful public examination or comment, even by those who will be most affected. The bill’s tribal government forest management provisions could diminish private property owners Constitutional Rights. Western States Constitutional Rights, LLC says that this may indeed be un-Constitutional.
