**August 10, 2021 - First Day Mike Lindell Cyber Symposium - Tuesday**

The following Word Document is my notes during this 3 day cyber symposium in Sioux Falls, South Dakota by Mike Lindell the founder of My Pillow.

There was a long movie before my notes on the first day that I had seen in part before and did not take notes. [Link here for the movie](#). Some of my notes may be so short as not to be completely understood without seeing all of the 3 days so bare with me. I could only write so fast and did not capture everything that was said.

### **START OF MY NOTES**

It is against federal law to have tabulators connect to the internet during elections.

- Wi-Fi has hot spots.
- Fire up hot spots can see all connections.
- Politicians have real time access to live votes.
- They can add or take out votes.

The voting equipment, e.g. vote tabulators has communication ports on the equipment or mother board.

One person has complete control over the States of Connecticut, New Hampshire, and New England.

The Secretary of State is ignoring...

Look for a partnership and who they certify is only one.

Look at who they contract to and the state wide registered db.

Mike Lindell's Cyber Team set up a mock election center using real equipment to demonstrate how this equipment and the network can be easily hacked and manipulated. [Link here for a 7 minute demonstration.](#)

### **August 11, 2021 - Second Day - Wednesday**

#### Dr. Frank statements:

There is mountains of evidence that does not make it into the courts.

Political question doctrine for legislature not courts versus...

Detailed case which goes to court.

There were two cases by Dr. Frank and Dr. Helca where evidence was entered into court.

Joe Oltmann and Tech CEO exposed the Dominion fraud is a guest speaker. He was forced out of his company.

There are many reasons why you want to trigger and audit.

- Deviation in Code, in Laws and in Behavior are three.
- Breach in Public Trust is another.

The counties municipal corporations have to keep election 22 months. It is considered public trusted information.

Look at data before and after logs are deleted.

Tina of Colorado, Mesa County is a brave whistle blower.

There is a Breach of Trust by not disclosing, covering up information or destruction of forensic evidence.

- **At this point an audit should be triggered.**

They deleted data in all 50 states; this is a Breach of Trust.

Dominion CEO was absolutely covering up with foreign countries.

There is documentation in several states.

Dr. Frank told Montana Senator Theresa Manzella that there should be a backup of every election device.

[Dr. Douglas C. Frank](#) was a key speaker in the symposium and you can see him in this 56 minute video interview by Mike Lindell after you scan these notes. He was very impressive as were all of the guests.

There were 6 Montana legislators at this symposium! Congratulations Montana you make me proud...finally!

Complete forensic records of all ballot images on all devices are needed.

Those involved in this election cover up are ignoring the law completely.

Judges Moses, 16 years far left family lawyer who marched with her/his family for Antifia May 20, YEAR? colluded with cover up plaintiff was anti Trump, anti police, i.e. they are everything they say they are not!

Eric Truma...sp officer at Dominion and Director of Security and Strategy is tied with Antifia. He stated "don't worry about the election; I made sure Trump won't win".

48 to 50 states were represented at the Lindell Cyber Symposium.

Open source is where data comes from a public access.

Dominion is systematically "updating", i.e. wiping the data on their machines around the country is against the law stating election data must be held secure for 22 months.

Passwords are withheld in Arizona. Password problems in Colorado and hand coded into the code. Company passwords are used by employees for their own personnel passwords.

State language is not consistent. Law language needs to be very definitive.

SB drives shall not be used.

So many loopholes.

Michigan violates 16 laws without prosecution.

Gaps in laws.

One side promoting transparency (the light) versus .....

One side covering up and obligating (the dark)

We need to reclaim the Republic.

D (or P) CAPS being used to remotely access data.

28 states are using the same machines.

Abstract

Americans keep hearing that there is no need to protect against vote fraud, that fraud is either non-existent or extremely rare. We hear that regulations, such as photo voter IDs, are unnecessary and will disenfranchise voters. Yet, the United States is not unique in having this debate. Virtually all of Europe and almost all developed countries require in-person voters to use photo IDs to vote. Indeed, out of Europe's 47-countries, only the United Kingdom hasn't required photo IDs to vote in their entire country, but that is about to change. Similar in-person rules exist for most developed countries. The vast majority of countries ban absentee ballots for people living in their country. While some point out that eight of Europe's 47-countries allow for proxy voting, where you can designate someone to vote on your behalf, the safe-guards used to prevent fraud are generally far more stringent than used for absentee ballots in the US. Other countries have discovered widespread voter fraud when safeguards are not used. They also understand that relying on conviction counts is unlikely to catch the vast majority of fraud that occurs. The question is: why is the US so unique in terms of not guarding against vote fraud?

Secretary of State -

- Void law for contract
- County clerks not complying with outside language
- Dominion says they would pay for legal (e.g. of county...)
- Dominion can walk into anywhere they want.
- The need to invoke the power of the court to use force.

We are not holding them accountable of crimes impacting hundreds of millions of people.

System is fundamentally broken and compromised.

Get a copy of the Dominion/ESS contract & maintenance activity from your local county.

The county election people are public servants.

Removing the battery from the election equipment is not in the Prevention Maintenance Contract.

Maricopa County AZ is leading the way for voting reform.

America needs to get away from these connected voting machines.

We need to go back to paper secured ballots that cannot be copied and where we have actual auditable tracks.

There are no audit trails now.

The cost of a full forensic audit is between \$4/ballot to \$7/ballot.

Only 5% of the infrastructure bill is going to infrastructure. i.e. if they can pass a trillion dollar for "infrastructure" they can fund state election audits for all 50 states. The cost for integrity is worth it, i.e. whatever it takes.

What is the cost if we do not do full audits, i.e. we lose our freedom and liberty.

What is the next step/road map after audits?

40 million have view the Mike Lindell Cyber Symposium at this time.

- Get rid of electronic voting machines.
- Understand interaction.
- Not all technology is good.
- This problem is created by government and Homeland Security.

Shane Skinner next speaker talks on how the historical statistical bell weather predictive measures showed Trump would win.

- [There were 8 million excess Biden votes quoted by Shane Skinner.](#)
- Trump bell weather historically predictive districts/counties voted 18 to 1 Trump.
- OH, IA, FL and NC since 1896 were 100% accurate predicting who would win a presidential election, i.e. mixed demographics.
- Since 1892 no incumbent has gained votes and lost reelection.
- Speaks on registration trends, e.g. Pennsylvania from 2016 to 20 gained in registration 21:1

### **Next Speaker Drazza (sp) Tech speaks on how the votes were manipulated**

- Explains how predefined set points in the electronic voting work like cruise control on an automobile.

- An algorithm controls how many votes go to Trump and Biden.
- The algorithm looks at all the votes available in the state/county including dead voters, illegal voters, registered voters, duplicate voters as in the same ballot scanned in multiple times, et al and systematically redistribute the votes to a pattern that is close to the actual vote but enough to throw the vote to the desired candidate desired, i.e. Biden in this case.
- This application was used in 30 states showing these changes with very close to the same differences.
- The Florida vote using time base data was predefined to go to Biden. One million votes were taken from Trump however, Trump still won that state.
- In this state they could not drive/manipulate the votes enough because they ran out of names to use, i.e. the fraudulent votes, excess votes, duplicate votes, illegal votes, voters who moved, et al.
- The votes were manipulated as the votes came in using this algorithm to lean the state vote count more to Biden and less to Trump.
- They wanted Florida to go to Biden because it was more of a Trump state as Trump has a home there, i.e. Psych Operation.
- Thus it was a long time to call Pennsylvania State to reset the algorithm and initial set point and trend.
- They used 2010 voting patterns

Note: Mike Lindell at the end of the symposium on August 12, next day went through every states actual vote versus the reported vote and show how in all states Trump recorded votes were reported lower than his actual and conversely how Biden's recorded votes were higher than his actual. Cyber teams were able to back out the effect of the algorithms influence on each states votes to determine the real vote for Trump and Biden had the election not been manipulated.

**Next Speaker Captain Telsa (sp) speaks on voting registration trends.**

- Here is my sketch of one graph he displayed showing the common pattern they found in some 30 states of the how the votes came over time and then leveled off along some pre set point line.

- There appeared to be a similar ratio of the Trump/Biden vote also indicating a manipulation of the vote.
- There was also indication of pre approval of voting margins, similar patterns and trends.
- There was an infusion in the voting system to all states.
- There appeared to be a distributed control giving a certain percentage to each state as in a synchronized voting control.
- Dr. Douglas C. Frank wrote a book on how he thinks this fraud was designed.
- He also appears on an interview with [Truth & Liberty Coalition](#) May 31, 2021. He is introduced as a "died in the wool liberal". Dr. Frank has been modeling elections since he was a kid of 14 I think he says.
- At least a dozen independent sources confirmed the discoveries of Dr. Frank.

### August 12, 2021 - Third & Last Day - Thursday

**Maricopa County AZ Panel Speaking**

- Must return to paper ballots and hand count - 2 AZ Senators.
- Dominion is suing over 200 people using threatening letters.
- Alan Dershowitz attorney for Mike Lindell speaks via Zoom.
- Demand your state open up their machines for inspection.
- Last night, August 11, 2021 another house was raided.

**Next session speaks on Voting Networks with Jazza Smith and Mark Cook.**

1. Within 10 minutes two people in the audience intruded and modified the password on the network.
2. Security is not updated on voting equipment, i.e. years out of date.
3. Voting security does not meet credit card security standards.
4. Nor PCI compliance.
5. Nor Firewall standards.
6. Nor Encryption standards.

- Election judge or sheriff not allowed to see election equipment.
- Weak to no certification of the voting equipment being checked.
- There are remote management cards on the voting equipment.
- i.e. IDRAT, a remote access card, CVE - Common Vulnerability Search Errors
- There are known vulnerabilities.
- One can easily purchase online tool kits to test and hack vulnerabilities.
- A voting related company Disparatee (sp) has been implicated.

- There are lots of back doors in cheap chips on the market used temping voting equipment users to go the cheap route and then have serious intrusion problems later and having to call cyber experts to come in and analyze the problems.
- Evidence of county election departments ordering more printed ballots than registered voters.
- One printing company was even mailing the ballots to the "voters".
- Serbia coders (enterprise partner) used by Dominion which was also used by the Bank of China Wahway was building the code.

### **Next speaker Joe Oltmann - Tech CEO**

- ES&S employees going into politics and then getting into election departments and then the county goes blue.
- There are mountains of evidence that voting fraud is real existing.
- There has been a massive fraud on the American people.
- There is a preponderance of coincidences - boxes of evidences.
- The server is the repository for all reports about the county and is the control brain.
- There are three key areas to detect election fraud, the law, the code and the behavior.
- Any deviation in one or all of these three from state to state is legal reason enough for lack of trust to invoke a state wide full election audit.
- There are thousands of affidavits testifying under oath fraud happen.
- It is a 5 year prison sentence for lying under perjury.

- Why are we letting our election system being run by foreigners?!
- Advocate for a system that restores our Constitutional Republic.
- 5% of the 1.2 trillion only going to infrastructure while all 50 states election system is allowed to go rotten.

### Mike Lindell The Voice of Free Speech – Absolute Interference - My Notes

- See the pattern of Population, Voter Registration versus Ballots counted in the above two graphs.
- 1) The blue line is the population by age in Hamilton County Ohio from real data from the US Census.
  - 2) The black line is “registered voters” in that county showing nearly everyone registered.
  - 3) **ISN'T THAT ODD? WAIT A MINUTE THAT CANNOT BE TRUE!**
    - Most of the time only 70 to 80 % of a local county voters register!
    - This pattern of voter registration appears to be machine generated as it is too correlated to the population.
  - 4) This is the work of Dr. Douglas E. Frank shown in the Mike Lindell 3 day series covering the second documentary exposing additional evidence proving foreign interference in the U.S. 2020-2021 elections.
  - 5) He found this same pattern over and over in other states. His work is still in process.
  - 6) From what I understand being said here is that this has been going on since at least 2008.
  - 7) At 40:40 Minutes/seconds into this [documentary](#) you can listen to how Dr. Frank discovered the machine algorithm manipulating one election of one Congress women in Pennsylvania.

### Other Examples of Government Fraud

- 1) We also know that both Obama & McCain were allowed to run for president and both were ineligible as they were not natural born Americans as required by the U.S. Constitution.
  - o John McCain was born in Panama by two American parents and is not technically natural born.
  - o Gary Kreep, Attorney and United States Justice Foundation filed a brief with the California 3<sup>rd</sup> Appellate Dist. Court of Appeal arguing that CA State elections officials not the U.S. Congress had the duty to verify Mr. Obama's eligibility for the 2008 presidential ballot. [Link](#)
  - o There were multiple challenges to Barack Obama's eligibility including Dr. Orly Taitz, Esq. Great Patriot. [Link](#)
  - o Barack Obama admitted in this video he was born in Kenya. [Link](#)
  - o I have years of research proving Barack Obama, aka Barry Soetoro is NOT an American Citizen. [Link](#)
  - o Yet the courts did not intervene then either! How could this happen?
- 2) The RNC and the DNC colluded to not fight each other on this point so they could both run two illegitimate presidential candidates approved by the globalists and Deep State.
- 3) We know that President Carter was stunned he could not pick all his own cabinet.
- 4) We know that the so called Federal Reserve is not a federal agency, i.e. it is private central bank cartel.
- 5) We know that there is no federal laws requiring you have to pay taxes on your wages or pensions.
  - o Special IRS Agent Joe Bannister proved this in court, he pays no taxes.
  - o This sets precedence for every wage earner, why is this not enforced.
  - o If no federal laws require taxing wages & pensions there can be no state laws as state constitutions are subordinate to the U.S. Constitution.
- 6) We know that the 16<sup>th</sup> Amendment was not legally passed and is fraudulent.
  - o Bill Benson and M. J. Red Beckman proven this also beyond a reasonable doubt in their two volumes of research, "The Law That Never Was", Volume 1 and 2. Here is 17 years of research corroborating this. [Link](#)
- 7) We know that the 14<sup>th</sup> and 17<sup>th</sup> Amendments were also fraudulent.
- 8) I know that the two State of Washington constitutions are fraudulent. [Link](#)
- 9) Why don't the high courts' enforce the founding and fundamental laws?
- 10) The reason why is the courts are part of the problem, they go along to get along.
- 11) We have learned this over and over throughout history however, we cannot fathom this!
- 12) The body of the government is terminally ill and THEIR cancer is contagious by their actions.
- 13) All Presidents have been bought off by the cabal except Eisenhower, Reagan and Trump!

**Open Your Mind to Change - A Guidebook to the Great Awakening by Martin Geddes**

- Certain sections of this 48 page writing is a great read and I will point those sections out.
- Even though this author was wrong in his prediction of the Trump election as he underestimated the power of the dark side, see below, he had the right idea.
  - 1) The vast election fraud backed by the Chinese Communist Party (and other enemies) cannot be allowed to result in a puppet government in the United States. A combination of the Insurrection Act of 1807, Executive Directive 51, [Executive Order on September 12, 2018](#) plus the 14th Amendment mean that Job Biden has a 0% chance of becoming President.
- Download this document [here](#).
- Read the following Sections: **The Storm, Crossing The Schism, Death Of A Supermafia, Coronagate, The Wars of Perception of Heaven and Hell and The Digital Coup and The Great Exposure.**
- You will find that Martin Geddes outlines the transnational criminal cartel that is being exposed in the Mike Lindell Cyber Symposium notes above.
- Most these findings folds into my research over the last 17 years plus my Grandfather's research in the early 1950's. These findings are addressed in detail on my web site [www.freedomforallseasons.org](http://www.freedomforallseasons.org).
- Here are some quotes I extracted from Mr. Geddes document.
  - 1) A deeply embedded crime network has had effective control over the US DOJ, FBI, and CIA — as illustrated by the Clintons' magical escapes from justice. A similar purge of corruption and taming of the Federal Reserve was attempted under JFK; it failed. The protection that the President needs can only come from a loyal military
  - 2) Evil uses the authority principle to condition people to obey without questioning what, why or whom they are obeying. **Destroying your identity to gain power over you is the modus operandi of evil.**
  - 3) To question the veracity of the mass media in the present is not some radical proposition: it is basic common sense, grounded in overwhelming historical evidence. These failed media institutions are primarily agents of lawless power, not individual liberty.

- 4) There is essentially *no* truly independent mass media in the United States at present. The corporate media is in the business of *power and control over you*, **not truth to hold power to account**. They achieve this by defining — in an Orwellian sense — what the very nature of truth is. To them, “truth” is whatever *authority tells you it is*. Anyone who rejects their **authority to define reality** — and asserts their sovereign right to think for themselves — is ridiculed and ostracized.
- 5) That the public gorge themselves on comforting lies, much as they do with junk food, is well known. A quote (mis?)attributed to John Swinton, former Chief of Staff of the New York Times from c. 1880,
- 6) “Most of the time, we see only what we want to see, or what others tell us to see, instead of really investigate to see what is really there. We embrace illusions only because we are presented with the illusion that they are embraced by the majority. When in truth, they only become popular because they are pounded at us by the media with such an intensity and high level of repetition that its mere force disguises lies and truths. And like obedient schoolchildren, we do not question their validity and swallow everything up like medicine. Why? Because since the earliest days of our youth, we have been conditioned to accept that the direction of the herd, and **authority anywhere — is always right.**”  
The fight between false external *authority* (like the corporate mass media) and the divine right to *decide for ourselves* (as we are self-sovereign) is the essence of this everlasting spiritual war. It is an endless fight against deception, infiltration and subversion that demands obedience. We are always having our spiritual, cultural and political beliefs manipulated by powerful psychopaths. Our identity is hijacked for *their* benefit — and *our* enslavement.
- 7) That the public gorge themselves on comforting lies, much as they do with junk food, is well known. A quote (mis?)attributed to John Swinton, former Chief of Staff of the New York Times from c. 1880, runs:  
*There is no such thing, at this date of the world’s history, in America, as an independent press. ...If I allowed my honest opinions to appear in one issue of my paper, before twenty-four hours my occupation would be gone. The business of the journalists is to destroy the truth, to lie outright, to pervert, to vilify, to fawn at the feet of mammon, and to sell his country and his race for his daily bread. You know it and I know it, and what folly is this toasting an independent press? We are the tools and vassals of rich men behind the scenes. We are the jumping jacks; they pull the strings and we dance. Our talents, our possibilities and our lives are all the property of other men. We are intellectual prostitutes.*  
To question the veracity of the mass media in the present is not some radical proposition: it is basic common sense, grounded in overwhelming historical evidence. These failed media institutions are primarily agents of lawless power, not individual liberty.
