

ELECTION FRAUD IN AMERICA

- A NATIONAL DISGRACE

CONTINUOUSLY UPDATED

1/15/2022

www.FreedomForAllSeasons.org

“Do not say that I am deceiving you today. The fact is that it’s necessary for me to speak before you, and therefore sow seeds of confusion in your minds. If a true seer should see what I am doing, what a laughing stock I would be in his eyes. But now there is no escape from it.”

Wu-Men
Little Zen Calendar

Page 1 of 110

Abstract

My mission in this research report is to present enough evidence from the last 2020-2021 election and then some to establish beyond a reasonable doubt for a reasonable open minded American that there was substantial proof of significant election fraud as to change the outcome.

I have for the most part, gathered hard evidence from experts who have presented undeniable evidence that something happened and it happened very quickly at precise times.

Fraudulent election and other behavior of too many municipals and states have been well documented. In this 2020 – 2021 election hundreds of election witnesses have come forward testifying of the mishandling of votes, ballots not folded, multiple copying of the same pack of votes, truck loads of votes brought in at late night hours unsecured, mail in ballots without signatures or using the same signature, suitcases of votes brought out under tables in secure municipal vote counting areas after everyone is told to go home, muni vote room windows being covered, observers being turned away, strange counts coming out of voting machines, voting official swearing under oath they know the Dominion CEO was lying, China funding and hacking of our election machines, tens of thousands of ballots “received” the day before they were mailed, courts refusing to hear the evidence or the cases because of “lack of standing”, unending examples of nearly paranormal statistical aberrations obviously showing vote manipulation go unchallenged and largely unreported by the MSM and Big Tech giant social media.

This report will not only give a reasonable American reasonable doubt, it will give you so many hard cases of the 2020 – 2021 American Presidential race election fraud that the villains will start to appear.

Montana election fraud data is found on Pages 58, 59, 78, 83, 84, 90, 91 & 95. ES&S findings on Page 10 & 11.

Absolute Proof

This is a 2 hour documentary interviewing 9 witnesses re. the 2020 election fraud hosted by Mike Lindell, Pillow Man/\$300 millionaire.

Those being interviewed are:

- 1) Phil Waldron a retired U.S. Army colonel (information warfare),
- 2) [Russell Ramsland \(cyber forensics security Allied Security Ops Group\)](#),
- 3) Dr. Shiva (4 degrees, inventor, businessman),
- 4) Patrick Colbeck (former Republican Michigan Senator),
- 5) Melissa Carone (Michigan IT contractor and whistle blower),
- 6) Matt DePorno (Michigan Attorney Law Office – www.depernolaw.com)
- 7) Mary Fanning (Journalist and Author National Intelligence Research)
- 8) Major General Thomas G. McInerney (Army & Air Force Assistant Vice Chief of Staff Hdq U.S. Air Force Wash. D.C.)
- 9) Terry Turchie (Author & FBI counter terrorism division)

Some of my notes taken watching “[Absolute Proof](#)”

- 1) USA has also been changing votes in other countries.
- 2) Diebold 2002 version page 2-127 gives instructions for changing votes X times (@ 55 minutes)
- 3) Government tells corporations what to do.
- 4) The Zuckerberg Effect – funding of election operations prompts litigations
- 5) Algorithms are the crime scene.
- 6) Slow down in middle of election night.
- 7) In 27 hours all votes for Joe Biden, no Trump vote, to unusual
- 8) Melissa Carone told her boss there was a problem, boss said “I don’t want to hear you have a problem....”
- 9) 7060 votes were flipped from Trump to Biden by the voting machines
- 10) Failure to follow proper voting procedures of recording the votes
- 11) CEO Dominion was lying
- 12) 68% error rate goes to an adjudicated ballot which allows someone else to determine vote.
- 13) Machine results don’t match with real votes
- 14) Michigan AG threats any attorney who challenges their voting results with disbarment
- 15) “Biggest cyber attack on America in history” – Mary Fanning
- 16) 2900 muni’s were cyber attacked. (I think is county municipal corporations vs. city muni’ may be wrong?)
- 17) The FBI knew our election machines were open for hacking.

Security Analysis of the Diebold [AccuVote](#) -TS Voting Machine – The Feldman Study Princeton University

Center for information Technology Policy and Dept. of Computer Science, Princeton University Woodrow Wilson School of Public and International “Affairs, Princeton University.

[Click on title to this 45 page research study](#)

Abstract

“This paper presents a fully independent security study of a Diebold AccuVote-TS voting machine, including its hardware and software. **We obtained the machine from private party.** Analysis of the machine, in light of real election procedures, shows that it is vulnerable to extremely serious attacks. For example, an attacker who gets physical access to a machine or its removable memory card for as little as one minute could install malicious code; malicious code on a machine could steal votes undetectably, modifying all records, logs, and counters to be consistent with the fraudulent vote count it creates. An attacker could also create malicious code that spreads automatically and silently from machine to machine during normal election activities—a voting-machine virus. We have constructed working demonstrations of these attacks in our lab. Mitigating these threats will require changes to the voting machine’s hardware and software and the adoption of more rigorous election procedures.”

[The Market for Voting Machines Is Broken. This Company Has Thrived in It.](#)

“Urosevich later left ES&S in the hands of his first hire, his brother Todd, and went to run Global Elections Systems, the voting machine arm of Diebold, a major security and financial technology company.

In 2003, **Diebold’s** CEO caused a controversy when he became a top fundraiser for George W. Bush and promised to help Ohio “deliver its electoral votes to the president.” While there is no evidence the CEO actually manipulated his company’s machines to alter the vote in Ohio — it went for Bush — the dispute and a host of issues involving the effectiveness of its technology led Diebold to sell off the voting business in 2009.

ES&S purchased many of Global Elections Systems’ machines and contracts, and, as a result, it controlled some 70% of the voting technology market at that time.

ES&S and the other two major companies — **Dominion, which has about 30% of the market,** and **Hart InterCivic, which has about 15%** — have similar business models. Each has a large sales force that pushes its products, services and maintenance help to counties across the country. Comparatively little of their workforces are devoted.

4.2 Stealing Votes (Continued from above - Diebold Voting Machine -The Feldman Study)

“Several of the demonstration attacks that we have implemented involve installing code onto AccuVote-TS machines that changes votes so that, for a given race, a favored candidate receives a specified percentage of the votes cast on each affected machine. Since any attacks that significantly alter the total number of votes cast can be detected by election officials, our demonstration software steals votes at random from other candidates in the same race and gives them to the favored candidate. The software switches enough votes to ensure that the favored candidate receives at least the desired percentage of the votes cast on each compromised voting machine.

Election results (i.e., the record of votes cast) are stored in files that can be modified by any program running on the voting machine. The primary copy of the election results is stored on the memory card at \StorageCard\CurrentElection\election.brs and a backup copy is stored in the machine’s on-board memory. While Diebold sells special-purpose memory cards for use in the machine, we were able to substitute a Compact Flash card (typically used in digital cameras) and a Compact Flash-to-PC Card adapter flash memory at \FFX\AccuVote-TS\BallotStation\CurrentElection\election.brs. Our software modifies both of these files.

Our demonstration vote-stealing software is implemented as a user-space Windows CE application written in C++ that runs alongside Diebold’s Ballot Station application. Since our software runs invisibly in the back-ground, ordinary users of Ballot Station would not notice its presence. It is pre-programmed with three parameters hard-coded into the binary: the name of the race to rig, the name of the candidate who is supposed to win, and the minimum percentage of the vote that that candidate is to receive.

Alternatively, an attacker could create a graphical user interface that allows more immediate, interactive control over how votes would be stolen. We have also created a demonstration of this kind of attack. In practice, a real attacker would more likely design a vote-stealing program that functioned invisibly, without a user interface.

Our demonstration vote stealing applications can be generalized to steal votes on behalf of a particular party rather than a fixed candidate, to steal votes only in certain elections or only at certain dates or times, to steal votes only or preferentially from certain parties or candidates, to steal a fixed fraction of votes rather than trying to ensure a fixed percentage result, to randomize the percentage of votes stolen, and so on. Even if the attacker knows nothing about the candidates or parties, he may know that he wants to reduce the influence of voters in certain places. He can do this by creating malicious code that randomly switches a percentage of the votes, and installing that code only in those places. Any desired algorithm can be used to determine which votes to steal and to which candidate or candidates to transfer the stolen votes.

4.2 Stealing Votes (Continued from above - Diebold Voting Machine -The Feldman Study)

Every time a new memory card is inserted into the machine, our demonstration vote stealing software looks for an election definition file on the card located at \Storage Card\CurrentElection\election.edb and, if one is present, determines whether the current election contains a race it is supposed to rig. If no such race is found, the software continues to wait. If a target race is found, it searches that race for the name of the favored candidate. Upon finding that the preferred candidate is on the ballot, the software proceeds to poll the election result files every 15 seconds to see if they have been changed.

If the demonstration vote-stealing software successfully opens the result files during one of its polling attempts, it first checks the result files' headers to see whether the machine is in Election mode. If not, the attack software does not change any votes. This feature ensures that the software would not be detected during Logic and Accuracy testing, which occurs when the machine is in Pre-Election Testing mode. The software could be further enhanced so that it would only change votes during a specified period on Election Day, or so that it would only change votes in the presence or absence of a "secret knock." A secret knock is a distinctive sequence of actions, such as touching certain places on the screen that an attacker executes in order to signal malicious software to activate or deactivate itself.

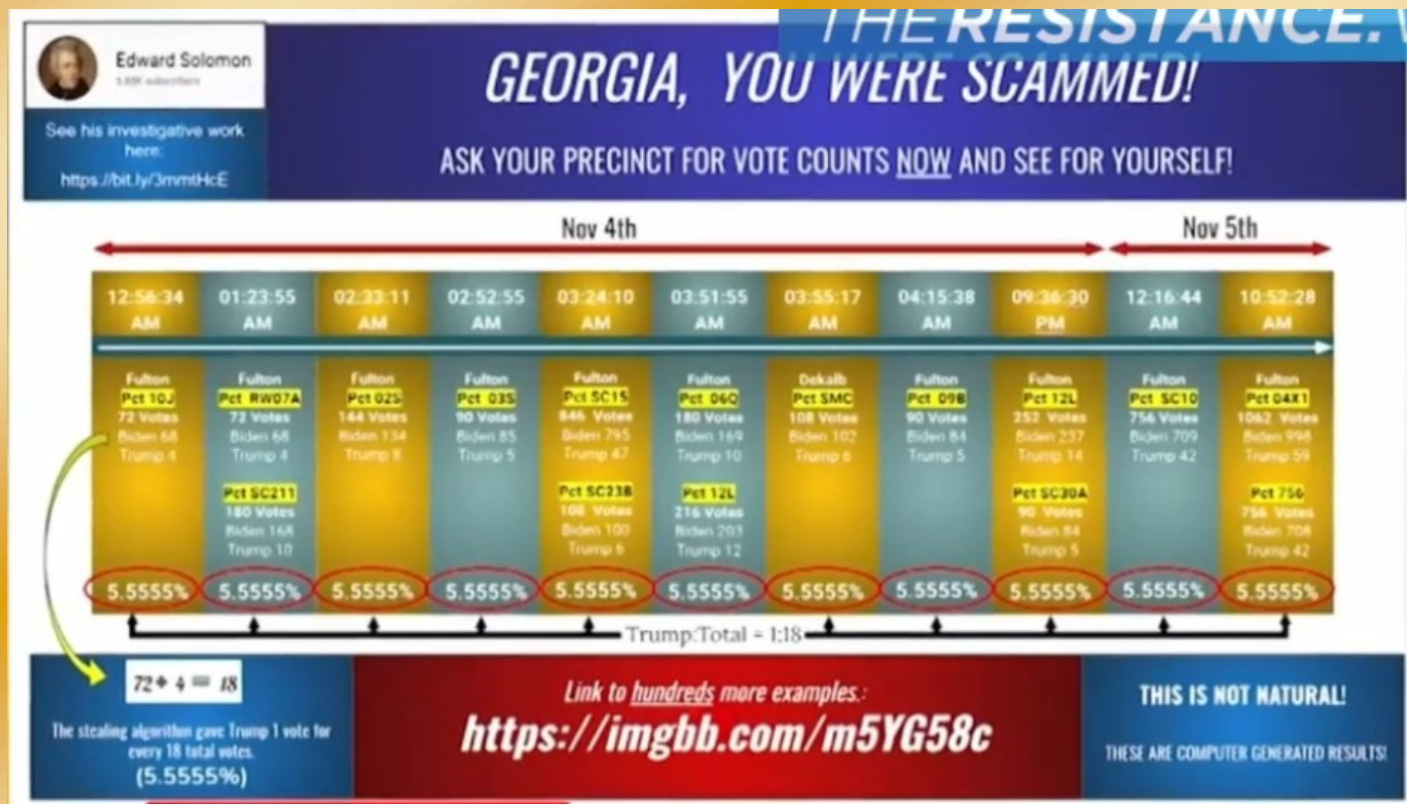

If the machine is in election mode and the demonstration vote-stealing software successfully opens the result files, then the software checks whether any new ballot have been cast since the last time it polled the files. For each new ballot cast, the software determines whether the race being rigged is on that ballot, and if so, determines whether the corresponding result record contains a vote for the favored candidate or for an opponent. The software maintains a data structure that keeps track of the location of every result record that contains a vote for an opponent of the favored candidate so that it can come back later and change some of those records if necessary. Since each result record is only labeled with the ID number of the ballot to which it corresponds, the software must look up each record's ballot ID in the election definition file in order to determine which candidates the votes in the record are for.

Once it has parsed any newly cast ballots, the software switches the minimum number of votes necessary to en-sure that the favored candidate gets at least the desired percentage of the vote. The vote-stealing software chooses which votes to switch by selecting entries at random from its data structure that tracks votes for the opponents of the favored candidate. After the necessary changes have been made to the result files, the software closes the files, resumes the Ballot Station process, and continues to wait in the background.

The steps described above are all that is necessary to alter every electronic record of the voters' intent that an AccuVote-TS machine produces. Several of the machines supposed security features do not impede this attack. The so called "protective counter," supposedly an unalterable count of the total number of ballots ever cast on the ma-chine, is irrelevant to this attack because the vote-stealing software does not change the vote count. "

Mathematician Says Biden Election Win is A Statistical Impossibility in Georgia.

- This algorithm allows 1 vote for Trump out of 18 votes, i.e. $1/18 = 5.5555\%$ of the vote.
- The bars (graph below) show vote counts coming in during Nov. 4th & 5th with the time of day on top.
- These bars represent different precincts in a county being counted in Georgia as described by Mr. Solomon.
- See the total vote count on bar 1 (left) as 72 votes counted with Biden receiving 68 and Trump 4.
- $4 \text{ Votes} / 78 \text{ Votes} = 5.5555\%$ which is exactly what the algorithm was programmed to deliver.
- This is 11 different time samples from voting records showing all had exactly the same 5.5555% allocation for Trump.
- This is a statistical impossible event with odds so high against the likelihood they are uncountable.
- Listen to this 3.5 minute interview to understand and believe this.
- [This is exactly what the Princeton U. study found analyzing the Diebold AccuVote-TS Voting Machine \(Pg. 6-7\)](https://www.youtube.com/watch?v=3mmtHcE)

 - “Smartmatic Voting technology which was a pioneer in the transmission of voting data over the internet.
 - Smartmatic created this voting technology in part for President Chavez of Venezuela. Dominion and Smartmatic did business together and this equipment has the same fundamental flaws allowing multiple opportunities to corrupt the data masking the process in a way the average person cannot detect any fraud or manipulation.
 - The fact that the voting machine displays a voting result that the voter intends and then prints out a paper ballot which reflects that change does not matter.
 - It is the software that counts the digitized vote and reports the results. The software itself is the one that changes the information electronically to the result that the operator of the software and vote counting system intends to produce that counts.
 - The software itself configures the vote and voting result changing the selection made by the voter. The software decides the result regardless of what the voter votes.”

U.S.A. Election Voting Machine Ownership – Part 1

This table below I put together based on testimony of Mellissa Carone, (pg. 10), **Security Analysis of the Diebold AccuVote - TS Voting Machine – The Feldman Study** by the Center for information Technology Policy and Dept. of Computer Science, Princeton University (pages 6-8) and 16 years of my life in serious research to awaken myself to this truth.

- # It is obvious that two corporations are controlling the America voting machines.
- # According to new information Dominion acquired ES&S in 2010.
- # ES&S has acquired Diebold under its new name Premier Election Solutions.
- # It is also obvious that the tricks used by one are used by all in some form or fashion.
- # It is also interesting that #7 Unisyn Voting Solutions is a division of a lottery corporation.
- # This thread of evidence suggests the most sacred of America Republic individual independence, individual and state sovereignty is not as sacred as we think.
- # The global elite have created a Swamp of the Deep State, transnational & national corporations, lobbies, “non-profit” corporations.
- # Your vote is turned into the desired political truth, i.e. a LIE.

Number	Registered Election Voting Machine Manufactures	Estimated Percent of the Voting Control - Relative Order of Magnitude (ROM)	Silent Partners - (ROM)
1	Clear Ballot Group, Inc.		
2	Dominion Voting Systems Corp	30%	X
3	Election Systems & Software, Inc (ES&S)	70%	X
4	Hart InterCivic, Inc.	15%	
5	MicroVote General Corp.		
6	Smartmatic USA Corporation		
7	Unisyn Voting Solutions (a division of International Lottery and Totalizator, Inc)		
8	VotingWorks		
	Relative Order of Magnitude Total	115%	100%

U.S.A. Election Voting Machine Ownership – Part 2

They think they are above the law: the firms that own America's voting system

- The companies are privately owned and closely held making information ...difficult to obtain.
- The software and hardware design are kept as trade secrets....difficult to investigate.
- Market for election vendors is small and competition is fierce resulting in near monopolies.
- Computing security firms have been raising the red flag on voting machines since punch card disaster of 2000.
- Mueller's report and prior indictment of 12 Russian agents confirm they targeted private election vendors.
- Intel agencies expect more cyber attacks to continue.
- Federal funding helped spread voting machines in 2003.
- Computer scientists & academics have been buying voting machines and hacking them to force transparency.
- Voting machine companies have sent litigation threats to academics researching their machines.
- Georgia's governor was overseeing his own election while his Secretary of State appointed an ES&S lobbyist as his deputy Chief of Staff while the state is purchasing \$150 million more of the machines!
- There are no technical standards from the US government on voter registration security.
- Dominion Voting Systems operates in the U.S. and Canada.

Election Fraud is More Common Than Not

 - Dated December 14, 2020 & Updated January 11, 2021
 - 1 hour and 32 minutes video documentary
- [A Statistics Lesson to Save the Republic](#) by Bruce
 - Voting patterns are consistent across parties.
 - For Republican States the Standard Deviation is 5.4 to 5.7
 - For Democrat States the Standard Deviation is 9.07 to 9.1
 - That is 1.5+ more variability in the Democrat States voting.
 - That amounts to 86.22% chance AGAINST that event happening.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 1

- Click on the this 16 minute Rumble video
- Key summary of this video follows via image capture.

 Patriot Intel Report · Published February 9, 2021 · 324,487 Views

In Arizona 22,093 mail in ballots were “received” the day BEFORE they were mailed.

In AZ 33,400 illegal immigrants were estimated to have voted.

In GA, after the recount, the original numbers were used to certify the results. Even though the recount had differing results.

Thousands of citizens filed affidavits under oath, (under penalty of perjury) asserting irregularities and illegal activities in voting places.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 2

Contrary to MSM claims, many cases filed by Republicans and/or private plaintiffs in courts around the country were not “lost.” In most cases the courts refused to even hear the evidence, or the cases were dismissed because of “lack of standing.” No court had all the evidence because new data arose daily.

Sudden and sharp vote dumps for Biden in battleground states were systematically larger than other vote dumps that came into other states, making them especially crucial for swaying election outcomes in the respective states.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 3

No sitting president in 132 years has ever gained votes between his first and second race and lost re-election.

Trump won at least 11 million more votes in 2020 than in 2016, including the highest percentage of the non-white vote of any Republican candidate in 60 years (making significant gains among African-American, Latino, Jewish and even Muslim voters), yet allegedly lost.

Despite Biden allegedly receiving 15 million more votes than Obama did in his 2012 re-election, the democrats lost 13 house seats.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 4

Biden underperformed Hillary Clinton's 2016 vote in every major metro area, yet somehow outperformed her in the major swing state cities of Milwaukee, Detroit, Atlanta and Philadelphia.

Biden also allegedly won despite having received a record low share of the Democrat primary vote, while Trump set a record for primary votes for an incumbent – 18 million primary votes, doubling the previous record, set by Bill Clinton.

Trump is one of only five incumbents to win more than 90% of the primary vote since 1912.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 5

No incumbent who has received at least 75% of the primary vote total has ever, until 2020, lost re-election.

In Pennsylvania, only 19% of the vote additions favored Trump from November 4th through November 7th.

Moreover, the integral of all vote update differences in this time range results in 578,014 votes for Biden with and only 3,290 for Trump.

McCandless precinct in Allegheny County, PA, had a ratio of 86 Democrat votes to every 14 Republican votes in 2020, but in 2016 the same county had 47 Democrat votes for every 53 Republican votes.

An obvious severe departure from statistical norms.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 6

In Arizona 22,093 mail in ballots were “received” the day BEFORE they were mailed.

In AZ 33,400 illegal immigrants were estimated to have voted.

In GA, after the recount, the original numbers were used to certify the results. Even though the recount had differing results.

Thousands of citizens filed affidavits under oath, (under penalty of perjury) asserting irregularities and illegal activities in voting places.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 7

A Georgia polling manager testified that stacks of hundreds of “mail in” ballots that were tallied, were on perfectly flat “pristine” paper that had never been folded.
(If a ballot is really mailed, it has to be folded in two places to fit in the envelope.)

Georgia’s Secretary of State Brad Raffensperger, without legislative approval, unilaterally abrogated Georgia’s statute governing the signature verification process for absentee ballots.

A sworn affidavit from mathematical analysis of the publically available vote update data showed that:

Unmasked: Have we uncovered the truth about the 2020 election? - Part 8

“The repetition of the many different ratios transferring simultaneously across many different precincts located many miles away from each other strongly demonstrates a clear, intentional, deliberate manipulation of the votes completed via software.”

In AZ, 2,000 voters were “registered” to a vacant lot.

In the Antrim Michigan forensic report of the audit of Dominion Voting System tabulator machines software, it was found that someone had attempted to zero out all election results at 13:53:09 on Nov 21st.

This is a clear and unchallenged example of direct tampering with evidence.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 9

Arizona election law states that “procedures shall allow party observers to effectively observe the election process.”
But many Republicans were escorted from the building by election officials when they protested the illegal situation of not being allowed to effectively observe the process.

Lastly, the same party that told us the 2016 election was stolen by Russia, and warned us of election fraud by use of electronic voting systems, now says the integrity of this election was unsurpassed and it’s impossible to steal an election.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 10

“The price of liberty is eternal vigilance.”

Thomas Jefferson

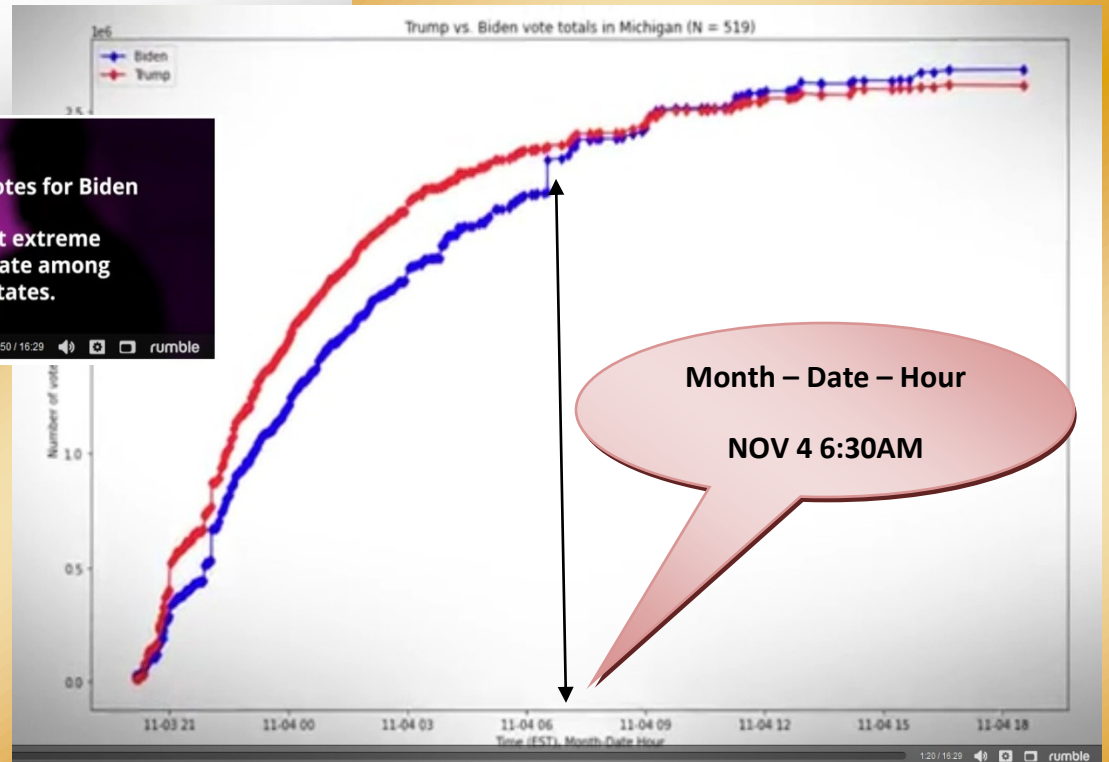

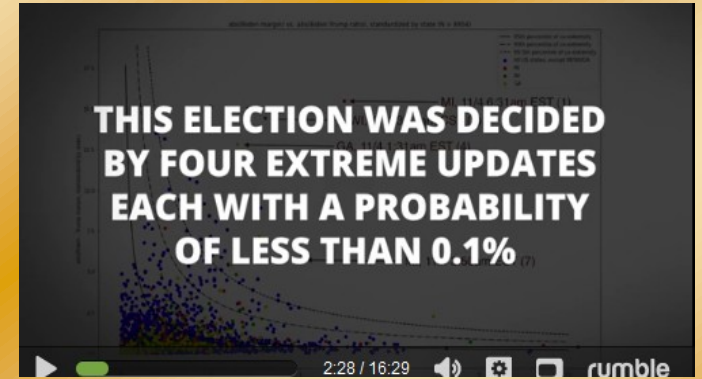

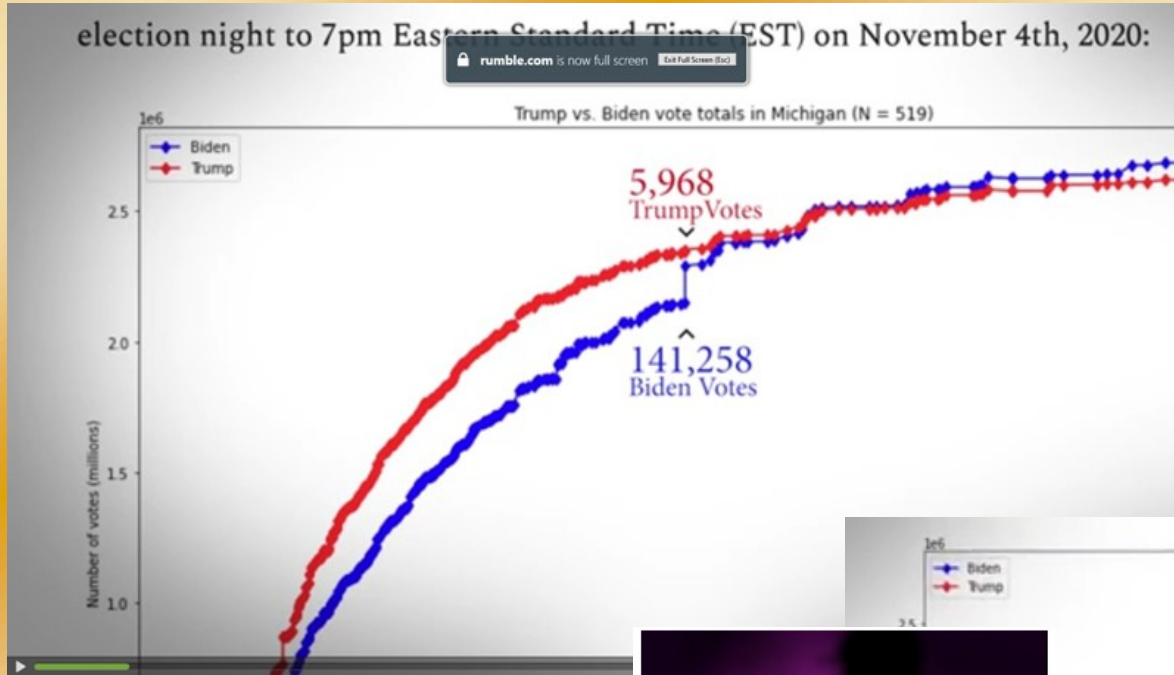

If this election was compromised, and domestic and foreign interference altered the outcome, then the millions of voters and lawmakers all across the country peacefully calling for election integrity, are courageous, patriotic AMERICANS simply calling for the truth we all deserve.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 11

Guess why so many 90 year old Americans registered in these Democratic Counties in 2020? i.e. fraudulent votes

Unmasked: Have we uncovered the truth about the 2020 election? - Part 12

These extreme updates spiking votes occurred in all states most obvious in Michigan, Wisconsin, & Georgia at odd hours.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 13

- Out of 9000 updates this election was decided by ONLY 4 EXTREME UPDATES.
- See graph below of states where extreme updates took place, i.e. Michigan, Wisconsin, and Georgia.

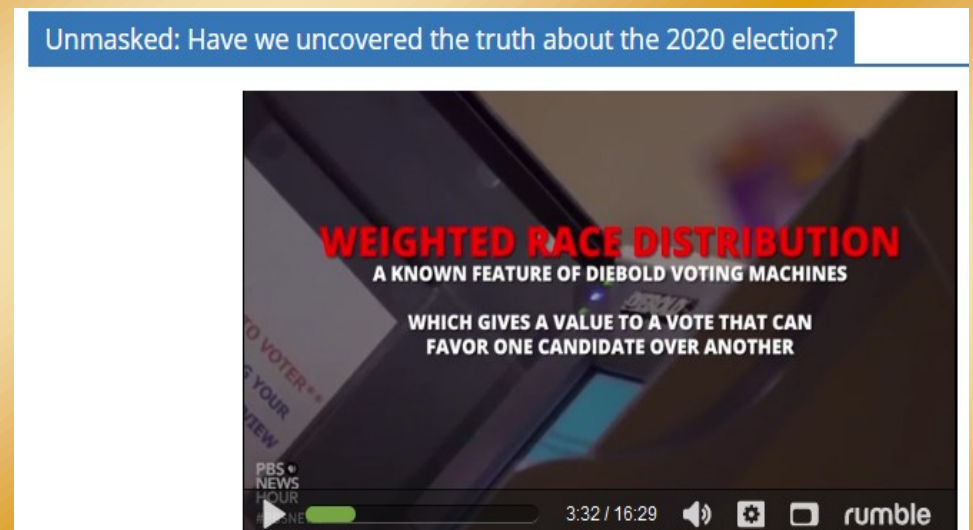

Unmasked: Have we uncovered the truth about the 2020 election? - Part 14

“A constantly identical ratio of Biden to Trump votes across time”.

- Which is theoretically impossible.
- Florida ratio of votes of Trump to Biden is 100% identical.
- This pattern shows up in many states.
- It appears that there is a computer algorithm is involved.
- This is a weighted rate distribution.
- **This is a feature of Diebold Voting Machines.**

Unmasked: Have we uncovered the truth about the 2020 election? - Part 15

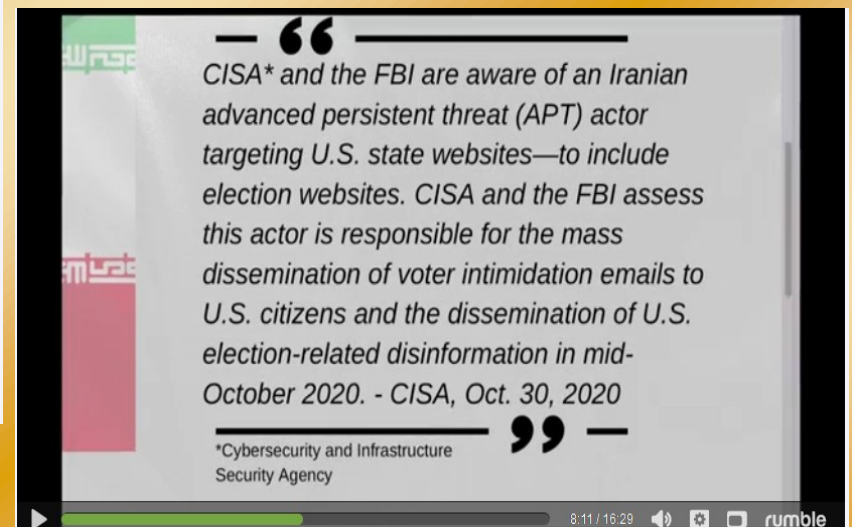

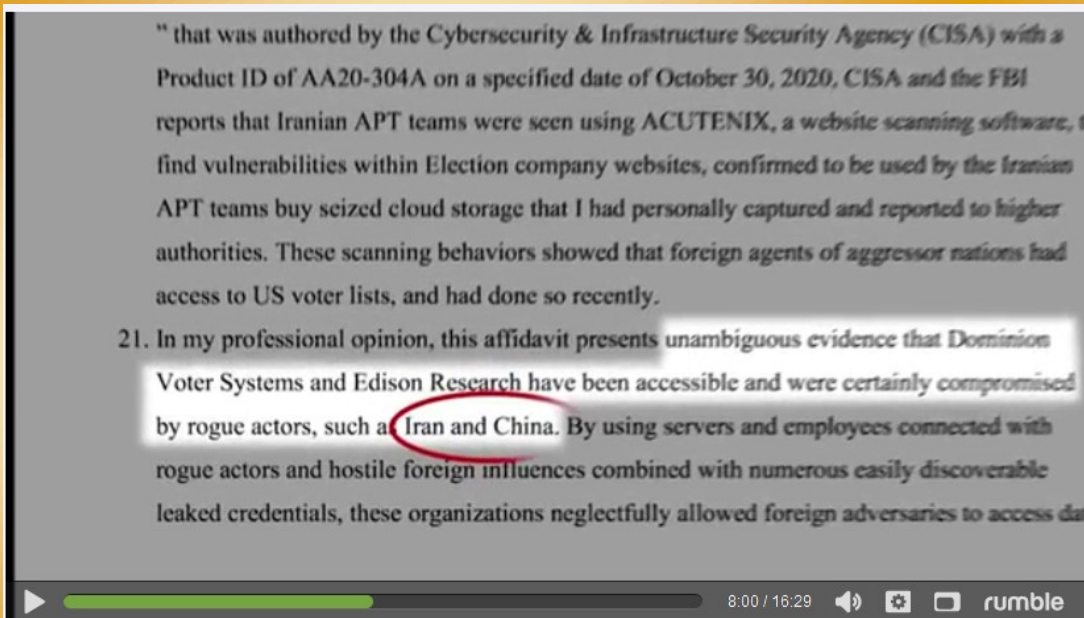

- Here you see one vote comes in and 65.9% is allocated to Biden and 32.3% allocated to Trump.
- How can one vote go to more than one person?
- This is the capability of voting machines, e.g. Diebold switching votes.
- We have shown in above independent research this is very possible to do.
- Voting machine manufactures say laboratory results would not happen in election controlled areas.
- I say that is exactly where they are most likely done given the extreme political polarization.

Date	Biden Votes	Trump Votes	Other Votes	# OF VOTES	SAME IDENTICAL RATIOS AS BEFORE

- ✚ Dominion Voter Systems & Edison Research has been accessible and was certainly compromised by rogue actors such as Iran and China, See excerpt from video below @8:00.

Unmasked: Have we uncovered the truth about the 2020 election? - Part 17

✚ July 16, 2018 Dominion Voting Systems (“Dominion Voting”) announces that it has been acquired by its management team and Staple Street Capital.

✚ The party that paid the money is UBS Securities LLC, a subsidiary of Swiss investment bank UBS.

✚ However, a closer look into the New York subsidiary shows that among its board members, who are appointed by shareholders, three appear to be Chinese.

✚ One of them is Ye Xiang, a Chinese national who also served as a board member of Beijing’s based UBS subsidiary. The person worked at the Chinese regime’s central bank, the state-owned Bank of China, as well as the Hong Kong government’s financial regulatory agencies.

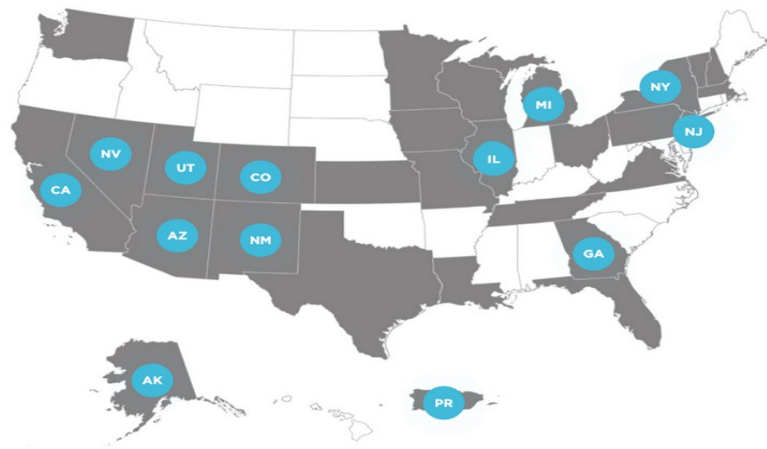

✚ This facilitator of the deal is Chinese vice premier Wang Qishan, who is deemed the most finance-savvy Communist official. He was the mayor of Beijing in 2006 when he met with UBS’s then-chairman Marcel Ospel.

✚ \$400 Million SEC Filing Links Dominion, UBS and China

✚ According to Chinese company profiling website Qixin, after the 2020 election, the Beijing UBS’s went through a major leadership turnover on November the 30th.

In Michigan, after 6,000 votes were tabulated for Biden instead of Trump in Antrim County, Michigan Republican Party Chairwoman Laura Cox, said that 47 of Michigan’s 83 counties “used this same software in the same capacity”

The voting machines belonged to a company called Dominion Voting Systems. Dominion Software is used in 28 US states including all of the battleground states or swing states.

Picture from dominionvoting.com

➤ **In a previous voter fraud lawsuit filed by Sidney Powell, a former military intelligence official claims in an affidavit that Chinese operatives had access to ‘Dominion Voting Systems’ in several key states.**

Dominion voting system is a Canadian owned company with global subsidiaries. It is owned by **Figure 2** Staple Street Capital which is in turn owned by **Figure 1** UBS Securities LLC of which 3 out of their 7 board members are Chinese.
The Dominion software is licensed from **Figure 3** which is a Venezuelan owned and controlled company. Dominion Server locations have been determined to be in Serbia, Canada, the US, Spain and Germany

Unmasked: Have we uncovered the truth about the 2020 election? - Part 18

- ✚ Election workers deciding votes no audit trail
- ✚ Error rates of 68% vs. guidelines of .0008%
- ✚ All 2020 Logs are Missing
- ✚ All security logs prior to 11:03PM on Nov. 4th 2020 are also missing
- ✚ Image ct precinct cars were reprogrammed on Oct. 23 AND Nov. 5ht 2020 which violates the Help America Vote Act.
- ✚ Massive amounts of unsolicited (people receiving ballots they never asked for) mail in ballots.
- ✚ Allowed to vote many days after election deadlines.
- ✚ Signature verification was slackening in many states.

Cybersecurity specialists identified an error rate of 68.05%, which is far above the Federal Election Commission guidelines of 0.0008%. The results of these errors led to tabulation errors and ballots being sent to adjudication, which means that the vote is decided by the election worker using the machine ([see here](#)). For example, in Central Lake Township, there were 1,222 out of 1,491 ballots cast that were reversed, producing an 81.96% rejection rate.

Although vote adjudication logs for prior years were available, all the logs for the 2020 cycle were missing. Moreover, all server security logs prior to 11:03PM on November 4th are missing. These logs are vital for audit trails, forensics, and detecting malicious intruders.

The Election Event Designer Log shows that Dominion ImageCast Precinct Cards were programmed with new ballot programming on October 23rd and again on November 5th. That violates the Help America Vote Act, which includes a 90-day Safe Harbor Period that prohibits changes to election systems, registries, hardware/software updates without undergoing re-certification.

Even if skeptics and critics win that there are limitations of the aforementioned audit, they

Signs Explaining Fraud at a Local Kalispell, Montana Trump Rally January 6, 2021

Vote and Election Fraud – Another Deep State & Globalist Tentacle – Part 1 of 4

- Here are a couple examples to make a point of the breadth and depth of the Deep State and Globalism.
 - [National Geographic in this link claims voter fraud used to be rampant now it's an anomaly. \(Deny & Defy\)](#)
 - [National Geographic touts globalism, climate change and water woes, link here to glance](#) -key word search.
 - Vis-à-vis the American transnational corporations have an agenda to cover up & minimize vote and election fraud.
 - As well as American MSM including Fox plus Deep State leaders active in US Intel agencies, etc.
 - MSM is incapable of doing objective journalism of all sides because they have an over lording agenda.

- [Here is General Flynn's observation in an interview with Dave of the X22Report, Episode 2340B](#)
 - He says the Dominion voting machines did not achieve results needed to get the DNC over the top.
 - So they shut down the election count Nov. 4-7 to allow the use of the corrupt mail in ballots.
 - There are at least 200 witnesses some Democrats willing to testify to all of this chicanery.
 - The Dominion system was not designed to thwart landslide elections like Trump had, but to tweak the results.

- The Point is city/county Municipal Corporation's voter data bases have long been dirty and not kept up to date. This is the foxes counting the chickens. The municipalities are home to the Deep State and are the epitome of the Swamp to an ever increasing degree correlated to the population of the municipality.

- Voting machines are not new suspects to vote manipulation, see below old news.
 - [Vote Fraud Expert Warns Of New Hampshire Chicanery](#) – Jan 9, 2008 - Vote fraud expert Bev Harris has warned that New Hampshire's electronic voting machines are wide open to fraud and that even modestly skilled computer programmers were able to identify key vulnerabilities within ten minutes of assessing them as key Democrat and Republican primaries unfold today.
 - [Errors Transposing Votes and Diebold Machines Issues](#) – Jan. 9, 2008 - Allegations of vote fraud in New Hampshire's primary are growing. The data from Diebold electronic voting machines is up to 5% points different than the hand-written ballots that were cast. Sutton Town has now reported an error in transposing votes and an employee of LHS Associates, whom counted 81% of the vote, has a criminal record.

Vote and Election Fraud – Part 2 of 4

- Scanning over a key word search on the internet all the left leaning sites is denying any election fraud including the misuse of the voting machines.
- Amazing that all these sources can be so orchestrated in their “blindness”.
- This is not random; it is another sign of the global control.
- [Did China Steal The Election? – Dick Morris Lunch Alert](#)

When a company's logo says exactly who they are

Goes in  and comes out 

Firm That Owns Dominion Voting Systems Received \$400 Million From Swiss Bank Account Funded by Communist Chinese Gov & Companies Before Election.

The overall owners of UBS Securities Co LTD are –

- Beijing Guoxiang (33%)
- UBS (24.99%)
- Guangdong Comm. Group (14.01%)
- China Guodian (14%)
- COFCO Group (14%)
- The other four owners of UBS Securities are all Communist Chinese front groups.

Dominion acquired ES&S in 2010.

ER&S Had Acquired Diebold under Its
New Name Premier Election Solutions

A Public Service Announcement

from the Adults Now in Charge
Please Please Please
Don't insult the rest of the world's intelligence by quoting what you heard in the lame Stream Media as if it were some sort of fact. It just makes you look really stupid and childish while making the rest of us feel really annoyed and concerned about your mental health!

The NO LONGER SILENT Majority

Voting FRAUD and Election FRAUD is No Accident!

 Municipal corporations are intentionally not cleaning up their voting registration data bases and intentionally allowing OUR voting system to be sold off to foreign machine vendors including China.

➤ [FreedomForAllSeasons has been reporting on the dark side of municipal corps for years.](#)

Credit to The Pacification of Humanity by Emmuel S. John

Vote and Election Fraud – Part 3 of 4

The State of Georgia “vote” recount was not an honest recount of the true and honest votes.

- Georgia does not do a full hand count.
- They simply fed the same ballots back into the counting machines again. (Dick Morris)
- Don't Let Them Steal Georgia Again. (Dick Morris dated Dec. 2, 2020)
- US intelligence has the actual vote transactions that went into the Dominion voting machines to compare to the votes created at the output. (Anonymous Source)
- The key states holding this election hostage are controlled by the Republican Houses, Pennsylvania, Georgia, Wisconsin, Michigan, and Arizona.

• General Flynn gives the odds on President Trump being reelected to the 2nd term 10 out of 10 = 100%. (pre Nov. 7, 2020.

• So now we know that even General Flynn was deceived by the globalist and Deep State!

1. We need mandatory uniform ENFORCED election standards nationwide at all levels, federal, state, city and county municipal corporations.

2. Also we need to move all the election functions to an independent bipartisan transparent locally monitored and audited business operation.

3. The municipals cannot be trusted to count votes which ultimately determine their own funding.

Vote and Election Fraud – Part 4 of 4

- [Facebook Mark Zuckerberg invested tens of millions into Georgia elections to left wing orgs.](#)

- And this funding worked well for the democrats.
- Mark Zukerberg' Funding Impact – Must Read

- [Link here to read below 3 page witness testimony tweeted by Sidney Powell \(in PDF format\)](#)

1. In blue states & red states, marginal voting totals are close.
2. However, in the purple (red/blue) states, i.e. GA, PA, WI, MI, AZ, NV the vote total differences for the blue & red parties are huge with the blue party showing unusually high totals indicating ballot stuffing. [Dick Morris Lunch Alert 12-4-20](#)

14. Smartmatic's electoral technology was called "Sistema de Gestión Electoral" (the "Electoral Management System"). Smartmatic was a pioneer in this area of computing systems. Their system provided for transmission of voting data over the internet to a computerized central tabulating center. The voting machines themselves had a digital display, fingerprint recognition feature to identify the voter, and printed out the voter's ballot. The voter's thumbprint was linked to a computerized record of that voter's identity. Smartmatic created and operated the entire system.

15. Chavez was most insistent that Smartmatic design the system in a way that the system could change the vote of each voter without being detected. He wanted the software itself to function in such a manner that if the voter were to place their thumb print or fingerprint on a scanner, then the thumbprint would be tied to a record of the voter's name and identity as having voted, but that voter would not tracked to the changed vote. He made it clear that the system would have to be setup to not leave any evidence of the changed vote for a specific voter and that there would be no evidence to show and nothing to contradict that the name or the fingerprint or thumb print was going with a changed vote. Smartmatic agreed to create such a system and produced the software and hardware that accomplished that result for President Chavez.

16. After the Smartmatic Electoral Management System was put in place, I closely observed several elections where the results were manipulated using Smartmatic software. One such election was in December 2006 when Chavez was running against Rosales. Chavez won with a landslide over Manuel Rosales - a margin of nearly 6 million votes for Chavez versus 3.7 million for Rosales.

17. On April 14, 2013, I witnessed another Venezuelan national election in which the Smartmatic Electoral Management System was used to manipulate and change the results for the person to succeed Hugo Chávez

3. [Stunning footage Georgia suitcases filled with ballots after poll workers told to leave.](#)
4. [Texas AG Paxton Files Election Suit Against GA, MI, PA & WI](#)

- Well that did not work either in hindsight.

Destroying America from Within – Let Me Count the Ways

- ✚ English Not Being Enforced as a Common American Language
- ✚ Borders not being enforced & chain migration allowed
- ✚ Corporations allowed to outsource employment & import illegal labor
- ✚ Wealthy corporations and foundations allowed to connect themselves in global networks creating vast global influence laundering lies via:
 - ✓ Funding green extreme radicalism targeting the taking of private and public resources based on global warming lies.
 - ✓ Funding, violence, sanctuary cities, counter culture rioting, general breakdown of traditional American society
 - ✓ Funding border storming caravans
 - ✓ Funding “alternative energy” lies targeting destruction of basic natural resources supplying stable power 24 x7.
- ✚ Foreign voting machines connected to the internet manipulating votes go unchallenged
- ✚ Widespread panics intentionally timed to loosen strictly controlled voting processes go unchallenged
- ✚ American media 6 corporations monopolize misinformation campaigns go unchallenged
- ✚ Social media Tech giant corporations monopolize, filter, orchestrate misinformation campaigns go unchallenged
- ✚ Corporations shift the tax burden onto American wages, pensions and private property go unchallenged
- ✚ Banking interests allowed to create a fiat worthless currency system creating massive debt and inflation go unchallenged
- ✚ American education system control is centralized under one federal agency and a teachers union to further break American state sovereignty and the sovereignty of the individual state Citizen.

Destroying America From Within...

- Immigrants Failing to Assimilate in the U.S.
- Washington's Refusal to Address Illegal Immigration
- Chain Migration, Amnesty & Asylum Assaulting America's Identity
- English fading as our common language

Dear Mr. Venrick,

Please use the enclosed 48 hour reply envelope to RUSH BACK your completed SURVEY and PETITION demanding your legislators take action right away.

Make no mistake, it is inside our borders, within Montana, and spreading across America. Our country is fast becoming a nation with no identity, no culture, no core set of values, no religion and no official language.

Steadfast multiculturalists rail against you and I because we believe that immigrants in the United States should learn the English language, adopt American customs and values, identify as Americans, and adapt to live within the American culture.

Those like us, who take pride in our American heritage, see a threat both to the American political system and to American ideals from immigrants refusing to assimilate.

Mr. Venrick, I'm writing to you today to ask for your support.

Will you please sign and return to me the English Language Unity Act Petition (H.R. 997/S. 678) I've prepared for you demanding U.S. Representative Greg Gianforte and U.S. Senators Jon Tester & Steve Daines CO-SPONSOR, VOTE FOR, and PASS bills that strengthen border security and preserve English as the national language?

Passing these bills into law is the first, crucial step to fighting back against multilingualism — the gravest threat to our national unity, our democracy, and our national identity.

And when you do, will you also complete our brief survey on the Assimilation of Immigrants in the United States? I've included this survey because it is important for Congress and the candidates running for political office to see how Americans, like us, feel about having our country destroyed from people who came to our country through illegal immigration, amnesty, or chain migration and refuse to assimilate.

Very soon, members of the House and Senate may consider passage of "The English Language Unity Act," bills which would establish English as our nation's official language. Lawmakers must hear your voice and know you want them to take on this battle. That's why your signed Petition and completed Survey are so important right now!

There simply isn't a more unifying force than a common form of communications currency. Nearly every sovereign nation state has, at bare minimum, an official language.

(over, please ...)

Dr. Shiva Ayyadurai Addresses Arizona Lawmakers on Election Fraud

NewsBlip

Dr. Shiva Ayyadurai, multiple PHD holder, describes, using mathematics, how Dominion was used to likely steal the election from President Trump. The main point to understand: the voting machines don't tabulate integers, they tabulate floating point numbers. Did anyone reading this description cast 0.7 of a vote for Donald Trump? You may have, without even knowing it. Just another layer of the stinking onion of fraud now being covered up by lifelong grifters called Democrat politicians.

Dr. SHIVA Ayyadurai, MIT PhD, the Inventor of Email, Scientist, Engineer, shares the results of his team's mathematical analysis of four major counties votes in Michigan in the Trump-Biden election that reveals an unfortunate truth of U.S. voting systems. The analysis raises important questions for Election Integrity.

Dr. Shiva on the Election Fraud – Part 7

Dr. Shiva and his team's data analysis reveal the most astonishing election fraud !

108tilapia

Not only was there massive election fraud in the current US election, but it has probably been going on since 2001. In voting machines, they have discovered a "weighted race" feature hidden in the machines which can multiply a vote by a decimal between 0.25 - 2.00, and now the vote tabulating computers have been found to FLIP votes. We need to have fair and SECURE elections with proof of identification and hand-counted paper ballots observed by all parties.

Election Related Cases Before SCOTUS Dated February 23, 2021 – Part 1

- [Here is a link to The Litigation dated February 23, 2021 before SCOTUS](#)
 - **This is 48 pages of some 70 cases listed on the American Bar Association web site.**
 - This data changes and appears to be increasing.
 - I get 163 hits using the word “election” and 25 hits using the word “fraud”.
- We know from the appellate court up to SCOTUS these courts refused to hear election fraud evidence.
- We now know a heavily conservative court has become crippled.
- We know that VP Pence became crippled.
- We know that all of the key swing state Republican controlled Houses became crippled.
- We know that all the Democrats held together to continually bring Trump down at any cost.
- We know that too many turn coat Republican’s did not stand up and call election fraud in their state.
- Many patriots were expecting the U.S. Military to take action; the level of fraud was so obvious.
- We know MSM media, Big Tech social media, DNC, all Democrats & courts stood together to block election fraud challenges without looking at the evidence in many cases.
- We know the GOP intentionally & repeatedly losses to the DNC in Massachusetts a bicameral state per Dr. Shiva.
- Does this mean there was no election fraud, absolutely not!
- This election was beyond a reasonable doubt manipulated especially in swing states & swing candidates.

Other Examples of Government Fraud

- 1) We also know that both Obama & McCain were allowed to run for president and both were ineligible as they were not natural born Americans as required by the U.S. Constitution.
 - John McCain was born in Panama by two American parents and is not technically natural born.
 - Gary Kreep, Attorney and United States Justice Foundation filed a brief with the California 3rd Appellate Dist. Court of Appeal arguing that CA State elections officials not the U.S. Congress had the duty to verify Mr. Obama's eligibility for the 2008 presidential ballot. [Link](#)
 - There were multiple challenges to Barack Obama's eligibility including Dr. Orly Taitz, Esq. Great Patriot. [Link](#)
 - Barack Obama admitted in this video he was born in Kenya. [Link](#)
 - I have years of research proving Barack Obama, aka Barry Soetoro is NOT an American Citizen. [Link](#)
 - Yet the courts did not intervene then either! How could this happen?
- 2) The RNC and the DNC colluded to not fight each other on this point so they could both run two illegitimate presidential candidates approved by the globalists and Deep State.
- 3) We know that President Carter was stunned he could not pick all his own cabinet.
- 4) We know that the so called Federal Reserve is not a federal agency, i.e. it is private central bank cartel.
- 5) We know that there is no federal laws requiring you have to pay taxes on your wages or pensions.
 - Special IRS Agent Joe Bannister proved this in court, he pays no taxes.
 - This sets precedence for every wage earner, why is this not enforced.
 - If no federal laws require taxing wages & pensions there can be no state laws as state constitutions are subordinate to the U.S. Constitution.
- 6) We know that the 16th Amendment was not legally passed and is fraudulent.
 - Bill Benson and M. J. Red Beckman proven this also beyond a reasonable doubt in their two volumes of research, "The Law That Never Was", Volume 1 and 2. Here is 17 years of research corroborating this. [Link](#)
- 7) We know that the 14th and 17th Amendments were also fraudulent.
- 8) I know that the two State of Washington constitutions are fraudulent. [Link](#)
- 9) Why don't the high courts' enforce the founding and fundamental laws?
- 10) The reason why is the courts are part of the problem, they go along to get along.
- 11) We have learned this over and over throughout history however, we cannot fathom this!
- 12) The body of the government is terminally ill and THEIR cancer is contagious by their actions.
- 13) All Presidents have been bought off by the cabal except Eisenhower, Reagan and Trump!

Election Ballot Fraud versus Security Fraud

I did a paper in graduate school at Montana State University, 12/11/ 1970 titled “A Report On Corporation Wealth, Power And Corruption. This was an elective course I had to take to fulfill graduate requirements for a MS in IE & Business. [Link](#)

- How does this tie into election fraud, let’s count the ways.
 - 1.6% of the population in 1962 held 32% of the personal sector assets, essentially most bonds and stocks. (Pg 1)
 - 40% of the largest corporations were controlled by one family or a number of families.
 - Another 30% of the corporations were controlled by one or more other corporations.
 - In a 1968 study by the SEC of 679 security services, 100% were found violating some security code. (p.6)
 - In a hand drawn chart on pg. 7, Fig. A, also shown right corner, during the 1950’s there was an exponential rise of injunctions and criminal convictions by the U.S. SEC against the securities industry.
 - See the infractions decrease after corporations were forced to register their securities early 1960’s, Pg. 7, Fig. A.
 - Fig. B shows the exponential rise of security registrations in the late 1950’s and 1960’s.
 - “Stock manipulators keep up with the times”, Mr. Pollack, Director of Trading and Markets for the SEC.
 - You can read all about how the manipulation is done in this old report of mine, quite intriguing.
 - 98% of the prison population was the lowest socio-economic class, less than 2% were upper class.
- We have long known there is extreme concentration of ownership of corporations and their securities.
- The second point is the SEC found a very high level of fraud up to 100% in that industry.
- The U.S. Securities and Exchange Commission (now over 4000 employees) was created following the stock market crash in the 1920’s to protect investors and the national banking system per Wikipedia.
 - Think primarily the banks and the super wealthy families that pressured \$\$\$\$ Congress
 - Mere voters would never get this respect and action.
- Even then, white collar crimes are rarely imprisoned relative to blue collar.

(1934-40). With the rising number of security registrations, there appears to be a complementary rise in violations during the late 1950's and early 1960's. More significant perhaps is the apparent curb of these infractions in the late 1960's even with the extreme increase in security registrations. Criminal convictions dropped from 97 in 1966, out of 179 indicted, to four in 1969, out of 84 indicted.

Questions comparing security fraud in the USA to election ballot fraud

- ✓ Does the history of financial market instability, fraud & damage compare to the history of election fraud?
- ✓ Should election ballot fraud be prosecuted as strongly as security fraud?
- ✓ Should a ballot be considered a security?
- ✓ Should public city & county municipal corporations be privatized into cooperatives?
- ✓ And should their officers be held liable for their actions like private corporations?
- ✓ Should an independent ballot and election agency like the Federal Reserve be formed to enforce the states own election standards?
- ✓ Should state's governor & ATG be prosecuted for influence peddling in their own election processes?
- ✓ Should all voters be required to register to be allowed to vote as if they were dealing with securities?
- ✓ Should all voters be also required to present photo ID as if they were cashing a bond, stock or check?
- ✓ Should all voters be also required to present themselves in person to do this official business?
- ✓ Should all voting machinery especially those which count votes like Diebold and Dominion be prohibited in any national, state or city and county municipal corporation election?
- ✓ Should election fraud be further defined as any election which cannot produce the full trail of the vote to the original signed ballot?
- ✓ Should new laws be written and old ones revised increasing penalties of election fraud equal to or greater than securities fraud?
- ✓ Should all existing election laws be reviewed in all states with the mission to standardize the transparency, process, security and enforcement of the American election process and ballot?
- ✓ Can the states and their city and county municipals be trusted to accomplish such a mission?
- ✓ Can the federal government be trusted to accomplish this mission?
- ✓ Can an independent state appointed team be trusted to accomplish this mission?
- ✓ Can America afford to risk a revolution by not seriously stepping up to reforming our election process?
- ✓ The Antifa and BLM terror created along with the MSM lies were designed to create a revolution IF President Trump WAS elected.

The Brotherhood of Darkness

- In July 2011, I released the following 74 slide presentation.
- Read it, print it out, send it out, teach it too your children - Link yellow block below.
- If you speak the truth today you can be charged for a federal crime by those who do not wish to debate it because when the truth can be suppressed or not debated the political correct “truth” can be forced over a free Republic faster and easier than most can imagine.
- This is where we are at today, living a lie created by Globalism and the Deep State with 50% of Americans supporting!
- This dynamic duo profit from controlling the narrative via media, election process, tax taking, over regulating, subsidizing, wars, debt, et al and then denying and defying it all.

A conspiracy may be a continuing one; actors may drop out, and others drop in; the details of operation may change from time to time; the members need not know each other or the part played by others; a member need not know all the details of the plan or the operations; he must, however, know the purpose of the conspiracy and agree to become a party to a plan to effectuate that purpose. *Craig v. U. S., C.C.A.Cal., 81 F.2d 816, 822.*

There are a number of federal statutes prohibiting specific types of conspiracy. See, e.g., 18 U.S.C.A. § 371. See also Chain conspiracy; Co-conspirator's rule; Combination in restraint of trade; Confederacy; Seditious conspiracy; Wharton Rule. Chain conspiracy.

Blacks Law Dictionary, 6th Edition 1990

“Some of the biggest men in the United States, in the field of commerce and manufacture are afraid of something. They know that there is a power somewhere so organized, so complete, and so pervasive, that they had better not speak above their breath when they speak in condemnation of it”.
President Woodrow Wilson

The Brotherhood of Darkness is a treatise on the current system of control in America versus a True and Honest Republic. This is not a doomsday scenario, it provides hope IF a critical mass awakens soon and takes action.

RELEASED JULY 2011

This is 74 slides in a presentation format outlining the global to local agenda and tyranny used to take all private and public property, natural resources and labor using a one world government, e.g. UN, world banking systems, etc.

Quotes From The Brotherhood of Darkness Applicable to the 2020-21 Election Fraud

"On July 16, 1996 the Senate Committee on governmental Affairs held hearings considering a bill to require Congress to specify for each new law which section of the Constitution gives {them} authority to pass the law. Sen. Glenn [D-OH] spoke out strongly against this requirement stating, "Why if we had to do that we could not pass most of the laws we enact here." He stated that the Clean Water Act, Endangered Species Act, the Americans with Disabilities Act and others could never have been passed if Congress had to find authority for them in the constitution." Glenn declared "Americans just want us to solve America's problems of health and safety and not be concerned if they can

"I am a most unhappy man; I have unwittingly ruined my country. A great industrial nation is controlled by its system of credit. Our system of credit is concentrated. The growth of the nation, therefore, and all our activities are in the hands of a few men. We have come to be one of the worst ruled, one of the most completely controlled and dominated governments in the civilized world. No longer a government by free opinion, no longer a government by conviction and the vote of the majority, but a government by the opinion and

"This system of false definitions, false assumptions, and fraud and usurpation generally, runs through all the operations of our governments, State and national. There is nothing genuine, nothing real, nothing true, nothing honest, to be found in any of them. They all proceed upon the principle, that governments have all power and the people no rights."
Lysander Spooner

"I believe that if the people of this nation fully understood what Congress {and all the states, counties & cities} has done to them over the last 49 years, they would move on Washington, they would not wait for an election....It adds up to a preconceived plan to destroy the economic and social independence of the United States."

George W. Malone, U.S. Senator (Nevada), speaking before congress in 1957 {FreedomForAllSeasons note}

"The real truth of the matter is, as you and I know, that a financial element in the larger centers has owned the government since the days of Andrew Jackson."

"In politics nothing happens by accident; if it happens, you can be sure we planned it that way."

-President Franklin Roosevelt

"The high office of the President has been used to foment a plot to destroy the Americans freedom and before I leave office I must inform the Citizen of his plight."
President John F. Kennedy (10 days before he was murdered)

GOVERNMENTS CAN BE LIMITED LIE OR MORE GOVERNMENT IS LESS AND LESS GOVERNMENT IS MORE

- 1) This graph speaks for itself derived from over 7 years of research.
- 2) The message is we are all slaves until a critical mass awakes to the reality that an enlighten society is self governing requiring less and less government NOT more.
- 3) Societies which vote in more government and more public infrastructure to replace and oversee what they fear in the private and voluntary sectors suffocate themselves to death by a self fulfilling paradigm of false flag fear and power mongering snuffing out what they arrogantly pretend they are protecting.

Monkeys Can Be Trained To Suppress Their Own Kind Just Like Humans

PUNISHING THE COLLECTIVE FOR CRIMES OF INDIVIDUAL SOVEREIGNTY OR HOW THE LIES ARE CREATED (DON'T SKIP THIS SLIDE)

Going Bananas

by miniv8 » Sun Nov 06, 2011 11:02 am

A group of scientists placed 5 monkeys in a cage and in the middle, a ladder with bananas on the top.

Every time a monkey went up the ladder, the scientists soaked the rest of the monkeys with cold water.

After a while, every time a monkey went up the ladder, the others beat up the one on the ladder.

After some time, no monkey dare to go up the ladder regardless of the temptation.

Scientists then decided to substitute one of the monkeys. The 1st thing this new monkey did was to go up the ladder. Immediately the other monkeys beat him up.

After several beatings, the new member learned not to climb the ladder even though never knew why.

A 2nd monkey was substituted and the same occurred. The 1st monkey participated on the beating for the 2nd monkey. A 3rd monkey was changed and the same was repeated (beating). The 4th was substituted and the beating was repeated and finally the 5th monkey was replaced.

What was left was a group of 5 monkeys that even though never received a cold shower, continued to beat up any monkey who attempted to climb the ladder.

If it was possible to ask the monkeys why they would beat up all those who attempted to go up the ladder..... I bet you the answer would be....

"I don't know - that's how things are done around here"

Does it sounds familiar?

Don't miss the opportunity to share this with others as they might be asking themselves why we continue to do what we are doing if there is a different way out there.

Estimate of Voting & Election Fraud History

- I did these two graphs below by muscle testing.
- This an age old technique allowing your body/guides to move a yes or no answer to a question you pose.
- This technique is also described in a book [The Emotion Code by Dr. Bradley Nelson](#)

Jack's Comments

- 1) If there is only one ballot or one employee or one machine in any of the 3,141 country municipal corporations that is suspected or known fraudulent, then that election should be called off until the problem is fixed whether it is a local, state or national election.
- 2) Can you imagine in a classroom of say 3,141 students if all of them were caught cheating at least once in a 4 year undergraduate program what the impact on the reputation of the college/university and the students would reflect.
- 3) ‘We the People’ now have “no vote that counts”, “no consent of the govern”, no constitutional vetting of all legislation, no off limits to the tax taking of our labor, i.e. wages and pensions and private property and no security on our borders. This is call globalism via the Deep State for profit and power.
- 4) No candidate at any level, whether municipal, state or federal should be elected until that candidate swears under the penalty of death they will secure the election systems and their respective borders.
- 5) No elections should be held anywhere in the USA where municipal corporation employee(s) block transparency of our elections. As we discover the last elections, swing states will defend their own fraud if it suits them.
- 6) If there are any state or federal elections which hinge on only one problematic city or county municipal corporation, then that state or federal election should be shut down and a new election held after the problem is investigated thoroughly and solved. Elections results must be accurate beyond a reasonable doubt.
- 7) Any systems engineer knows how to design self checking feedback systems to catch errors. This is designed in all of our electronics, electrical and power systems. This self checking is largely invisible to the consumer yet without this security our communications, transportation, power, manufacturing and computing industries would not function.
- 8) Yet we allow massive lack of security of our elections and open and close our borders at the whim of political administrations!
- 9) Making municipal election systems error and fraud free is like having the sense to install modern security applications in computers and mobiles constantly updated to hacking threats.
- 10) As you can see in the State of Washington RCW the people of the state do not yield their sovereignty to agencies which serve them. However, no state respects Citizen Sovereignty, votes or border security as these are political tools of power to themselves.

A Montana Patriot Letter to
Senator Tester (D) re.
U.S. H.B. 1 –

The bill is insane desperation of the left to destroy our borders and our honest election system and totally unconstitutional. How can such garbage even be brought up for a vote? Thank you Brenda for exposing the takings!

March 3-02-2021

Subject: VOTE NO ON H.R1

Dear Senator Tester,

An extreme treat to our republic and electoral process has presented itself to Senators in the form of H.R.1 "for the people Act 2019." This bill will not only legalize fraud in the election system but will systematically destroy the voting system of this great country. Speaker Nancy Pelosi and Democrats are determined to legalize voting requirements that have been illegal since the founding our great republic.

H.R.1 will:

- Require Internet-only voter registration.
- Ban the requirement to provide a full SSN for voter registration
- Provide Nationwide "Motor Voter" Registration

This provision creates automatic voter registration, unless the individual declines to be registered. How many dead people will be registered?

- Require 16-year-old to be registered to vote
- Allow nationwide same-day registration
- Prohibit attempts to clean voter rolls of non-residents
- Felons, Murderers and rapists can vote
- Orders states to provide mandatory early voting
- Nationwide vote by mail, allowing legalized limitless ballot harvesting
- Ban voter ID

There's much more in H.R. 1 to fear, but these are the biggies! Every provision of H.R.1 is designed to eliminate any attempts to protect the ballot box and will legalize the massive fraud.

That's why 16 Secretaries of State from across the nation have come out against H.R.1 as unconstitutional and harmful to democracy.

H.R.1 is the very first bill Speaker Pelosi rushed into the legislative hopper in this new congress. Clearly their intentions are to make sure opposition will never rise again.

I realize that you are a Senator of the Democratic Party, however, I must remind you that you are FIRST a Senator of the USA representing the people of the great State of Montana. You swore to uphold and protect the constitution of the USA. I urge you to vote with the people of this great country and the State of Montana, toss party politics aside and vote NO on H.R.1. There has to come a point when party affiliation and the thirst for power comes to an end and the representation of the people takes its place. Please do not stand with Pelosi, Schumer and the other power hungry, destroyers of the Constitution. Show the people of Montana and the United States that you have the guts to uphold your oath to defend and protect the Constitution.

Respectfully,

Brenda D. Baldi

Montana Election Fraud

- [A River of Doubt Runs Through Mail Voting in Montana – Real Clear Investigations](#)
- [Voter Fraud in Missoula Getting National Attention – At Least 5% of votes Fraudulently Cast](#)

- [Was the 2020 Election Stolen from President Trump Survey?](#)

Thursday, Apr 15.

Was the 2020 Election Stolen from President Trump?

Was there voter fraud or manipulation in the 2020 Presidential election?

Yes - The fraud and corruption could keep the rightful President from the White House (106,664) vote

No - The election was ran ethically and honestly. All votes were counted. (5,853) vote

Not sure - There could be fraud, but have not seen definitive proof (1,632) vote

Should there be an investigation into the 2020 election results?

Yes - There definitely needs to be an investigation (108,691) vote

No - While close, Joe Biden is the clear winner in a fair election (5,457) vote

93.4%

5.1%

1.4%

Mike Lindell The Voice of Free Speech – Absolute Interference - My Notes.

- Check out www.frankspeech.com shown live April 19 through 21 on this platform
- [About the FRANK PLATFORM](#)
- [The Absolute Proof Series regarding election fraud](#)
- 2995 American counties were attacked by China during the 2020-2021 Presidential elections of a total 3143 counties.
- Cyber digital prints confirmed China interference in our election.
- Modem cards found fixed to circuit boards of voting machines
- 150 million views of Absolute Proof documentary video.
- Vimeo, YouTube and Facebook take down documentary.
- ES&S and Dominion remote code execution discovered.
- Manufacturers and politicians declare voting equipment is not connected to the internet.
- 2016 Russian cyber attack, Iran, China and other foreign country interference proven.
- 21 states hacked in 2018 elections.
- Rapid foreign cyber interference.
- Democrats concerned about voting machine vulnerability in 2020.
- USA has known this since 2016.
- Verified connections with China gives absolute proof of illegal incursions to 150 Secretary of State Offices owned by TCL Chinese companies.
- IP addresses are verified to USA battleground states from foreign addresses.
- Most massive cyber attack in history on our election system in history led by the CCP of China.
- It only took 2 years to take down Venezuela.
- This is a global agenda using the same model.
- Unrestricted warfare doctrine of the Chinese Communist Party writings of General Sun Tzu to win without fighting.
- China Communist Party plan in hundreds of years in strategy so you do not see their takings.
- This attack took place in early hours of November 4, 2020.

Mike Lindell The Voice of Free Speech – Absolute Interference - My Notes

➤ See the pattern of Population, Voter Registration versus Ballots counted in the above two graphs.

- 1) The blue line is the population by age in Hamilton County Ohio from real data from the US Census.
- 2) The black line is “registered voters” in that county showing nearly everyone registered.
- 3) **ISN'T THAT ODD? WAIT A MINUTE THAT CANNOT BE TRUE!**
 - **Most of the time only 70 to 80 % of a local county voters register!**
 - **This pattern of voter registration appears to be machine generated as it is too correlated to the population.**
- 4) This is the work of Dr. Douglas E. Frank shown in the Mike Lindell 3 day series covering the second documentary exposing additional evidence proving foreign interference in the U.S. 2020-2021 elections.
- 5) He found this same pattern over and over in other states. His work is still in process.
- 6) From what I understand being said here is that this has been going on since at least 2008.
- 7) At 40:40 Minutes/seconds into this [documentary](#) you can listen to how Dr. Frank discovered the machine algorithm manipulating one election of one Congress women in Pennsylvania.

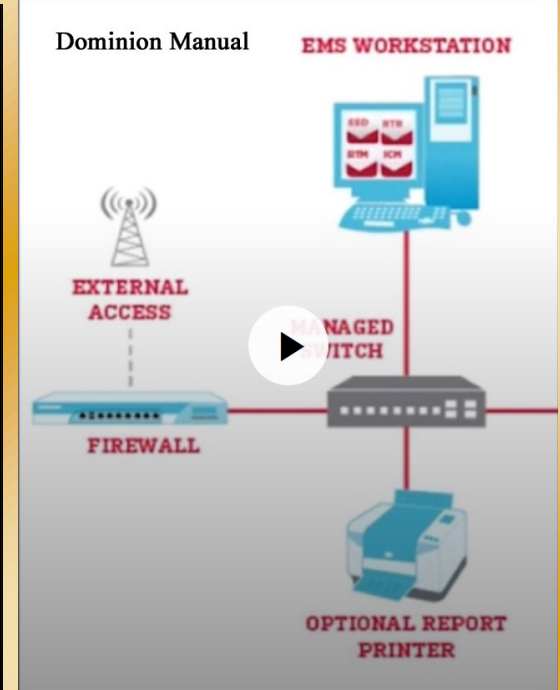

Mike Lindell The Voice of Free Speech – Absolute Interference - My Notes

- These are two outline charts of the level of certification and workforce categories and the areas this government cyber expert specializes in. (Pages 68 to 73)
- His voice was filtered and his picture was pixelated so he was not recognizable.

Why GIAC Certification

"The GIAC certification exam covers information in real-world terms. In my experience, this makes the exam much more relevant; even as an open-book exam it was challenging. It wasn't just about memorizing answers but also applying that information to real-life scenarios." - Ken Hansen, GISF, Quanta

"It's easier to justify taking the course when we can show a confirmation of skills acquired with a certification - not just a certificate of completion." - Kirk K. Wah Yick, GCFA, GPEN, GASF

"A SANS / GIAC certification holds a high degree of value; it truly establishes one as an expert in their field." - Navroz Sharif, NASA, ASRC

Judicial Watch: Records Show Iowa State Officials Coordinated with Big Tech to Censor Election Posts

Judicial Watch announced today that it received 624 pages of records from the office of the Secretary of State of Iowa, revealing how state officials pressured social media companies (Twitter and Facebook) to censor posts about the 2020 election. Included in these records were emails from Iowa state officials to representatives of Big Tech pressuring these companies to remove Judicial Watch's posts. The emails show how the state agency successfully pressured Facebook to censor Judicial Watch's post about Iowa's management of its voter rolls.

 - **End of July 2021 Mike Lindell will serve the U.S. Supreme Court a Quo warranto**

Quo warranto. In old English practice, a writ in the nature of a writ of right for the king, against him who claimed or usurped any office, franchise, or liberty, to inquire by what authority he supported his claim, in order to determine the right. It lay also in case of non-user, or long neglect of a franchise, or misuser or abuse of it; being a writ commanding the defendant to show by what warrant he exercises such a franchise, having never had any grant of it, or having forfeited it by neglect or abuse. 3 Bl.Comm. 262.

A common law writ designed to test whether a person exercising power is legally entitled to do so. An extraordinary proceeding, prerogative in nature, addressed to preventing a continued exercise of authority unlawfully asserted. Johnson v. Manhattan Ry. Co., N.Y., 289 U.S. 479, 53 S.Ct. 721, 77 L.Ed. 1331. It is intended to prevent exercise of powers that are not conferred by law, and is not ordinarily available to regulate the manner of exercising such powers. An ancient prerogative right through which the state acts to protect itself and the good of public generally through its chosen agents as provided by its Constitution and laws, though sometimes it is brought at instance of and for benefit of a private individual who may have a special interest. Lewis v. Drake, Tex.App., 641 S.W.2d 392, 394. Legal action · whereby legality of exercise of powers by municipal corporation may be placed in issue. People ex rel. City of Des Plaines v. Village of Mount Prospect, 29 Ill.App.3d 807, 331 N.E.2d 373, 377.

In the law of corporations, quo warranto may be used to test whether a corporation was validly organized or whether it has power to engage in the business in which it is involved. The federal rules are applicable to proceedings for quo warranto " to the extent that the practice in such proceedings is not set forth in statutes of the United States and has heretofore conformed to the practice in civil actions." Fed.R. Civil P. 81(a)(2). Any remedy that could have been obtained under the historic writ of quo warranto may be obtained by a civil action of that nature. U. S. v. Nussbaum, D.C.Cal., 306 F.Supp. 66.

[Trump Unloads On Biden Over Pennsylvania Trip ‘To Stop the Forensic Audit](#)

Donald Trump released a statement about Joe Biden’s plans to visit Pennsylvania just before Republicans appear poised to launch an audit of the 2020 presidential election.

“Joe Biden is going to Pennsylvania today in a rush in order to stop the Forensic Audit that the Pennsylvania Republican Senate is in the process of doing. Philadelphia was a cesspool of corruption, which will soon be revealed by the audit,” Trump said in the statement.

“Why are they so concerned that a President, who never goes anywhere, would hop onto beautiful Air Force One and head to Philadelphia if it were an honest election? Why not let the audit go forward and make everybody, on both sides, happy? The results will be the results,” he added.

“But they know it was not an honest election, Philadelphia was one of the most corrupt cities in the Country — and so is Detroit, and so is Milwaukee, and so is Atlanta, and Pittsburgh, and Oakland, and Baltimore,” he said. “Corruption has gone on for years, but in the 2020 Presidential Election Scam, with the mail-in ballots and the use of Covid to cheat, corruption reached new levels.”

“Remember the poll watchers being thrown out, the windows being sealed so nobody could look in, the ballot drops, and all of the other events that took place that changed so rapidly the Big Trump Win on election night,” he said.

Trump added, “Joe should say go forward with this, with all of these audits. His visit is a joke. He doesn’t need to visit, all he needs to do is let them do an audit and find out what happened. Who knows, maybe they’ll say the election was on the up and up, but many people would be shocked.”

“Let the audit go forward like it is in Arizona, despite 107 Democrat lawyers trying to stop it and failing,” he said.

Trump concluded by saying, “Let the Forensic Audit go, Joe. Don’t fight it. Show them how honest it was.”

[How the Ballot Box Becomes a Weapon](#)

"By 1992, there were more people working for government than for manufacturing companies in the private sector. There are more citizens receiving government checks than there are paying income taxes. When it is possible for people to vote on issues involving the transfer to themselves from others, the ballot box becomes a weapon whereby the majority plunders the minority. That is the point of no return. It is a doomsday mechanism."

"The Creature From Jekyll Island", pg. 534-535, Edward Griffin

- [Dr. Frank: 2020 Election Data Research reveals Troubling Patterns](#)
 - "Frank said that, based on his calculations, he estimated a significant percentage of the votes cast in the 2020 election were actually "phantom votes." Phantom votes, he said, are legally invalid ballots because they are attributed to people who, for example, died before the election, have moved out of state, already voted, are convicted felons, are underage or who say they did not actually vote. To corroborate his estimate, he assembled a team of canvassers who went door to door in Pennsylvania with a randomly selected list of people who supposedly (according to election results) cast a ballot in the 2020 election. The canvassers found, according to Frank, not about 20% as he initially believed, but over 30% of the ballots cast were from phantom voters."

South Dakota Governor Kristi Noem Bottomline

- "The blue state, big city politicians went into lockdown for months with no discernable difference in COVID-19 places that remained open for business. Except now after crashing their economies; they have their hand out and are seeking a bailout from Washington. I'm proud of the fact that South Dakota is the only state in America that never ordered a single business or church to close."
- [A monthslong investigation into 2020 presidential vote found that Democrat-run cities and states used the COVID-19 crisis to change the rules that likely helped Joe Biden's ascent to the White House.](#)

50,000	381	772	1491	8056	655	1318	2520	12455
75,000	382	776	1506	8514	658	1330	2563	13583
100,000	383	778	1513	8762	659	1336	2585	14227
250,000	384	782	1527	9248	662	1347	2626	15555
500,000	384	783	1532	9423	663	1350	2640	16055
1,000,000	384	783	1534	9512	663	1352	2647	16317
2,500,000	384	784	1536	9567	663	1353	2651	16478
10,000,000	384	784	1536	9594	663	1354	2653	16560
100,000,000	384	784	1537	9603	663	1354	2654	16584
264,000,000	384	784	1537	9603	663	1354	2654	16586

The recommended sample size for a given population size, level of confidence, and margin of error appears in the body of the table.

For example, the recommended sample size for a population of 1,000, a confidence level of 99%, and a margin of error (degree of accuracy) of 3.5% would be 575.

- Change these values to select different levels of confidence.
- Change these values to select different maximum margins of error.
- Change these values to select different (e.g., more precise) population sizes.

This table is the best visual example to understand statistical sampling sizes.

The more you sample the more confident you can be about your data.

At the same time if you get your sample size right the sample size is relatively minimal to seek a high Degree of Accuracy and Confidence level. Comments by Jack. Table source found on the web.

[Bombshell Report Proves State and Federal Election Crimes Were Committed - County Commissiner Leaks to Press Instead of Reporting Crimes.](#) Link on title.

- **"Mesa County Colorado Clerk and Recorder Tina Peters in good faith delivered an initial forensic cyber security report covering election machine analysis to County Commissioners. The report proves destruction of evidence. One or more Commissioners misrepresent report to the press -fail to report crimes."**
- **More proof that county politics are overruling correcting the fraud.**

[Forwarded from Transparent Elections NC \(Received via Telegram\)](#)

- The NC State Board website on Voting Systems states, "All voting systems used in North Carolina are certified by the federal Election Assistance Commission (EAC) and the State Board of Elections after undergoing mandatory testing by nationally accredited laboratories. All systems used in North Carolina have been tested, used, and audited in other states."
- **Nope. Not True!**
- NC certified an ES&S system: Version 3.4.1.1, but this system was NEVER certified by the EAC.
- The EAC did certify 3.4.1.0. **The only difference between these two systems is that 3.4.1.1 was never EAC certified - the DS200s for that system HAVE MODEMS!**
- This is the version that Wake County & many other counties in NC are still using. When counties purchased DS200s years ago, they came with wired modems - it used to be legal to send results via modem, but is now banned.
- NC should remove modems from all DS200s.

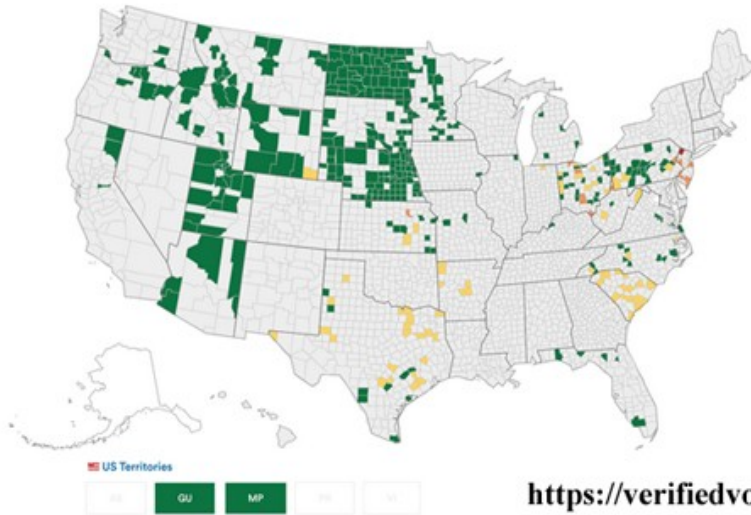

[Voting Equipment by State](#)

 - 11 states do optical scan and Direct Recording Electronic systems (DRE).
 - 24 states do optical scan only.
 - 14 states do hand count and optical scan including Montana.
 - 1 state does direct recording electronic only.
- [Link here](#) to see Verified Voting letters to some states urging them not to pass bad legislation further risking true and honest elections in the USA. Verified Voting is a nonpartisan nonprofit organization of computer scientists.
- **Bottom line Verified Voting is telling the states that electronic return of voted ballots is a slippery slope to vulnerable and insecure elections.**
- [Verified Voting Letter to Council of the District of Columbia](#)

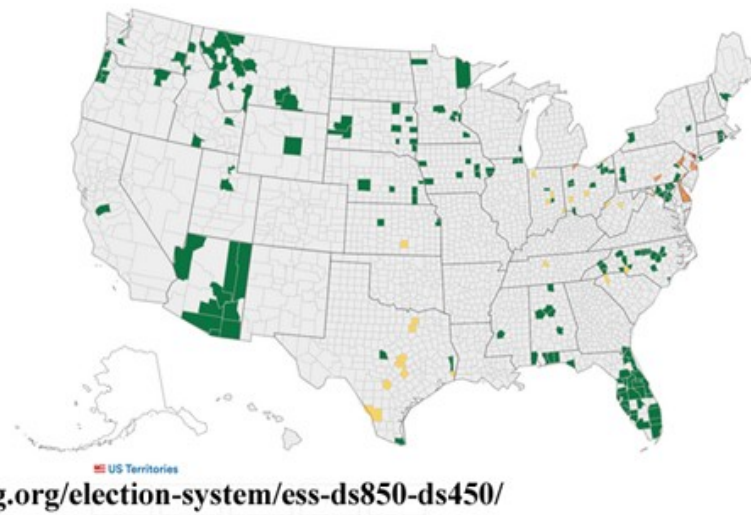

"We know that there are vendors of online and mobile election systems that make bold statements about how safe and secure their systems are. Unfortunately, these vendors do not reliably assess the security risks of the products they sell. Their public relations, marketing, and lobbying efforts consistently downplay the inherent risks of internet voting. Multiple studies have been performed on these types of systems and the conclusion is always the same: the risks are significant and no good solution yet exists to mitigate those risks."³

Washington, D.C. is uniquely positioned to reject internet and mobile voting. In 2010 the District of Columbia held a mock election using an internet voting system and invited participants to try and compromise the security of that system. According to researchers who successfully compromised the system, **“Within 48 hours of the system going live, we had gained near-complete control of the election server. We successfully changed every vote and revealed almost every secret ballot. Election officials did not detect our intrusion for nearly two business days—and might have remained unaware for far longer had we not deliberately left a prominent clue.”**⁴ The internet is the same today as it was then. By rejecting Bill 24-353, you will prevent anything like this from happening during a real election."

Clear evidence of Big Tech search engine bias by overwhelming liberal hits

- + TRUTH is much different from the "facts".
- + "FACTS" are often repeated lies or gross misrepresentations of the truth.
- + Do a search on any subject on the internet by your favorite search engine.
 - First, do a search with a keyword as a liberal would think, & you will see many hits.
 - Second, do a search the same keyword in a conservative sense & you will see less hits.
 - Then review the often outrageous titles of the hits with the liberal bias.
 - That is to say it appears to me that Google so dominates the search engines that they have mastered the demonization of conservative independent thought while accentuating liberal thought beyond what 99 & 2/3% of the victims can imagine.
 - This POLITICAL AGENDA lines up with the chronology of dictionary definition changes including leading law dictionaries like Black's Law Dictionary tracked through each edition change.
 - While you can say that definitions change as awareness changes;
 - The next obvious revelatory question is, in whose favor?
 - Globalist publishers control by sharking out the nonconforming.
 - Exactly like Mainstream Media 6 corporations.
 - The standards for the globalist/Deep State world are profit & power not the truth.

Montana Election Analysis by Seth Keshe

Estimated vote fraud in Montana = 46,000 votes.

$46,000/612,075 = 7.5\%$ of the voter turnout

$46,000/752,538 = 6.1\%$ of registered voters

1% x 752, 538 registered voters = 7525 voters.

Try to imagine this level of fraud in a state that has elections decided within a few hundred!

	Trump votes	Biden votes	Other votes
Officially reported results	343,602 (56.92%)	244,786 (40.55%)	15,273 (2.53%)
Estimate of potential fraud		46,000 (7.6%)	
Estimate of actual result (with fraud removed)	343,602 (61.6%)	198,786 (35.6%)	15,273 (2.7%)

State elections are gamed more than gambling industry in this state however, don't tell anyone because the county councils will not believe it because the transnational corporate voting equipment is funded by your globalist federal government who constantly redefine truth!

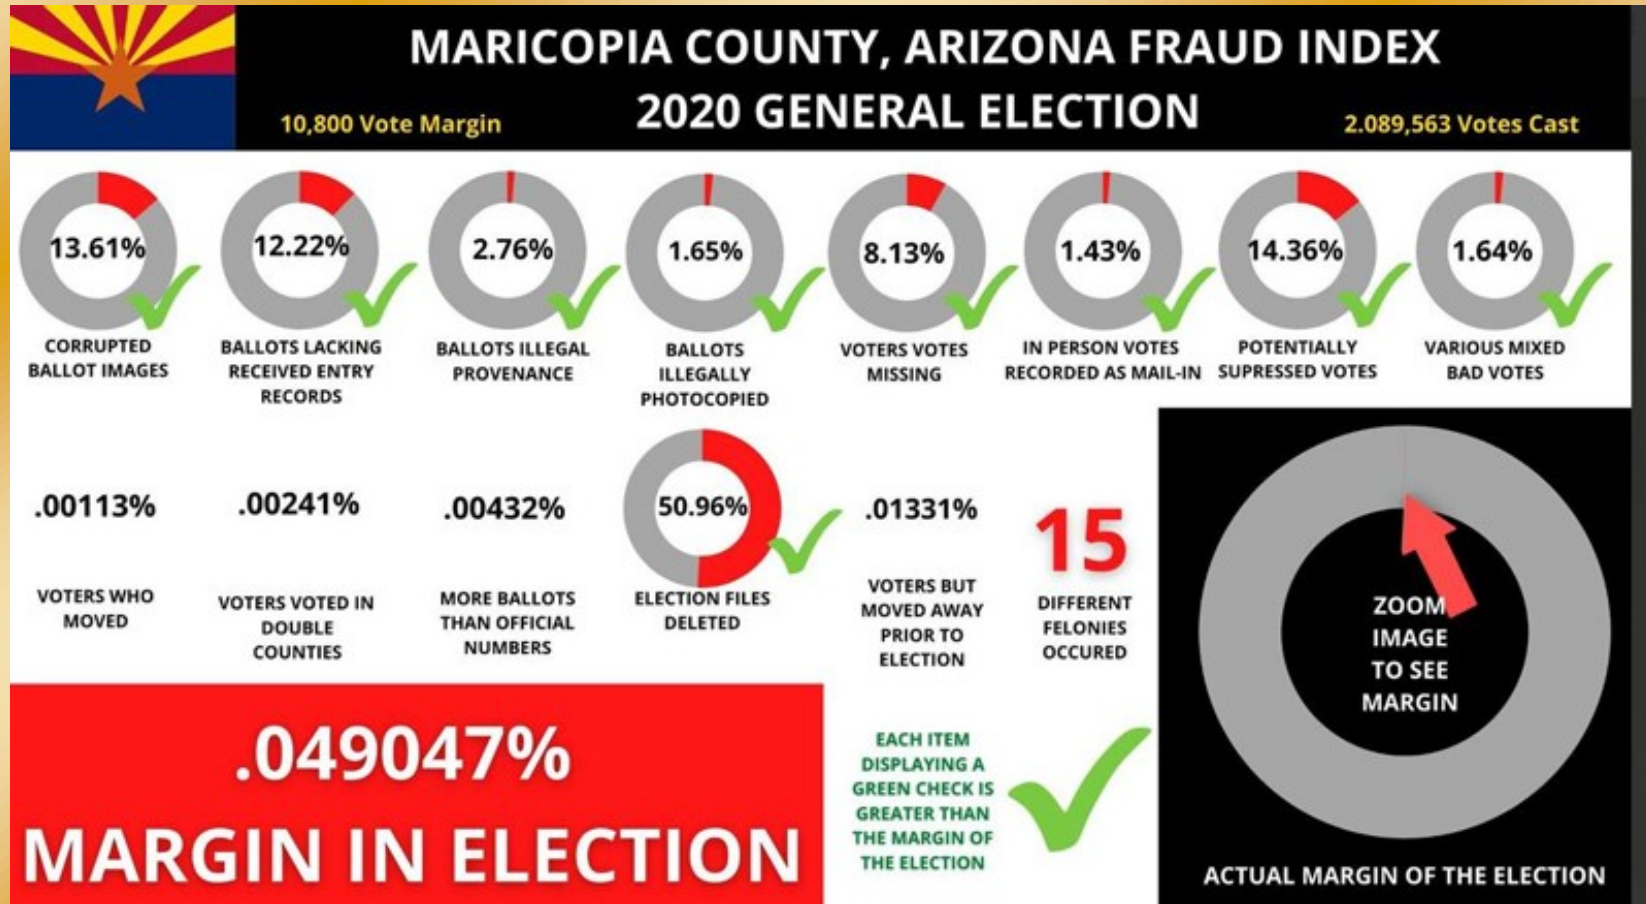

● Likely Clean
Aligns with voter registration trends, as expected

● Suspect, Likely Fraud
Moderate divergence from trend

● Strong/Rampant Fraud
Strong, unexplainable divergence from trend

Captain Seth Keshel, MBA accounting of Maricopa County, Arizona At-A-Glance

Pima County Arizona Needs a Full Audit AND Decertification of Arizona's Election Now

➤ AZ House Rep (Dist 11) Mark Finchem statements in an email to me follow.

1. The first is that in Pima County, the total number of mail in ballots that were returned was over 100% of what was sent out.
2. The second is that there were multiple other precincts that had return rates in the high 90's, when the average was in the 70's nationwide. Statistical outliers like these are just as much an indicator of fraud as having more ballots returned than sent out to begin with!
3. Additionally, the President cites evidence from the Maricopa Audit which I helped lead which absolutely proves that the election should be decertified:
 - 6,545 ballots with no envelopes
 - 2,580 bad signatures
 - 1,919 mail-in ballots without signatures.

○ This is more than the margin of Biden's so-called "victory!"

➤ "Make no mistake, there has been substantial progress in Arizona while I have been leading the Election Integrity movement! " AZ Rep Mark Finchem

1. We have demonstrated and proved that there has been substantial election fraud in Maricopa County
2. We have found statistically accurate results that show that President Trump actually won the election.
3. Attorney General Mark Brnovich has just recently began to investigate the Maricopa Case, in particular those who fraudulently deleted election files.
4. We have now gathered tens of thousands of signatures to Audit Pima County
5. I am meeting with Election Integrity Patriots and Experts from around the country to help them push for audits in their state.
6. I have worked with third party firms to develop currency-level authentication processes with ballots – a technological innovation that simply has not been seen and we can apply to our elections here in America!

Comments Sent to Lady Draza (Engineer several times over & just shy here PhD in Computer Science) on Telegram October 27, 2021

- Seth. Don't know if you saw this.
- My wife and I went for early voting in Virginia today, and something very disturbing happened.
- We were both told we couldn't vote since we had requested and been sent absentee ballots. Since we had done nothing of the sort, we raised hell and they finally produced affidavits we could sign saying that we had lost the ballots we requested. We demanded affidavits saying that we had never requested absentee ballots and absentee ballots had never been received by us. We were told there was no such thing. We could either sign the affidavits saying we had lost the ballots we had requested or go home without voting. We signed.
- During the time we were there and engaged in this dispute, a matter of about fifteen minutes, I overheard THREE other people going through exactly the same thing.
- We live in a heavily Democrat-controlled precinct in a Democrat-controlled state in which the Republican candidate for governor is running even with the Democrat candidate. A not inconsiderable number of people in just one precinct during a very brief period of time were complaining that the voter rolls showed they had requested and received absentee ballots they did not request or receive.
- Are you getting the picture here?
- When the election process becomes an endemically corrupt process manipulated by the Democrat Party to retain power at all costs, we are finished as a free nation. It appears to me that has already happened.
- The above message was sent to Captain Keshel regarding the Virginia governor election. This means that the voter rolls have been cleaned up too much to cover the needed margin for an unpopular candidate win. In order to cover the deficit, they have to steal the vote of REAL voters to meet the mail-in vote partisan margin!!

Comments from Seth Keshel on Telegram

🚩 Seth Keshel, [12/7/2021 10:54 AM]

- **Dem vote trend from 2004 to 2016**
- **60mm, 69mm, 65mm, 66mm... "81mm"**
- They have established a new threshold for voting trend line, and it is around 80mm. That is only achievable with mass mail-in voting to inflated voter rolls full of phantom voters.
- And in conclusion, the above is why the fight to clean up elections is unending and ongoing. To go back to 62-65mm in the next election would undo the validity of 2020 for those few who remain deceived.

🚩 Seth Keshel, [11/29/2021 12:22 PM]

🚩 **Why did the 2020 election have to be ripped off?**

1. It was not about Trump, conservatives, or Republicans. It was about his agenda. Had he pulled an Arnold (Benedict Arnold - American Military officer who fought with distinction rising to rank of Major General before defection to the British side in 1780) blended into the political establishment in short time, he'd have had his re-election recognized and a second term.
2. This (election taking) had to do with the realignment of American industry to support American workers, cessation of endless warfare that profits the military industrial complex at expense of American lives, elimination of corrupt trade deals and pacts, immigration controls to benefit the legitimate needs and interests of the country, among other things.
3. China was being bent over the barrel by these trade realignments. Trade is the issue that put the Midwest on a hard Republican trend. Another four years of that would have put the world on an irreversible course with America as the dominant power.
4. **The global interests could not allow that. Hence, the 2020 election conspiracy.**
 - Not anti-Trump.
 - Not anti-Republican.
 - Not anti-conservative.
 - Anti-America First.

MEDIA ADVISORY

PHOENIX, December 8, 2021... FOR IMMEDIATE RELEASE

House Majority Whip Representative Leo Biasiucci (LD-5), Senate Majority Whip Senator Sonny Borrelli (LD-5) and Representative Mark Finchem (LD-11), announce a Public Hearing on Election Integrity.

DATE: December 13, 2021 TIME: 0900-1700 MST

LOCATION: Hilton El Conquistador Hotel and Convention Center, 10000 N. Oracle Road, Oro Valley, AZ.

ACCESS: By ticket only, the event will be live-streamed for all to watch.

“On November 7, 2020, an anonymous report of election system fraud was made to the United States Department of Justice and ALL members of the Arizona House and Senate. The allegation that 35,000 fictitious votes had been entered into the Pima County election was related by an individual who claimed to be in the room when the plan was revealed to lower-level Pima County Democratic Party leaders.

“Over the last 12 months a few Members of the Legislature and resources from various election integrity organizations have conducted a quiet, but fruitful investigation into the substance and reliability of the allegation.

“Our elections are a system, and systems require active maintenance. Without attention to detail, the bureaucratic machine inevitably runs amok. We are elected to identify defects and fix them.” Rep. Biasiucci

“We found significant discrepancies in the Maricopa County Election through the audit, which gives us all pause to consider what has happened in other counties? To think that we would not find similar problems in other counties is not a credible position for any elected official to take.” Sen. Sonny Borrelli

“With consent of the Governed goes the right of the Governed to to examine, and if warranted, conduct an audit of the elections that they participate in. Elections belong to the People, not the government.” Rep. Finchem

On November 30, 2020, we held a Public Hearing on Election Integrity that gave the public an opportunity to present evidence and sworn testimony to the joint panel of Members of the State Legislature regarding the 2020 General Election. The mission of the Public Hearing on Election Integrity was to, “receive evidence and testimony that could serve to prove or disprove alleged discrepancies in the 2020 General Election.” Arizona citizens and expert witnesses submitted sworn affidavits, under penalty of perjury, to the panel detailing inconsistencies they encountered during the election process.

Pima County voters who have first-person knowledge of a violation of Arizona elections law, a violation of the Arizona Elections Procedure Manual, and who may have physical evidence are asked to contact Sen. Kelly Townsend (LD-16) at 602-926-4467.

<https://www.eventbrite.com/e/breaking-pima-county-public-investigative-hearing-election-integrity-tickets-218543177527>

This hearing will be held with the same objective. Press organizations may contact 602-826-7300 for information on access.

The 5 Steps of Phantom Votes by Lady Draza 12/1/2021

There are 5 types of Phantom Voters.

- 1) Traditional fraud – Person doesn't exist, yet someone created a fake identity.
- 2) Split Person into multiple voters using same first and last name; diluting your vote. Bobby Piton, Bob Piton, Rob Piton, Robert Piton across county or State lines
- 3) Moved out of or intra State – they are in voter registration files in different counties and/or states, voting from multiple locations across county / State lines.
 - a. It might be very difficult to catch if voter registration files are withheld or have limited viewability across county lines.
- 4) Children or other family members are registered at a family house but are not actually living there.
 - a. In some cases, they are children off to college, in extreme cases, the parents knew their children had moved out of the home and they still received and possibly voted their ballot; they knowingly committed voter crimes on behalf of their political party.
- 5) Dead Voter – Identity of someone who died voted across county lines in a different part of the State or the Coroner doesn't file the paperwork in a "timely manner", helping his friend the county clerk out. A good way to find out which clerk / coroner might be involved in this fraud is to focus on the ones that have held office across election cycles or for over a decade.
 - a. In many cases, the "coroner" stays within the same family; look for family relationships of coroners through time.

The goal of the cabal was to flood the system with "Real Ballots" that were generated as a result of these "phantom voters" in the voter registration rolls.

Real Ballots are very difficult to counterfeit, so coming up with a way to get the government to issue this voting currency was essential to pulling off this fraud.

This Fraud would have been very difficult to effectuate if it wasn't for the mail in ballot push that was so heavily fought for and implemented by the communists (the UniParty) within the Republican Party (RINO's) and the Democrat Party.

Step 1) Inflate the Voter Registration Rolls with Phantom Voters that don't exist and motivate everyone to register, or automatically register as many as possible, counting on most not actually voting.

Step 2) Mail out "Real Ballots" to Voter Mules at locations that have a disproportionate amount of registrations. (New Construction sites, Nursing Homes, Apartment Buildings, Government Buildings, PO Boxes, etc.)

Step 3) Mail Back "Real Ballots" and have them separated from the envelopes. Don't enter these "Real Ballots" cast votes onto the "Phantom Voter" Files, but rather assign them to "Real People" that didn't vote. Assign a very Real Ballot to a Non-Voter. This is still illegal as someone who exercised their Right NOT to Vote is still afforded the same rights as someone who did vote.

Step 4) If you run out of "Real People" that didn't Vote, because the real people that "own that spot" show up to vote, tell them they already voted and give them a provisional ballot.

Step 5) If the cabal still can't make the numbers work, start flipping votes by using an algorithm that calls on names in the voter registration files that are the inverse of real people's names. (For example, Bob Jones is also registered as Jones Bob, etc). Countless voting records show this insane relationship, and these fictitious voters are created to "tag" how to flip votes if necessary.

Step 6) Destroy entire classes of Last Names across a particular precinct or county.

Say there is a family that would vote 70% Party A and 30% Party B in the past and now votes 30% Party A and 70% Party B, or a 100% swing. Just delete all of the votes that were cast for both Party A and Party B by "Last Name". This is very quick and efficient and makes it easy to manage a targeted outcome since millions of voters are involved.

[Election Fraud At A Glance - Election Data Inquiries](#)

We aim to assist genuine and honest inquiries into what happened during the 2020 General Election.

After spending over 8 months collating information and analyzing all the election data we can find, there is no doubt in our minds the election results were compromised.

We are bipartisan — not affiliated with the Democrat nor the Republican party, nor any party for that matter. We simply stand for *Truth, Justice, Honesty and Transparency*.

The analysis and reports on this website are done by unpaid volunteers in their free time. Before making any inquiries please familiarize yourselves with the following articles first. They will help establish some common understanding before initiating a conversation:

-  [The Fall of the Bellwether Counties](#)
-  [The Battle of the Largest Counties](#)
-  [The Curious Case of the 2020 “Voting Rate” Blowouts](#)

Conclusion

We have looked at every imaginable scenario to build a case for the Democrat party winning the 2020 election based upon how our “trusted” counties voted. With each new section we relaxed the constraint, to include the **most friendly Democrat voting counties** in the country (based on the 2008 election). We highlighted the counties that voted the highest for the Democrat party in 2008 as it is a clear indicator of their propensity to vote for the Democrat party.

Have you looked at the results of these counties? If you’ve done your research and found the 2020 results for each of these counties, you should find the results extremely puzzling.

So did we.

Georgia Ballot Harvesting Whistleblower is a Game Changer Potentially 1 Million Illegal Ballots

- 1) Georgia Ballot Harvesting Whistleblower Is a Game Changer - Potentially 1M Illegal Ballots | JF Radio
(<https://t.me/LibertyOverwatchChannel/6255>)
- 2) John Solomon joined John Fredericks again today to review additional details about the Georgia ballot trafficking investigation
(<https://t.me/LibertyOverwatchChannel/6254>).
- 3) Video footage and cell phone data acquired by True the Vote (<https://t.me/LibertyOverwatchChannel/5334>) suggests there were 242 ballot harvesters who made 5,662 trips to Georgia drop boxes, primarily between the hours of 12AM and 5AM.
- 4) True the Vote was able to secure the cooperation of one of the harvesters they discovered on the video tapes thanks to encouragement from his mother. This 'John Doe' claims that he was paid \$45K by a non-profit group to deliver roughly 4,500 ballots. He reported that many others participated and laid out the names of the people and groups that were involved, describing a large mass-harvesting operation.
- 5) This "human corroboration" was the critical piece of evidence for Raffensperger and his investigators, Solomon noted. Having a whistleblower who actually admits that he was paid to harvest ballots "makes all that data, all that video footage not only all the more believable, it provides a very specific roadmap of people and names and organizations and dates and times and financial transactions."
- 6) **Fredericks points out that if 242 people each delivered 4,500 ballots, that would suggest \$11M in payouts and more than a million harvested ballots between the November election and the Georgia Senate runoff.**
- 7) Despite the scale of the scandal, True the Vote was only able to acquire (via FOIA request
(<https://t.me/LibertyOverwatchChannel/6250>)) about 15% of the drop box surveillance in Georgia. It turns out many counties defied federal election records law and discarded their tapes.
- 8) Liz Harris (<https://t.me/VoteLizHarris>) told Liberty Overwatch that True the Vote has similar evidence of organized ballot harvesting in Arizona.
- 9) Watch 📺 John Fredericks and John Solomon (<https://t.me/LibertyOverwatchChannel/6255>)

[An Estimated 24 Million Voter Registrations Are Invalid Or Significantly Inaccurate](#)

[The Left's Voting Machine by Capital Research - Link here to Download this report](#)

AN ESTIMATED 24 MILLION VOTER REGISTRATIONS ARE INVALID OR SIGNIFICANTLY INACCURATE.*

☆ Is this really a problem?

Yes. In 2012, in one of the last major studies in public circulation*, over 13% of the voter rolls were identified as inaccurate. When invalid records are used in the mass mail out of ballots, it leads to confusion, frustration, and easy targets for election manipulation.

☆ How'd it get so bad?

Federal and state law quagmires, constant political pressure, and lack of resources often hinder the ability of counties to keep the rolls up to date.

☆ What's being done?

Counties try to do what they can, but it's a struggle. IV3 will help engage voters and support good governance - improving election integrity for everyone.

HOW IT WORKS

THE POWER OF VOTER ENGAGEMENT

Almost every state in the country provides voters with a way to help improve the accuracy of their county voter rolls. How? By submitting potentially ineligible records for local review through a process often referred to as a voter challenge.

Montana Senator Theresa Manzella Action Alert for Election Integrity

Date: Thu, Dec 2, 2021 at 4:09 PM

Subject: State Senator Theresa Manzella: Action Alert for Election Integrity

Good Morning Dear Friends, Colleagues and Citizens.

I wanted to send quick email to update you on the issue of Election Integrity in Montana.

On Nov 10th, I facilitated a meeting between our AG, Austin Knudsen, and Mike Lindell, Dr Doug Frank, Lindell's Attorney- Kurt Olsen and a Cyber Ninja. Rep Brad Tschida was also in attendance, as was Mr. Lindell's and Dr Franks personal assistant, Michele. The purpose of the meeting was to present evidence of election irregularities and vulnerabilities to the AG for consideration, with the goal of having him sign on in support of the lawsuit Mr. Lindell intended to drop on Nov 23rd. Ultimately, our AG did not sign onto the lawsuit. His reasons for not signing on to the lawsuit were given to me secondhand, so I'll have to refer you back to him or his office for specific details. I was told second hand that the reason for the resistance was that the 2000 page lawsuit was too large to thoroughly vet in the allotted time frame, which was Nov 10th - Nov 23rd. On Nov 21, the lawsuit was streamlined to 81 pages containing only evidence that had been previously heard by the courts, but still, not a single State AG in the country would sign onto the case.

This Mon, Dec 6th, Rep Brad Tschida and I will go before the Legislative Council seeking appointment and funding of the Special Select Legislative Committee for the purpose of investigating our election process and laws in Montana. If you would like to support that effort, please send respectful emails expressing your desire to the following committee members:

Senate President Mark Blasdel - Mark.Blasdel@mtleg.gov, Senator Jason Ellsworth - Jason.Ellsworth@mtleg.gov, Rep Rhonda Knudsen - rhonda.knudsen@mtleg.gov, Sen Cary Smith - cary.smith@mtleg.gov, Rep Casey Knudsen - Casey.knudsen@mtleg.com, Speaker Wylie Galt - wyliegaltformt@gmail.com, Rep Kim Abbott - kim.abbott@mtleg.gov, Rep Laurie Bishop - Laurie.Bishop@mtleg.gov, Sen Jill Cohenour - Jill.Cohenour@mtleg.gov, Sen Pat Flowers - pat.flowers@mtleg.gov, Rep Derek Harvey - derek.harvey@mtleg.gov, Sen JP Pomnichowski - jp.pomnichowski@mtleg.gov

Additional details about the committee can be found here - <https://leg.mt.gov/legislator-information/roster/individual/7056>

Despite Republicans holding large majorities in the Montana State Legislature, the Legislative Council Committee is equally split, 50/50 between Republicans and Democrats. To attain success, we need a Democrat to vote in support of our proposal.

Thank you for your commitment to the worthy cause of fair and free elections. We will press on in our endeavor to honor our Constitutional obligation as provided in Article IV, Section 3 - The legislature shall provide by law the requirements for residence, registration, absentee voting, and administration of elections. It may provide for a system of poll booth registration, **and shall insure the purity of elections and guard against abuses of the electoral process.**

Faithfully For Freedom,

Sen Theresa Manzella
