Most everyone loves turtles, except when you start labeling them to launder environmental extremism over ranchers livelihood and lives, then the line in the sand is crossed.

# The Predatory Federal Judiciary

*"...the Federal Judiciary; an irresponsible body (for impeachment is scarcely a scarecrow), working like gravity by night and by day, gaining a little today and a little tomorrow, and advancing its noiseless step like a thief, over the field of jurisdiction, until all shall be usurped from the States, and the government of all be consolidated into one. ... when all government ... in little as in great things, shall be drawn to Washington as the centre of all power, it will render powerless the checks provided of one government on another and will become as venal and oppressive as the government from which we separated."*

Thomas Jefferson, 1821

# First Standoff - Bundy Ranch vs. BLM – March 2014

Exhausted British troops finally reached the safety of the Charlestown peninsula on the evening of April 19. During the night, longboats ferried British soldiers back to Boston. Meanwhile, patriot units from throughout New England formed an arc about the harbor city.

Over the next couple of days approximately 20,000 patriot soldiers joined an "army of observation."

The fledgling patriot army, with units from Massachusetts, Connecticut, New Hampshire, and Rhode Island, was initially poorly disciplined and loosely structured. Nevertheless, in June 1775, patriot forces fought courageously during the Battle of Bunker Hill.

To strengthen the patriot army, the Second Continental Congress appointed George Washington of Virginia commander of "all the continental forces" on June 15, 1775. Washington arrived in Cambridge on July 2 and assumed command of the troops the next day.

With his junior officers, Washington immediately set to work accumulating supplies, constructing barracks, cutting waste, raising funds, and imposing discipline. To a friend in New York he wrote, "In a little Time we shall work up these raw materials into good stuff."

Do you see a difference between the report above re. armed British troops occupying and invading the colonies in 1775 and armed gvt. serial agencies invading our land now? I don't.

## Turtles For the BLM Or Cows For Bundy

"Turtles for cows, open range for kings land? In the good old USA! By the stroke of a pen some politician can rake in the cash if he can stand for a cause that he can sell the public. First he's got to have a victim, a helpless victim. In this case its the poor threatened dam near extinct turtle. With it all there has to be something to save it from. That's easy, the cow. Ignore the fact that the turtles and the cows have been sharing the same range for the last how many thousand years now? But all it takes is the right message to the masses and you can make "truth" out of anything if you say it long enough. I have to ask you are there any rational thinking people anywhere, city or country, that really believes that this is about saving the turtles from the cows? For hell sakes they would have been extinct before the pilgrims landed. **This is about control.** Control the land, you control the people in the land. Control the people, you control the economy of the people. The cow is a job, an economy for the cowboy. The turtle is a job, an economy for the government boys and girls. ..Didn't used to be that way, it is now. " Cleve Bundy quote from his blog site - [bundy ranch.blogspot.com/2014/03/](http://bundy ranch.blogspot.com/2014/03/).

## Second Standoff – Bundy's & Hammond's vs. The U.S. BLM & FWS

“During the 1970's the Fish and Wildlife Service (FWS), in conjunction with the Bureau of Land Management (BLM), took a different approach to get the ranchers to sell. Ranchers were told that, “grazing was detrimental to wildlife and must be reduced”. 32 out of 53 permits were revoked and many ranchers were forced to leave. Grazing fees were raised significantly for those who were allowed to remain. Refuge personnel took over the irrigation system claiming it as their own.” Bundy Ranch Blog

The solution in work is to break up these overreaching barbaric agencies. The next step should be to stop all further transfer of public AND private property into any form of public parks, refuges, etc, without a unanimous direct vote by all affected local private property owners. Locals must take back complete power to save themselves, their land and communities and to stop all land grabs. Elected and unelected government employees are out of touch of property ownership reality and live in an ivory tower. So called “representative” systems never work and this is more proof. We are represented without consent.

# Facts & Events in the Hammond Case -

Critical chronology to understand the historical taking of this private property

Source: <http://bundryranch.blogspot.com/2015/11/facts-events-in-hammond-case.html>

- aa) The Harney Basin (where the Hammond ranch is established) was settled in the 1870's. The valley was settled by multiple ranchers and was known to have run over 300,000 head of cattle. These ranchers developed a state of the art irrigated system to water the meadows, and it soon became a favorite stopping place for migrating birds on their annual trek north.
- a) In 1964 the Hammonds purchased their ranch in the Harney Basin. The purchase included approximately 6000 acres of private property, 4 grazing rights on public land, a small ranch house and 3 water rights. The ranch is around 53 miles South of Burns, Oregon.
- a1) By the 1970's nearly all the ranches adjacent to the Blitzen Valley were purchased by the US Fish and Wildlife Service (FWS) and added to the Malheur National Wildlife Refuge. The refuge covers over 187,000 acres and stretches over 45 miles long and 37 miles wide. The expansion of the refuge grew and surrounds the Hammond's ranch. Being approached many times by the FWS, the Hammonds refused to sell. Other ranchers also choose not to sell.
- a2) During the 1970's the Fish and Wildlife Service (FWS), in conjunction with the Bureau of Land Management (BLM), took a different approach to get the ranchers to sell. Ranchers were told that, "grazing was detrimental to wildlife and must be reduced". 32 out of 53 permits were revoked and many ranchers were forced to leave. Grazing fees were raised significantly for those who were allowed to remain. Refuge personnel took over the irrigation system claiming it as their own.

# Facts & Events in the Hammond Case

- (a3) By 1980 a conflict was well on its way over water allocations on the adjacent privately owned Silvies Plain. The FWS wanted to acquire the ranch lands on the Silvies Plain to add to their already vast holdings. Refuge personnel intentional diverted the water to bypassing the vast meadowlands, directing the water into the rising Malheur Lakes. Within a few short years the surface area of the lakes doubled. Thirty-one ranches on the Silvies plains were flooded. Homes, corrals, barns and graze-land were washed a way and destroyed. The ranchers that once fought to keep the FWS from taking their land, now broke and destroyed, begged the FWS to acquire their useless ranches. In 1989 the waters began to recede and now the once thriving privately owned Silvies plains are a proud part of the Malheur National Wildlife Refuge claimed by the FWS.
- (a4) By the 1990's the Hammonds were one of the very few ranchers that still owned private property adjacent to the refuge. Susie Hammond in an effort to make sense of what was going on began compiling fact about the refuge. In a hidden public record she found a study that was done by the FWS in 1975. The study showed that the “no use” policies of the FWS on the refuge were causing the wildlife to leave the refuge and move to private property. **The study showed that the private property adjacent to the Malheur Wildlife Refuge produced 4 times more ducks and geese than the refuge did. It also showed that the migrating birds were 13 times more likely to land on private property than on the refuge.** When Susie brought this to the attention of the FWS and refuge personnel, her and her family became the subjects of a long train of abuses and corruptions continued. <http://bundy ranch.blogspot.com/2015/11/facts-events-in-hammond-case.html>

## The Bundy Mistrial and Release

- 19 people were charged in the Bundy ranch standoff, 2 men took plea deals, the rest were split into three groups based on charges .
- Multiple retrials produced many acquittals and dismissal of conspiracy charges and plea deals on greatly reduced initial charges.
- All this, after these men have been in prison for up to a year and half AFTER almost 2 years before they were indicted.
- Cleve Bundy had been in jail for 700 days as a “political prisoner”. He was released from prison on January 8, 2018 after refusing to leave until the trial was over to support others waiting trial.
- The expectation is the mistrial judgment will have a positive trickle down effect on the remainder of the patriots involved in the standoff.

# U.S. Department of the Interior - "Protecting America's Great Outdoors and Powering Our Future"

Can you believe this DOI website can be so out of touch to reality. Read these extracted statements. Something is terribly wrong with such blind pious feel good intentions coexisting with the tyranny they create. The DOI & IRS have common ground driven by the same end agenda. "There are none so blind as those who will not see."

- If you have feedback to the US DOI email to : [feedback@ios.doi.gov](mailto:feedback@ios.doi.gov)

## Interior Organizational Chart

Obviously the Open Government plan is not working even with their 60 some Public Affairs personnel. How can DOI claim to "understand citizens' demand" when their heads are full of butterflies, turtles and birds claiming priority over property owners livelihoods and lives?

"The Department of the Interior assembled a multi-functional team from across our department to develop Interior's Open Government Plan. In addition to meeting all of the requirements of the Open Government Directive, Interior's Open Government plan seeks to:

- 1) "Create better relationships between government and citizens"
- 2) Enable DOI to understand citizens' demand for services more clearly and be more responsive to their needs
- 3) Increase the rate of innovation by leveraging public knowledge
- 4) Increase DOI's ability to meet its mission more effectively and efficiently by transparently engaging the public in decision making
- 5) Encourage the development of Open Government Programs
- 6) If you have feedback on our Open Government Plan, please send to [open@ios.doi.gov](mailto:open@ios.doi.gov)."

# Bureau of Land Management Table of Organization

This Land is MY Land - Neil Kornze - Ex Aid to Senator Reed - Everybody Else Go To Prison.

DOI has unlinked this org chart since I put this up hopefully to reorganize

- “Richardson noted that, “Your normal BLM director is a guy who has been in land management for 20-30 years, a grizzled veteran, a career guy. This guy, if he's a career guy of anybody, it's in Senator Harry Reid's office,” said Richardson.”
- “Politics wasn't on his mind when Kornze arrived at Whitman: he thought he would major in geology or math, but the breadth of class experiences in his first year turned him on to the social sciences, and he eventually became a politics major.”
- Kornze is out thanks to President Trump and US DOI Secretary has named Michael Nedd BLM Director. Lets see if anything changes.
- Also three state BLM directors were told to take a hike, i.e. accept transfers, retire or resign
- One third of DOI employees are not loyal to Trump.
- Trump team may move BLM HDQ to Salt Lake City or Denver.
- I would break this green cabal up and scatter it all over the Rocky Mountains and make them live with the ranchers they are messing with, just for starters.

# About “Conserving The Nature of America” At the Cost of Locals and Local Property Owners

- I count some 57 US FWS Office of Public Affairs positions in 8 regions of America per their web site.
- Look at the individual Public Affairs responsibilities.
- I see mostly junk green “science” - multiple jobs related to ESA including ESA foreign species, multiple jobs related to monarch butterfly, native American issues, Wildlife Refuge Systems policies and regulations, migratory birds, wolf, prairie chickens, climate change, wetlands, Aquatic conservation, Urban Refuge Program, Urban Bird Treaty.
- We have 8,906 U.S. DOI BLM government employees funded by forced tax taking managing species which have mass extinction rate history beyond the control of man living on largely arid land no one wants claiming they also manage the climate while they imprison anyone protesting.
- Now check out the upper right chart and web page on “Are Mass Extinctions Destructive or Creative”, they are BOTH.
- The US FWS & BLM is a laundering operation for global to local environmental extremism used largely to control private and public land for their own self righteous benefit at the expense of the surrounding property owners.
- How can anyone justify government resources on foreign species, monarch butterflies, migratory birds, wolfs, prairie chickens, climate change, aka man caused global warming fiction? Fire prevention OK. Any American, most especially surrounding ranchers who can use this mostly arid land should be given free priority not imprisoned for protesting token fees.
- How did such green hobbies become “science” and government careers paid for by forced tax taking on wages, pensions and private property of American state Citizens who do not want this nonsense nor can afford it all while they go to prison protesting!
- **This is easy to answer; this deception is called Represent Without Consent.**

# Let's Get Rid of the Fed -We've Done It Before

What is stopping the transfer of federal held lands to the state? And the answer is global to local big money wanting green extreme control.

- 1) Environmental extreme groups, especially east coast organizations consider all public lands their play grounds .
- 2) Green foundations like The Brainerd Foundation fund radical environmental control over resources in the most beautiful states such as Montana. [Link here to see some 300 organizations they are funding across the NW.](#)
- 3) Foreign radical foundations such as Wyss Foundations funded by a Swiss billionaire Hansjorg Wyss to better control and transfer large blocks of public land into “national monuments”. Scroll down to “Funding” - <https://www.greendecoys.com/decoys/montana-wildlife-federation/>
- 4) Montana Wildlife Federation is a group funded by many of these extreme liberal green foundations, e.g. Tides Foundations, Cinnabar Foundations, Liz Claiborn Foundation, Tordik Wildlife foundation, Wilburforce Foundation, Henry P Kendall Foundation, Union of Concerned Scientists, Sierra Club of Canada, Earth Island Institute, Wildlands Project/Network. - I use this graph often as it clearly shows the exploding tyranny of the police state in America.
- We are living in an epic rise of green extreme serial agencies enforcing insane policies founded in liberal institutions often connected global to local at the federal, state and municipal levels .
- Not 80% of these agencies or policies would be allowed if the state Citizen directly voted on each issue.

# The crime and punishment lie - Part 1 of 2

## - More prisoners with no increase in crime

- 1) The message on this slide is the social benefits of incarcerating the top 75% of "crimes" does not outweigh the social cost, click on Quarterly Journal of Economics page, directly right.
- 2) This is more validation of the message in this presentation, i.e. that at least 75% of the legislation, judication and administration is retrogressive and massively expensive.
- 3) **Criminal Penalties for Public Corruption/Violations of State Ethics Laws**
- 4) This brings up the question again, why haven't the politicians been prosecuted for the real crimes in America of exploiting fallacious fear based knee jerk laws, i.e. "we are the hammer and you are the nail".
- 5) The answer is they have woven themselves a security blanket threaded with their lies. They want quick political fixes that look and feel good which more often make the problem worse.
- 6) These lies are often not seen until it is too late, decades, generations, even centuries later.
- 7) Codes, regulations, usury & taxes on sovereign state Citizens do not work. Punishment of a non consenting adult, especially for a non violent "crime" is regressive & costs more than the return to society.
- 8) "The U.S. incarcerates nearly 2.4 million people,<sup>13</sup> including people held pretrial and those sentenced for an offense; if they were all in one state, it would be the 36th most populated, between New Mexico and Nevada. No other country in the world incarcerates as many people as the United States. China, a country of 1.3 billion people—is second, incarcerating 1.6 million people.<sup>16</sup>

## U. S. Prison Population and Crime Rates 1973–1992

Data are indexed using 1973 as a base year. All underlying variables reflect rates per capita. Prisoners indexes the number of prisoners held per capita in state prisons on December 31. UCR violent and property crimes index the per capita rate of violent and property crimes reported to the police, as compiled in the Federal Bureau of Investigation's *Uniform Crime Reports*. NCS violent and property crimes index victimization rates are drawn from the National Crime Survey.

While the evidence on trends in crime rates is mixed, it does not appear that record levels of incarceration in the United States have been accompanied by large declines in crime, as demonstrated in Figure I. Over the same period that the incarceration

Piehl 1991].<sup>2</sup> Cost-benefit calculations based on prisoner self-reports suggest that the social benefits of incarcerating the median and mean prisoner outweigh the social costs, but that the cost of imprisoning the bottom quartile of inmates outweighs the social benefits [Piehl and DiIulio 1995].

# The crime and punishment lie - Part 2 of 2 (one small example)

**This slide is added to show how grand jury power has been greatly eroded by government prosecutors and state ATGs. All power should rightfully rest with the state Citizens through jury nullification of the laws, grand juries and direct vote on ALL municipal, state and federal legislation. This never happens and government agency power is out of control.**

## **THE GRAND JURY DUE-PROCESS RIP-OFF ~**

**SPEAKER: Tony Davis**

We were told a few years ago through a former federal prosecutor that if you wanted to win your case you need to follow the grand jury.

He also advised that in many cases the grand jury does not actually meet. He said the prosecutor has the foreman of the grand jury's signature stamp right there in his office and fills out the grand jury form himself. The prosecutor then simply just stamps the signature; similar to robo-signing on a mortgage.

We tested the concept in a case in Wisconsin in which the person had pled guilty and spent 8 years in prison.

They offered him an expungement.....

In the last 2 weeks we tested the concept in a federal case in Louisiana. The clerk said the prosecutor held all the grand jury records. The prosecutor said these records had been destroyed. Furthermore, the prosecutor said only one person testified at trial, an IRS agent, but 30 people testified at trial. We then checked and found the IRS agent had used a fake name at trial.

We thought Title 18 was hot (it still is) and CIPA and Rovario and Brady were hot. (They still are).

*We have never seen anything as hot as this.*

As just mentioned, in a recent case in federal court in Louisiana, the clerks admitted they had none of the grand jury records. So who holds them? According to the clerks, it is the prosecutors.

But isn't that a violation of US v. Williams, 1992, SCt, in which Scalia stated that the grand jury is to be a 4th Branch of government, not to be tampered with by any other branch.

And we started investigating grand jury records in other cases.

What we found was:

1. Robo-signing (similar to a mortgage) on the grand jury records;
2. Destruction of records to avoid having them inspected;
3. No recorded vote of grand jury members (at least a quorum must vote for indictment but how do you know if no record exists;
4. No presentation of the indictment in "open court"
5. The prosecutor acts as a witness, which is completely illegal.
6. Subliminal messaging to grand jury (and to regular jury) by prosecutor.

As we said, the grand jury is a bigger issue than even Title

2. The blocking of jury nullification and Grand juries by the federal, state and municipal judiciary has led to this overwhelming abuse of serial agency use of force.
3. Some half of federal prison population are illegal aliens.
4. American priorities are upside down and backwards, i.e. no border control plus green serial agencies driven by green extreme to imprison ranchers and their cattle over turtles = government tyranny!

## “AMERICA IS A NATION OF LAWS” LIE – HOW NATURAL ACTS ARE CRIMINALIZED FOR PROFIT & POWER

“Law. That which is laid down, ordained, or established. A rule or method according to which phenomena or actions co-exist or follow each other. Law, in its generic sense, is a body of rules of action or conduct prescribed by controlling authority, and having blinding legal force. United States Fidelity and Guaranty Co. v. Guenther, 281 U.S. 34, 50 S.Ct. 165, 74 L.Ed. 683. that which must be obeyed and followed by citizens subject to sanctions or legal consequences is a law. Law is a solemn expression of the will of the supreme power of the State. Calif. Civil Code, para. 22.1.”

Black’s Law dictionary, Fifth Edition

FreedomForAllSeasons Note: “controlling authority” is the Grand Jury AND Trial Jury and Nullification and direct vote of all government policy in a true and honest Republic.

- ✓ Man made “laws” grow and change to suit the politics.
- ✓ Unalienable rights are birth rights freely given to the American natural born and rightfully naturalized Citizens . These rights are inviolable, immutable and absolute.
- ✓ Notice the above legal definition of law capitalizes the “S” in state and not the “C” in Citizen, this is backwards, i.e. the Citizen is sovereign not the state in a true and honest republic.
- ✓ Notice the over use of threatening verbiage such as “ordained”, “controlling authority”, “having blinding legal force”, “must be obeyed by the citizens subject”. This power was never given, it was self bestowed by politicians, lawyers and benefiting non government organizations.
- ✓ America is a nation foremost of rights NOT laws.
- ✓ These rights are described in the Laws of Nature and Nature’s God, the Declaration of Independence, the Bills of Rights and the spirit and intent of the success of the first American Revolution.
- ✓ These Certain Enumerated Unalienable Rights (70 ) are codified together for the first time by Freedom For All Seasons here:

Larceny. In criminal law. The wrongful and fraudulent taking and carrying away by one person of the mere personal goods of another from any place, with a felonious intent to convert them to his (the taker's) use, and make them his property, without the consent of the owner. Blacks Law Dictionary 1910, 2nd Edition

“Here it is in a nutshell. The IRS is a private, debt collection agency for the private banking system known as the Federal Reserve Bank. The IRS is not a government agency. I repeat, the IRS is not a government agency. Never has been, never will be.

The IRS is formerly the Bureau of Internal Revenue (BIR) situated in and with authority only in the Philippine Islands (Trust Fund # 61), and moved into Puerto Rico (Trust Fund # 62). In the 1950's, with the stroke of the pen, the BIR was transformed into the current notorious IRS and brought onto the 50 united States. This was done without any Congressional authority whatsoever. There is no Congressional authority for the IRS to exist and operate in the 50 states recorded anywhere in any law-books. Again, keep in mind, that the IRS is the “Private, debt collection agency for the private banking system known as the Federal Reserve Banks.”

Due to the abysmal ignorance of the American people, most Americans do not realize that there are two title 26.”

## FEW SHERIFFS STAND TALL – PART 2 OF 2 SHERIFFS ARE THEY GOING TO WAKE UP

"Any law which would place the keeping and safe conduct of another in the hands of even a conservator of the peace, unless for some breach of the peace committed in his presence, or upon suspicion of felony, would be most oppressive and unjust, and destroy all the rights which our Constitution guarantees." *Pinkerton v Verberg*, 78 Mich 573, 584; 44 NW 579, 582-583 (1889).

### Sheriffs, Please Awaken!

March 23, 2012

Contact: Christina Tobin (312) 320-4101

When our prominent federal officials default on their obligation to provide Constitutional limited government, the last line of defense lies in our elected county sheriffs. Even when politicians sell out our liberty to cadres of corrupt special interests, county sheriffs, and the peace officers that serve under them, can still act as a firewall against their abuses.

Since sheriffs and peace officers swear oaths directly to [The Constitution](#), as the overreach of the federal government expands, they face a conflict of duty and conscience in enforcing new federal dictates. In response to these difficulties, some sheriffs and peace officers have formed the [Constitutional Sheriffs and Peace Officers Association](#).

Headed by former Arizona Sheriff [Richard Mack](#), a current Congressional candidate in [Texas' 21st district](#), the association aims to create support among government officials struggling to preserve their oath to the Constitution against growing federal pressure.

In 1997, Sheriff Mack and Sheriff Jay Printz of Montana challenged and defeated provisions of the Brady Act, which forced local law enforcement to conduct federally mandated background checks on gun applicants. With the introduction of laws [legalizing indefinite military detention](#), an endless [destructive drug war](#), and even [crackdowns on farmers](#) who sell milk, the need for principled law enforcement is more pressing than ever.

"What we need right now is a peaceful movement uniting both the left and the right against the erosion of our Constitutionally guaranteed liberties." said Sheriff Mack.

"As part of this effort, sheriffs and peace officers sworn to uphold the Constitution can, should, and will be the dedicated defenders of the people's rights. When law enforcement sets

a high standard by critically examining the constitutionality of their own actions, there is an essential protection against the abuse of power."

Law enforcement today is increasingly forced to make tough Constitutional and ethical judgments. We citizens should support those local officers who courageously stand up for liberty.

Christina Tobin, founder and chair of 'The Free and Equal Elections Foundation' [attended CSPOA's annual convention](#) January 30th in Las Vegas, and will attend their [April 3rd fundraiser](#) in Buena Park, CA. The Foundation enthusiastically supports Constitutional awareness among law enforcement officers as part of the fight to provide locally elected alternatives to federal control.

Sheriff Mack will speak at an upcoming 'Free and Equal' event this summer in Chicago.

- “The Crisis of the Day When I sued the Clinton administration in 1994, I never imagined that Justice Scalia - the author of the ruling for the majority - would be so profound and powerful with his defense of the Tenth Amendment(1). Not only did Scalia say that the "States are not subject to federal direction" and that the US Congress only had "discreet and enumerated powers" and that federal impotency was "rendered express" by the Tenth Amendment, he also proclaimed that the States "retained an inviolable sovereignty." You would think that these statements alone would be monumental enough and would provide sufficient ammunition for all state and local officials to stand against any governmental tyranny without any hesitation. Nevertheless, Scalia went even further in this landmark decision, one in which two small-town sheriffs headed the Feds "off at the pass" and sent them on their way. Scalia, in his infinite obligation to the Constitution, took this entire ruling to the tenth power when he said, "The Constitution protects us from our own best intentions...so that we may resist the temptation to concentrate power in one location as an expedient solution to the crisis of the day." The "crisis of the day?" Was Scalia clairvoyant? He rendered this opinion in June of 1997.”
- Note (1) Tenth Amendment - “The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people. “

# AIRLINE CAPTAIN, NAVY PILOT & FEDERAL AIRLINE SAFETY INSPECTOR/INVESTIGATOR BLOWS THE WHISTLE ON THE CIA AND OTHER SERIAL AGENCIES

## Captain Rodney Stich background:

1. A Navy pilot during World War II.
2. Airline captain for many years, including flying captain for Japan Airlines...
3. Flying wounded GIs to the United States from the Korean War.
4. Flying Muslim pilgrims from throughout Middle East to the holy cities of Mecca & Media.
5. In Iran the morning that the CIA orchestrated the revolution..
6. Captain of virtually every propeller aircraft flown by airlines after WW II ..
7. Federal airline safety inspector-investigator, given the assignment to correct the conditions that at that time were responsible for worst series of airline disasters in nation's history.
8. A successful real estate developer and investor, pyramiding a \$500 investment into \$10 million by the time corrupt judges.
9. **Author of 19 books on government intrigue.**
10. Guest and expert on over 3,000 radio and TV shows since 1978.
11. Confidant to several dozen other former government agents, former drug smugglers working covert government operations & former Mafia sources.
12. Activist since 1964, aggressively fighting a one-man battle against the endemic corruption in government.
13. The target of continuing legal, judicial and Department of Justice attacks since 1982. The results and obviously the goal of the multiple schemes, was to halt his costly attempts to circumvent the endemic cover-ups and inform the American of the corrupt activities and tragic consequences adversely affecting the American people and the United States.
14. The parallel attacks included over 50 lawyers and law firms, over 50 federal judges, over a dozen California judges, all engaged in massive civil rights combined with repeated violations of multiple criminal statutes, including obstruction of justice; felony retaliation against a witness and former federal agent; criminal violations of civil rights that were part of the obstruction of justice schemes.
15. The attacks by these dozens of people knowingly hindered—and surely intended—the ability to continue to expose the high level corruption. That in turn not only protected the corrupt activities responsible for numerous great tragedies, but insured that the corruption and the tragedies would continue. In this way, all of the participants became complicit, and enablers, to some of the worst tragedies to affect the United States and its people. (Details in such documentary books as *Unfriendly Skies: 20th & 21st Centuries*; *Defrauding America*; *America's Housing and Financial Frauds*, and others.

“Eventually justices of the U.S. Supreme Court became implicated as they were officially notified of the civil rights violations and obstruction of justice by judges over whom they had supervisory responsibilities.

The evidence strongly indicates that a powerful force somewhere high in government was responsible for the original scheme, which had the power to control the corrupt acts of large numbers of California and federal judges.”

- Among the reasons why most Americans are uninformed of these matters is due to such matters as:
- Culture of cover-up by bribe-taking members of Congress.
- Culture of cover-up by employees in control of the political U.S. Department of Justice.
- Culture of cover-up by media people and media corporations in the United States.
- Americans, who are either (a) unable to comprehend these matters; (b) those who are too lazy to read anything except mundane trivia matters; (c) those who lack the courage and integrity to show outrage and take action.
- Another way to look at the decades of lying to the American people and the repeated infliction of great harm affecting them is to think of the public as a "feeding trough" for special interests to feed upon.

### The Government's Growing Police Force

Government agencies of all stripes have become the front-line enforcers for many of the laws Congress has written the past four decades. Currently, there are believed to be around 25,000 sworn law enforcement officers in federal agencies not traditionally associated with crime-fighting. Among them are 3,812 criminal investigators working for departments other than Treasury, Justice, Defense and what is now Homeland Security. See how the number of criminal investigators in those other federal departments has changed over time. Click on column headers to sort.

# MANDATORY MINIMUM SENTENCES

## I. What this Graph Depicts

This graph depicts the number of times federal mandatory minimum sentences were created, increased, or expanded by Congress each year between 1987 and 2012. As of August 2012, there were 201 such new sentences or increases or expansions of existing sentences.

## II. CONCLUSIONS FROM THE DATA

Congress is significantly more likely to create or expand a mandatory minimum sentence in an election year than in a nonelection year. Since 1987, there has been only one election year (2010) in which Congress did not create or expand any mandatory minimum sentences.

The prison population is getting older

## Nationwide, the Number of Prisoners Age 55 and Older Rose Sharply Over the Past Decade

Percentage change in sentenced prison populations by age group, state and federal, 1999-11

Note: The Bureau of Justice Statistics estimates the age distribution of prisoners using data from the Federal Justice Statistics Program and statistics that states voluntarily submit to the National Corrections Reporting Program. State participation has varied, which can cause year-to-year fluctuations in the Bureau's estimates but does not affect long-term trend comparisons. Between 2009 and 2010, the number of states submitting data increased substantially.

# Sentencing Terrorist Crimes

## Sentencing Terrorist Crimes Ohio State Law Journal

### VI. CONCLUSION

“Where sentencing in cases involving politically motivated violence was once straightforward, since violence was at the root of a criminal conviction, the **modern terrorism prosecution now relies largely on material support charges unconnected to any violence and inchoate criminal activity not likely to result in actual violence.** The passage of a terrorism-sentencing enhancement reflects the government’s resolve to increase penalties for a certain class of offenses.”  
Wadie E. Said

### MASS INCARCERATION

The United States is the world’s leader in incarceration with 2.2 million people currently in the nation’s prisons and jails — a 500% increase over the last forty years. Changes in sentencing law and policy, not changes in crime rates, explain most of this increase. These trends have resulted in prison overcrowding and fiscal burdens on states to accommodate a rapidly expanding penal system, despite increasing evidence that large-scale incarceration is not an effective means of achieving public safety.

# HOW THE “FEDERAL RESERVE AND GOVERNMENT TAKE OUT INDEPENDENT FARMERS

## “How Farmers Became Duck Dinner

- 1) During WWI Ag profits soared & farmers saved their money in war bonds and local community savings accounts in Midwest and South.
- 2) New York banks share of America’s deposits declined so the New York banks called in their Federal Reserve and a few of the country banks were chosen to become members.
- 3) The plan used many times before was to (1) advance easy credit to the farmers to lure them into the trap, (2) create a recession to decrease their income enough to stop their loan payments.
- 4) The country banks would then be faced with non performing loans and foreclosed properties which they could not easily sell.
- 5) Thus the targeted banks were wiped out and too bad for the farmers.
- 6) Congressman Charles Lindbergh, Sr. (father of solo Lindbergh) stated, “Under the Federal Reserve Act, panics are scientifically created; the present panic is the first scientifically created one, worked out as we figure a mathematical problem.” (The Economic Pinch, C.A. Lindbergh, Sr.)
- 7) In May 1920...the farmers were exceedingly prosperous...they were paying off their mortgages. They had purchased lots of new land at the instant of the instance of the government, had borrowed to do it and then they were bankrupted by a sudden contraction of credit and currency in 1920..
- 8) The Federal Reserve Board secretly met on May 18, 1920 all day, 60 printed pages of minutes in Senate Document 310 of February 10, 1923. Under action taken by this Board the contraction of credit and currency diminished the national production \$15 billion and threw millions of people out of employment and reduced the value of land and ranches \$20 billion.
- 9) Large city banks members of the Federal Reserve System were given support by the Fed during the summer of 1920 to extend credit to manufactures and merchants to ride out depression but not to the farmers or country banks which fell like dominoes. This was called the Agricultural Depression of 1920-21, a.k.a. Country Duck Dinner in New York.”
- 10) Summary from “The Creature From Jekyll Island, G. Edward Griffin, pgs. 476-477

“By 1960, the United States was spending over a billion dollars a year just in store surplus commodities. In 1961, Ag. Secretary Orville Freeman decided to end the problem of surplus production by bringing independent corn growers to their knees – even through the surpluses were generated almost solely in response to high federal price supports. Freeman told a congressional committee in 1965 that the USDA “purposely dumped government held surplus corn on the markets in order to move our prices down far enough so that they would be way below the support level, the loan level, so that we would thereby get compliance. That was the whole intent and purpose and thrust of the program.” Getting “compliance” simply meant driving down prices to force farmers to follow government orders and leave some of their fields unplanted. (Only farmers who had previously enrolled in government programs and submitted to demands to idle some of their fields were protected against price decreases.)” “Lost Rights, James Bovard, Pg. 154

3. [Find out who the traitor is in your state](#)

“Description Americans right to access fresh, healthy foods of their choice is under attack. *Farmageddon* tells the story of small, family farms that were providing safe, healthy foods to their communities and were forced to stop, sometimes through violent action, by agents of misguided government bureaucracies, and seeks to figure out why. Filmmaker Kristin Canty's quest to find healthy food for her four children turned into an educational journey to discover why access to these foods was being threatened. What she found were policies that favor agribusiness and factory farms over small family-operated farms selling fresh foods to their communities. Instead of focusing on the source of food safety problems most often the industrial food chain policymakers and regulators implement and enforce solutions that target and often drive out of business small farms that have proven themselves more than capable of producing safe, healthy food, but buckle under the crushing weight of government regulations and excessive enforcement actions. *Farmageddon* highlights the urgency of food freedom, encouraging farmers and consumers alike to take action to preserve individuals rights to access food of their choice and farmers rights to produce these foods safely and free from unreasonably burdensome regulations. The film serves to put

policymakers and regulators on notice that there is a growing movement of people aware that their freedom to choose the foods they want is in danger, a movement that is taking action with its dollars and its voting power to protect and preserve the dwindling number of family farms that are struggling to survive.

The message has already reach Capitol Hill. Congresswoman Chellie Pingree (D, ME) along with Ron Paul (R, TX) and Ed Perlmutter, (D, CO) sponsored the Congressional screening of *Farmageddon*. Pingree, who is also an organic farmer, wants her colleagues to see the devastating effects regulatory policies are having on small American farms.

*Farmageddon: The Unseen War on American Family Farms* vividly conveys the stories ( including the now infamous [Rawesome Food raid](#)) of numerous farmers who found themselves on the wrong side of government food policy. It is hard to imagine our government using S.W.A.T. raids to deal with misdemeanors, nor is it easy to fathom agents of the law seizing valuable farm products and equipment, particularly in cases where there is no proof of harm. This movie enables viewers to come face to face with the harsh realities of providing local, fresh and healthy food.”

“One incroachment leads to another; precedent gives birth to precedent; what has been done may be done again; thus radical principles are generally broken in upon, and the constitution eventually destroyed.”

*VanHorne's Lessee v. Dorr*  
(C.C. Pa. 1795)

May 29, 2014

Dear Member,

Last month, we reported some very disheartening news. The final decision in my family’s case *Hage v. United States*, the landmark takings case filed by my parents, Wayne and Jean Hage, resulted in a “no cost” compensation award from the U.S. Court of Federal Claims.

This means the Hage family will not see a dime of compensation for the federal harassment and taking of our property that began in 1978.

This final decision is the last stop for our legal challenge. Although the plaintiff’s attorney is currently protesting whether or not he was properly noticed about the final decision, it is unlikely that this protest will have any effect on the outcome of the decision.

We won the first major rounds in the federal takings case, resulting in a landmark takings award of over \$14.4 million, plus attorney's fees and confirmation that we owned the water that flowed to the private lands, the range improvements and the ditch rights of way.

But then, on appeal, the U.S. District Court of Appeals for the Federal Circuit, took away our ownership of the range improvements and the compensation award in its entirety. But, they didn't do it by overturning the fundamental issues. They did it by relying on very minor and questionable arguments, such as lack of standing, and ripeness.

We've already started seeing the repercussions of this decision issued November 4<sup>th</sup>, 2013. Nevada rancher Cliven Bundy had been in a 21-year battle with the BLM, but not until after the final *Hayden* decision did BLM take action against him.

Everyone in the nation saw with their own eyes how abusive and arrogant the BLM is when they carried out one of the largest and most public uses of force against a single private citizen in recent history. We knew that BLM's timing was not random. They were emboldened and thought they could get away with taking another United States citizen's property.

Unfortunately, we fear there will be more to follow as the federal land management agencies now know they can take private property without accountability.

[www.FreedomForAllSeasons.org](http://www.FreedomForAllSeasons.org)

It's open season on western ranchers.

We will never concede defeat and we will continue to fight. Fight for what is right and fight for our country. It's a much bigger battle now and it's time we rekindled those embers we all used to have, but felt like had been beaten into submission. We need to turn our grief and our anger into a blazing furnace and come out victorious on the other side of this battle!

Knowing my family's legal battle was not going the direction my mother and father wanted, we decided to continue the fight in other ways. Several years ago, we developed a new strategy called "coordination" that was used to stop the Tran-Texas Corridor and the Dunes Sagebrush lizard from being listed as an endangered species.

Today, we're having other great successes, but we need to continue and win more. We've helped thousands of landowners protect their private property and local governments protect their local way of life, which leads to greater security for everyone in a community. And we didn't have to go to Washington, D.C. to do it.

We have invested many hours into training citizens and locally elected officials on how to use this strategy effectively. We have spent countless days sitting across the table from the same federal agencies that ran my family out of business advocating the local position.

Those who have learned how to use our process are standing between the federal agencies and the citizens, and preventing situations such as what happened to Cliven Bundy from ever starting.

This is what is so important for you to understand. *Our best opportunity today to protect our land and people is through our local governments.* Local governments have:

Livestock grazing, access to these allotments and property rights have been severely restricted ever since. Kane County, Utah is taking the lead to advocate for the reopening of 16 closed allotments and the return of the maximum levels of grazing within the Monument.

Impossible, you might think. We don't believe so because we've seen what happens when local governments step forward and use their lawful authority to protect the citizens.

Today, more than ever before, we need to push forward.

You need to encourage and support your local leaders to engage in coordination. And, we need you to support our work so that we can be there to lead them through the process.

Our economy isn't what it used to be and our organization has suffered like the rest of the nation. And, that is why we need your help. You can help us by sending a financial contribution today of \$25, \$50, \$100, \$250 or more would greatly help our efforts.

You can also help by encouraging your locally elected officials to learn more about how to coordinate. We have developed a comprehensive, easy to understand, training program, as well as published many articles on the process available on our website. Send them our way and we will show them how to get started in the process.

We cannot ignore what losing the *Hage* case means to all of us. But, we can use every lesson we've learned and use what we now know and have as a golden opportunity to move forward in a strong and more committed way.

# Punishing the Collective for "Crimes" of the Individual Free Will or How the Lies are Created and Continue (don't skip this slide)

## Going Bananas

by miniv8 » Sun Nov 06, 2011 11:02 am

A group of scientists placed 5 monkeys in a cage and in the middle, a ladder with bananas on the top.

Every time a monkey went up the ladder, the scientists soaked the rest of the monkeys with cold water.

After a while, every time a monkey went up the ladder, the others beat up the one on the ladder.

After some time, no monkey dare to go up the ladder regardless of the temptation.

Scientists then decided to substitute one of the monkeys. The 1<sup>st</sup> thing this new monkey did was to go up the ladder. Immediately the other monkeys beat him up.

After several beatings, the new member learned not to climb the ladder even though never knew why.

A 2<sup>nd</sup> monkey was substituted and the same occurred. The 1<sup>st</sup> monkey participated on the beating for the 2<sup>nd</sup> monkey. A 3<sup>rd</sup> monkey was changed and the same was repeated (beating). The 4<sup>th</sup> was substituted and the beating was repeated and finally the 5<sup>th</sup> monkey was replaced.

What was left was a group of 5 monkeys that even though never received a cold shower, continued to beat up any monkey who attempted to climb the ladder.

If it was possible to ask the monkeys why they would beat up all those who attempted to go up the ladder.... I bet you the answer would be....

# About Jack

All federal serial agencies as well as the state and municipals have created an incestuous & infectious monopoly of over control to intentionally deny and limit state Citizens Allodial ownership rights to use their own private & public lands. This has been done using global to local junk "science", defacto laws, junk legislation, UN Agenda 21 and fear, for political power.

Cleve Bundy has the brass balls to start a revolution, this is just the beginning. It is now the US BLM & FWS turn to lose their jobs and property for all the suffering and imprisonment they have caused good people trying to make a hard living off the land.

Those who were behind the Bundy and Hammond takings need to be indicted and serve prison time or better yet serve the Ranchers for free. There is no difference in the management of the IRS and the serial agencies in American government. This is trickle down tyranny by those global to local groups profiting from these takings.

**FreedomForAllSeasons salutes the Trump team in draining this government swamp. Once it is drained, drain it again and again, like washing dirty hands.**
