Urgent Action Alert!

From
Tom DeWeese
American Policy Center

December 19, 2025

Dear Mr. & Mrs. Venrick,

There is a growing drive to enslave us all through technology. Digital ID systems implemented through government and corporations will have the unprecedented power to track, monitor, and control every aspect of your life – from your money and healthcare to your social connections.

Bill Gates, one of the most evil forces behind AI, has threatened that “Digital ID must be accepted by US Citizens by 2028. Otherwise, they risk exclusion from society.”

That means controlling where you can travel. They will monitor who you associate with, what you spend your money on, and what you believe in politically!

In your bank, the move is on to replace cash with digital currency. The account can be closed at any time and the money confiscated – because, in reality there is no money. It’s just pretend wealth controlled at the whim of a government bureaucrat.

And what about the source of your income – your job?

What I’m about to share with you is directly from a report promoting AI.

*“As AI ‘systems become more advanced, they will start to infiltrate various sectors, beginning with white-collar jobs and eventually extending to blue-collar industries.... This shift could lead to a situation where businesses simply don’t need human employees to maintain and increase profits.... One widely discussed solution to the potential job displacement caused by AI is **Universal Basic Income**. This concept involves providing all citizens with a regular, unconditional sum of money to ensure they can meet their basic needs, regardless of their employment status... **the primary means of earning a living – is no longer necessary for many.**”*

Mr. & Mrs. Venrick, this is a drive to slavery. You will have no control over your life. There will be no incentive to create new ideas and products.

Corporations will dictate what products they want to make available

concerning your food, clothes and housing.

There will be no freedom of choice, no hopes, no dreams for your life.

In short, AI is the greatest threat to human society ever conceived!

Today, the most noticeable part of the drive to enforce AI are the massive data centers being built across the country. These are needed to provide the huge databanks of information necessary to enforce AI control.

Each data center covers as much as ten acres or more of ground. Many are built in multiple groups. And most are in and around rural communities.

These centers use massive amounts of water and electricity. Many communities are experiencing shortages and higher costs for both.

Mr. & Mrs. Venrick, why do they use so much energy? Well, according to the AI promoters, *“AI systems analyze massive datasets to learn and improve over time. This requires processors, which consume energy.”*

As AI usage grows to control every aspect of human society more will be needed, and each will use more energy and cover more vital farmland.

So, what is their solution to the growing energy shortage caused by the hundreds of data centers being built? We must **“invest in renewable energy.”**

WIND AND SOLAR!!! That’s their solution. Must I say, as I have been warning for a few years – wind and solar are a joke. They produce nothing for the power grid. In reality, these tech tyrants plan to take your reliable energy sources to maintain their data centers -- and force you to live on wind and solar. In other words – you will have no power.

As the massive data centers are covering the vital farmland they are destroying the very culture of our rural communities – changing their look and feel.

Meanwhile, President Trump has been heard to support the drive for AI. That’s because he is surrounded by AI Masters who are convincing him that we must allow AI to take over every aspect of our society. They tell him it’s vital in order to beat China.

Yes, perhaps there are some military uses for AI, but we cannot Make America Great Again if our personal information, money supply, and private property are not protected! AI must be controlled for our

personal freedom!

We must shout in a LOUD voice NO!! Stop the invasion of AI! And we must make it loud enough that President Trump hears it!!

You can help me raise that voice to him in one of two ways. First, call the White House and leave the message that you oppose his support of AI in our everyday lives. Tell him to support our personal privacy. Here is the White House phone number: Phone # 202-456-1111

Or you can write a message to President Trump through the White House contact page. Use some of the information I have supplied in this Sledgehammer Action Alert. Here is the link: <https://www.whitehouse.gov/contact/>

Mr. & Mrs. Venrick, the good news is that many people have started to rise up in opposition to the growing data centers in their communities. **Stopping the data centers is the first vital goal in stopping the growth of AI.**

Some local folks have had success in blocking them. But many more now need APC to provide them with the tools and tactics to build strong opposition.

It's urgent. Please help the American Policy Center lead the fight to stop the growing AI threat. *This is the greatest threat to freedom you and I have ever faced!*

I must have your financial help to lead this fight! Your support of \$25 is URGENT! If you can give as much as \$50 I can provide help to many more desperate folks working to stop this growing AI threat.

But we must do it now! Please stand with me.

Yours in Defense of America's Precious Freedom!

Yours in Freedom,

Tom DeWeese, President

Yes Tom, I'm with you! I want to help American Policy Center lead the fight to stop the growing AI threat.

() I have enclosed my URGENT contribution for:

\$25 \$50 \$75 My Best Gift \$ _____

Please make check payable to American Policy Center or APC.
APC is a 501c4 non-profit and contributions are not tax-deductible.
See below if you need a tax deduction.

I prefer to donate by credit card in the amount of

\$ _____

Visa MasterCard American Express Discover

Credit Card Number Expiration Date Security Code

Signature _____

Do you need a tax deduction? If so make your check payable to **American Policy Foundation**, a nonprofit, educational organization whose tax-exempt status under IRS section 501(c)(3) has been recognized by the Internal Revenue Service. Your contributions are tax deductible. Corporate contributions may be accepted.

About the American Policy Center

38 Years Leading the Fight for American Property Rights and Sovereignty

The American Policy Center (APC) was founded in 1986 by Tom DeWeese. APC's mission since its founding has been to protect and defend the ideals of limited government intrusion in our lives, as envisioned by our nation's founders. While the concept of freedom, and its protection, involves nearly an endless list of issues, APC believes freedom activists must employ a laser focus on specific key issues to be effective. For APC that issue has become the fight to protect and preserve private property rights.

The American Policy Center is one of the original organizations to expose and fight to stop the enforcement of the United Nation's Agenda 21, and its policy of Sustainable Development. Today that fight carries on against Agenda 2030, The Green New Deal, and the Great Reset, all part of the same international globalist grab for power which is now being implemented on the local levels of our government. When private property rights are protected sustainable development policies cannot be enforced. Local and state elected representative governments have much more power to stop such international and federal power grabs than they realize. APC works to teach these details to local representatives. In addition, APC is teaching local activists around the country to build a permanent infrastructure from which to be instantly ready to take action. We call it building a Freedom Pod in your own community.

The radical NGO Attacks on me have been relentless – but they haven't stopped me – every detail I've revealed has been proven right!

"For 20 years now, Tom DeWeese has been on a jihad against global plans for sustainable development. What to most of us looks like an innocuous and voluntary United Nations-led effort to use our resources more wisely – Agenda 21 – is really "international forces ...turning (American) communities into little soviet."

Southern Poverty Law Center (2013)

"The effect of the fear-mongering fairy tale offered up by DeWeese and other conspiracy theorists has been almost unbelievable. Not only have some counties passed resolutions opposing Agenda 21 (along with the Tennessee House of Representatives), but the Republican National Committee (RNC) in January passed one as well, decrying Agenda 21's "destructive strategies for 'sustainable development'" The RNC recommended that the resolution be adopted as part of the Republican Platform as its August 2012 convention."

Southern Poverty Law Center (2013)

"Are you an environmentalist? Like sustainable growth? Historic Preservation? You'd better watch out for Tom DeWeese. It's hard to keep track of all the crazy coming from the right wing these days. That doesn't mean we can ignore them though."

Wingnut Watch (2011)
