Overview

This is a must watch 50 minute interview to better understand what is going on not only the border post Trump but the level of US negligence combined with the UN in Panama including the canal and China's role.

- Note: The video is broken by ads you can skip plus there is occasional breakup due to jungle conditions audio video quickly comes back.

This jungle video is through the eyes of Michal Yon who is boots on the ground ex Green Beret significant expert and reporter who is being called by some of President Trump's new department heads. The camps are being expanded not abandoned though they are 95% empty. Michael is saying most of this mess is being funded by the US AND UN. Michael Yon repeatedly calls for ending the US funding of the UN and certain NGO groups aiding and abetting this massive planned invasion. If the illegals cannot get into the US through the Darien Gap they go to Canada and get in along the 5000 mile Canadian border. The U.S. border can be closed up but the Canadian border is so long it is much more difficult and largely ignored except at port entrances. At the same time the Obama Biden policy of stopping the border enforcement effectively forced the US Border Patrol to just ask for name and birth date only with no papers. This includes any Chinese who are willing to go in thru Panama destination the Darien Gap. The cost to each migrant who can afford to travel thru the camps used as rest stops are \$20 to \$30,000. The Chinese are harvesting the huge old trees and cutting down the jungle for money and building the bridges which are pre planned to be wiped out by the annual floods after the timber is hauled out each season. I am no environmentalist as you all know. These Panama villages are democratic and the Chiefs go by the majority of their people who vote for the Chinese money even though many natives do not want the trees and forest cut down around them. Money or trees is not a tough question for the majority here. When the jungle goes, the natives go so it is ultimately a death wish to cut too many of these big trees. The Chinese are developing the road system through the jungle and they are controlling the Atlantic and Pacific sides of the Panama Canal. Much more heavy lifting clean up of the cesspool needs to be done is the bottom line.

Alex Jones www.infowars.com is predicting that 100 indictments will be handed down to the controlling big bad actors and 5000 indictments handed down to the minions, i.e. gophers for big bad actors in next 90 days. USAID Musk audit shows western countries, e.g. US, Canada, France, Germany, Spain share media propoganda funding to control the narrative. Read that again. This news roots to the above discovery by Michael Yon and this is only one tentacle of the globalist octopus. The UnFederal unReserve is the top of this food chain for the syndicated crime families global to local. “USAID discovery is only one French fry” compared to the big global taking. Wrap you mind around the enormity of how “our” American Republic has be systemically taken since day one. We are owned by European banks, think Rothschild’s, think Hamilton running horse back to Boston to relate convention activities. I have researched and document all of this and more. Few can comprehend these truths and even if some do, nothing would be done. Imagine that. Yet we write tons of legislation each year state after state plus the fed plus the municipals to garner favor from one party to another ultimately controlled by the globalists, environmentalist extremist, et al. The more that is written the less founding & fundamental principles we stand on not unlike the Darien Gap situation. Get It?
