**Subject:** 712 Architects and Engineers Find More Evidence of Explosive Controlled Demolition of the 9-11-01 WTC Buildings Collapse

<http://www.ae911truth.org/>

To: Property Rights Groups, Evergreen Freedom Foundation, Friends

Never in a million years would I have thought this was possible. I have sharply jerked up others in the past spreading what I considered unproven conspiracy nonsense. Years later, you now have my attention, with 712 architects and engineers and growing, signed onto architect Richard Cage's

theory that the WTC three tower collapsed with help of thermite explosives in a controlled demolition.

I heard the interview June 9th on Coast To Coast AM with host, George Noorey interviewing Richard Cage , a practicing architect of 20 years, who came across more than credible. You can listen to the 3 hours interview in whole or part towards the end of the home page here

<http://www.ae911truth.org/>.

Also check out The AE911Truth PowerPoint multimedia slide presentation on the left, 3rd from the top.

Richard Clark will be in Seattle June 27th, see below.

**Seattle, WA**

City/State:

Date: **Sat, Jun 27, 2009**

Time: 7 PM

Topic: 9/11: Blueprint for Truth – *The Architecture of Destruction*

Speaker: Richard Gage, AIA

Venue: Seattle Town Hall

Location: 1119 8th Ave.

Event: \$10 suggested donation

---

## WTC Steel - Forensic Metallurgy

- The results of the examination are striking. They reveal a phenomenon never before observed in building fires: eutectic reaction which caused “intergranular melting capable of turning a solid steel girder into Swiss cheese.”

<http://www.wpi.edu/News/Transformations/2002Spring/steel.html>

<http://www.ae911truth.org/>

WTC Bldg. 7 Not Hit by an airplane

[http://www4.ae911truth.org/#front\\_right\\_WTC7](http://www4.ae911truth.org/#front_right_WTC7)

As your own eyes witness — WTC Building #7 (a 47-story high-rise **was not** hit by an airplane) exhibits *all* the characteristics of a classic controlled demolition with explosives: (and some non-standard characteristics)

1. [Rapid onset](#) of “collapse”
2. [Sounds of explosions](#) at ground floor - a full second prior to collapse
3. [Symmetrical “collapse”](#) – through the path of *greatest* resistance – **at free-fall acceleration**
4. **Imploded**, collapsing completely, and landed mostly [in its own footprint](#)
5. Massive volume of [expanding pyroclastic dust clouds](#)
6. Several tons of [molten metal](#) reported by numerous highly-qualified witnesses
7. Chemical signature of [Thermite \(high tech incendiary\)](#) found in solidified molten metal dust samples by physics professor Steven Jones, PhD.
8. FEMA finds rapid oxidation and [intergranular melting](#) on structural steel samples
9. [Expert corroboration](#) from the top European Controlled Demolition professional
10. [Fore-knowledge](#) of “collapse” by media, NYPD, FDNY

**And exhibited *none* of the characteristics of destruction by fire, i.e.**

1. Slow onset with large visible deformations
2. Asymmetrical collapse which follows the path of least resistance (laws of conservation of momentum would cause a falling, to the side most damaged by the fires)
3. Evidence of fire temperatures capable of softening steel
4. [High-rise buildings](#) with much larger, hotter, and longer lasting fires have never “coll.

## Molten metal beneath both Towers and WTC 7

	°F	°C
Lead (Pb) Melts	621	327
Faint Red	930	500
Blood Red	1075	580
WTC fires (T. Eagar)	1200	650
*Aluminum Melts	1221	660
Medium Cherry	1275	690
Cherry	1375	745
Bright Cherry	1450	790
Salmon	1550	845
Dark Orange	1630	890
Orange	1725	940
Lemon	1830	1000
Light Yellow	1975	1080
White	2200	1205
*Structural Steel Melts	~2750	~1510
*Iron Melts	2800	1538
*Thermite (typical)	>4,500	>2500

*Hydrocarbons (i.e., jet fuel) burning in open air cannot produce temperatures capable of melting steel. So... what can?*

<http://www.ae911truth.org/>

Here are my notes from one of the best interviews I have heard on Coast To Coast AM [www.coasttocoastam.com](http://www.coasttocoastam.com) June 9, 2009 between the host George Noory and an architect Richard Gage regarding the 9-11-2001 three tower collapse.

- Richard Gage web site on the 9-11-01 World Trade Center 3 tower collapse - [www.ae911truth.org](http://www.ae911truth.org)
- A sampling of incoming messages during the 3 hour interview indicated 80% of the 3 to 4 million Coast To Coast listeners on 523 radio stations agreed with Gage's theory vs. 40% of Americans who also disbelieve the official version

- 100 first responders saw flashes of light and explosions after the strike and before the collapse
  - this news never came out until Aug 2005
- Surrounding area dust analysis done by a leading university Dr. Jones shows molten iron spheres smaller than human hair

## Experiment Conclusions

### Dr. Jones with a small team of scientists

1. Conducted the following experiments on residue samples from the scene:
  1. Energy Dispersive Spectroscopy (EDS)
  2. X-ray Fluorescence (XRF)
  3. Wavelength Dispersive Spectroscopy
2. • They identify **predominately iron, (with very little chromium), along with aluminum, oxygen, and silicon,** (expected from thermite reactions).
3. **1,3 Diphenylpropane** was observed

The results, coupled with visual evidence at the scene such as the flowing yellow-hot liquid metal, provide **compelling evidence that thermite reaction compounds were deliberately placed in both WTC Towers and WTC 7.**

- **BYU Physics Professor Steven Jones' Paper -**  
<http://911research.wtc7.net/essays/jones/StevenJones.html>

Steven Jones' 2005 paper, Why Indeed Did the WTC Buildings Collapse?, calls for a "serious investigation of the hypothesis that WTC 7 and the Twin Towers were brought down, not just by damage and fires, but through the use of pre-positioned explosives," and includes key points which Jones and many others feel have not been addressed by the FEMA, NIST, or 9-11 Commission Reports.

Jones highlights several anomalies in the collapse events, and underscores deficiencies in the official explanations, including:

- Symmetry of the collapses
- Speed of the collapses
- Characteristics of dust jets
- Reports of molten metal in the debris piles
- Failures of the official collapse theories
- Conclusion

This paper has reviewed the recent media coverage of Steven E. Jones and has examined some of the responses from alternative news media and related propagandistic and nonscientific or hoax productions. Central to this paper is the relevance of the contrast between efforts that promote scientifically solid positions versus efforts which mix together anecdotal, flimsy or outright hoax information with real information, in order to generate hype and sell their version to the most people. This contrast will likely become increasingly clear over time as hoax information is discarded -- those attempting to promote ideas without a basis in reality have to increasingly move on to new hoaxes -- and research based on scientific analysis will withstand

- ingredients found are aluminum, iron, magnesium, sulphur, etc.
- nano thermite signs found all around area
- including unignited thermo chips and residue
- Nano thermite igniters measure 100 nanometers or 100 billionths of a meter
- nano thermite explosives are leading edge technology only available from highly controlled sources, e.g. military
- Pools of molten iron were found by first responders around the three collapsed buildings
  - thermite incinerators are capable of reducing metal structure to molten iron
  - Steel melts at 3000 degrees F
  - Fuel fire temperatures reach 1500 degrees F
- The two towers hit by commercial jets showed asymmetric movement near the impact floors above and below
  - while complete symmetry of collapse was seen in the lower floors
  - i.e. controlled demolition like uniform collapsing in the lower floors of towers

- 80 to 90% of the jet fuel burned outside of the two towers impacted
  - Rest burned up in 10 minutes
  - Fuel in office burn lasted 20 minutes
  - No high rise towers have ever been brought down from fire
    - structures are enormous heat sinks
    - structures are over designed 4 to 5 times load requirements
    - Check out this building in Madrid that burned for 28 hours without collapsing
      - <http://prisonplanet.com/articles/april2007/290407wtc7.htm>
  - Building 7 which collapsed without any commercial jet impact showed complete symmetry as in a controlled demolition
  - Collapse of the three towers were 2/3 of free fall velocity, e.g. 2/3 of the velocity of a free following brick
  - 4 and 20 ton structures were blown out of buildings some 600 feet
  - Speculation of how were the nano thermite devices planted in such secured buildings?
    - An elevator modernization operation was undertaken 9 months before 9-11-01
    - The elevator shafts were at or near the core
  - FEMA & NIST officials had self interest and led the investigation away from the real cause
  - Banks & defense profited
  - A book "The New Pearl Harbor Revisited" by David Ray Griffin re. 9-11
    - <http://www.911truth.org/article.php?story=20081125040523682>
  - Marvin Bush ( George W. Brother) linked company handled security to WTC, Dulles and United
    - <http://www.commondreams.org/views03/0204-06.htm>
  - Ex Canadian Prime Minister proponent of 9-11 truth
    - [http://www.infowars.com/articles/sept11/chretien\\_ex\\_canadian\\_pm\\_1](http://www.infowars.com/articles/sept11/chretien_ex_canadian_pm_1)
  - Former Italian President has gone public on 9/11, telling Italy's most respected newspaper that the attacks were run by the CIA and Mossad and that this was common knowledge amongst global intelligence agencies.
    - [http://www.infowars.com/articles/sept11/cossiga\\_ex\\_italian\\_pres\\_int](http://www.infowars.com/articles/sept11/cossiga_ex_italian_pres_int)

[http://www4.ae911truth.org/#front\\_right\\_WTC7](http://www4.ae911truth.org/#front_right_WTC7)

As seen in this revealing photo, the **Twin Towers' destruction** exhibited *all* the characteristics of destruction by explosives: (and some non-standard characteristics)

1. Destruction proceeds through the path of greatest resistance at nearly free-fall acceleration
2. **Improbable symmetry** of debris distribution
3. Extremely **rapid onset** of destruction
4. Over 100 first responders reported explosions and flashes
5. Multi-ton steel sections ejected laterally 600 ft at 60 mph
6. Mid-air pulverization of 90,000 tons of concrete & metal decking
7. Massive volume of expanding pyroclastic-like clouds
8. 1200-foot-dia. debris field: **no "pancaked" floors** found
9. Isolated explosive ejections 20 – 40 stories below demolition front
10. Total building destruction: dismemberment of steel frame
11. Several tons of molten metal found under all 3 high-rises
12. Evidence of thermite incendiaries found in steel & dust samples
13. FEMA steel analysis: sulfidation, oxidation & intergranular melting
14. **No precedent** for steel-framed high-rise collapse due to fire

**And exhibited *none* of the characteristics of destruction by fire, i.e.**

1. Slow onset with large visible deformations

2. Asymmetrical collapse which follows the path of least resistance (laws of conservation of momentum would cause a falling, intact, from the point of plane impact, to the side most damaged by the fires)
3. [Evidence of fire temperatures](#) capable of softening steel
4. [High-rise buildings](#) with much larger, hotter, and longer lasting fires have never “collapsed”

## **9-11 Truth:**

A practicing architect for 20 years, [Richard Gage](#) is the founding member of Architects and Engineers for 9-11 Truth. On Tuesday's show, he discussed the destruction of the three World Trade Center high-rises on 9-11, and why nearly 700 architects and engineers have found evidence for explosive controlled demolition, and are

calling for a new investigation. Lauded as an engineering feat when they were constructed, the WTC Towers, according to the official explanation, were said to collapse because of the fires burning on the upper floors. Yet, Gage pointed out that other high-rise buildings with hotter and longer fires never collapsed in this manner.

Further, in the case of fire, if a building was to collapse, it would fall over and not straight down, he said. This type of collapse indicated there was no resistance from the structures below, he added. The collapse of Building 7 was also a curiosity, as the fires seen in photos & videos were fairly small, Gage detailed. However, witnesses near Building 7 said they heard the sounds of explosions, lending credence to the idea that controlled demolitions took place.

Evidence for controlled demolition of the Towers comes from a study by Dr. Steven Jones of the pulverized dust that surrounded the area after the collapse. The material was found to have the chemical signature of thermite, created through nanotechnology, something that military departments have been experimenting with in laboratories. Gage speculated that this thermite might have been planted in the Tower's elevator columns during a lengthy modernization project that was begun 9 months prior to 9-11. Because of this and other evidence, he is calling for a new and independent investigation to uncover the full truth about the events surrounding 9-11. He recommended signing the [AE911 Truth Petition](#) and visiting the [NYC Coalition for Accountability Now site](#).

### ***Free Streamlink Weekend:***

We're happy to announce that our **Free Streamlink 'Weekend'** will start this Wed. June 10th and run through Sun. June 14th. Visitors will be able to test drive our popular [subscriber service](#), including the Podcast feature, which automatically downloads the show for you each morning. Go to the *Coast to Coast* [homepage](#) tonight for the free sign-up.

## ***Highlighted Site:***

The [Earth Speaks](#) research project, associated with SETI, explores the question: "If we discover intelligent life beyond Earth, should we reply, and if so, what should we say?" People are invited to submit material they'd like to send to other worlds.

## ***Today in Strangeness:***

Controversial scientist [Immanuel Velikovsky](#) was born on this day in 1895. In his best-selling 1950's book, *Worlds in Collision*, he wrote about celestial catastrophes that affected ancient peoples. On June 10, 1752, [Benjamin Franklin](#) flew a kite during a thunderstorm, enabling him to demonstrate the electrical nature of lightning.

## ***Tonight's Show, Wed. June 10th:***

In a special show about 2012, George Noory will garner different perspectives from separate guests each hour.
