State of Montana Comprehensive Annual Financial Report Summary

This chart below shows the excessive and steady increase in tax taking upon Individuals wages and pensions and property vs. corporate income.

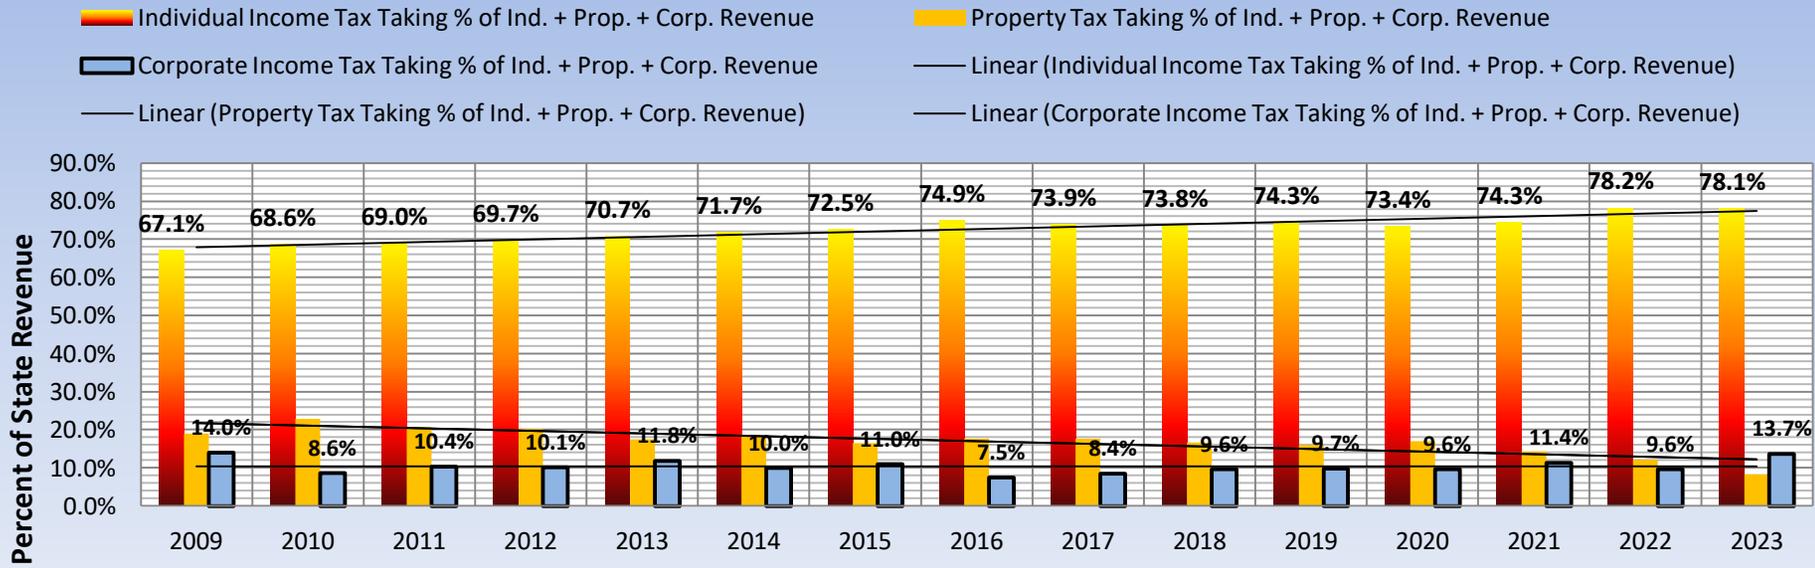

Montana State Tax Taking on Individuals, Property & Corporations (x \$1,000)

State of Montana Comprehensive Annual Financial Report Summary

This chart below shows how much more Individual state Citizens pay compared to corporations. Individuals are also paying some portion of the property taxes. And the steady increase creep of the direct tax taking upon the state Citizen and their private property.

Percent of Montana State Revenue From These Three Sources Paid By Individuals, Property & Corporations

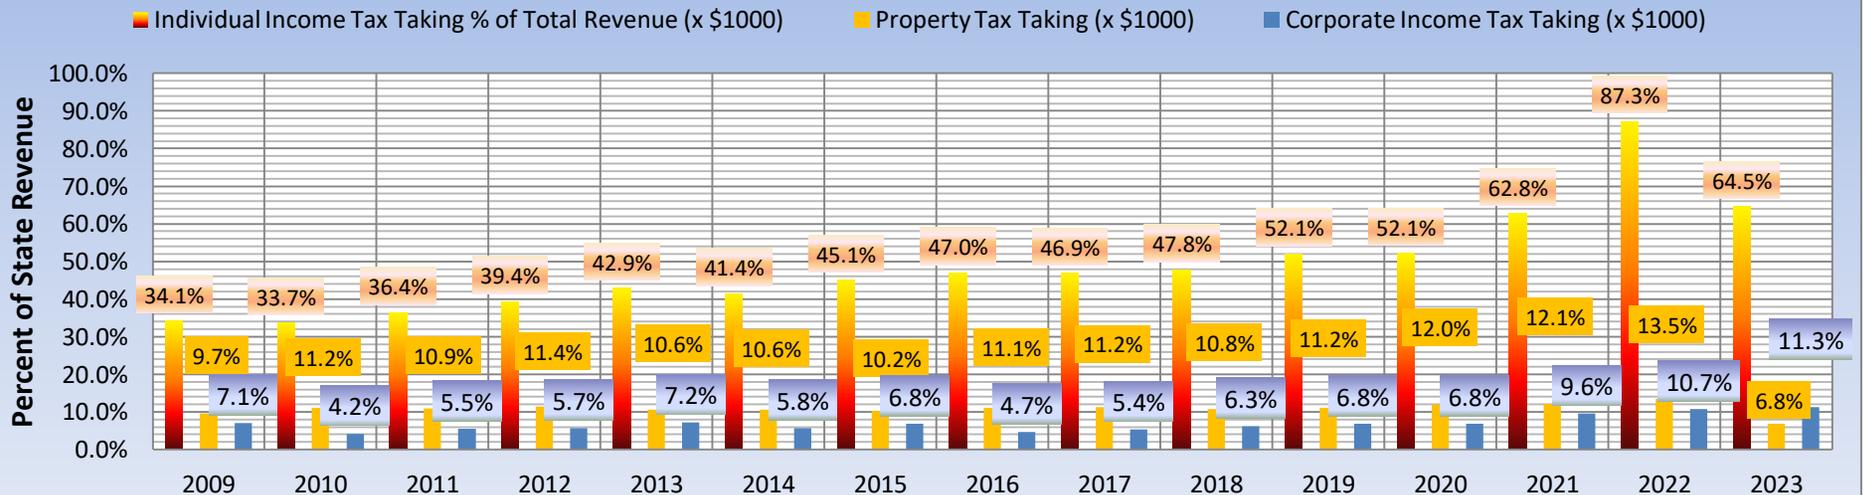

State of Montana Comprehensive Annual Financial Report Summary

This chart below shows the overwhelming burden of Montana State tax taking is upon the individual wages and pensions plus the property owners versus the relative little tax taking from corporations as a percent of the total Montana State Revenue. The government is formed by the Citizens and the corporations are created by the government. The State Citizens is the master and not obligated to pay direct taxes from their livelihood via wages or pensions or retirement savings, e.g. 401Ks or IRAs. No state Citizen would vote for such a feudal system when they know sufficient revenue was available thru indirect sources only.

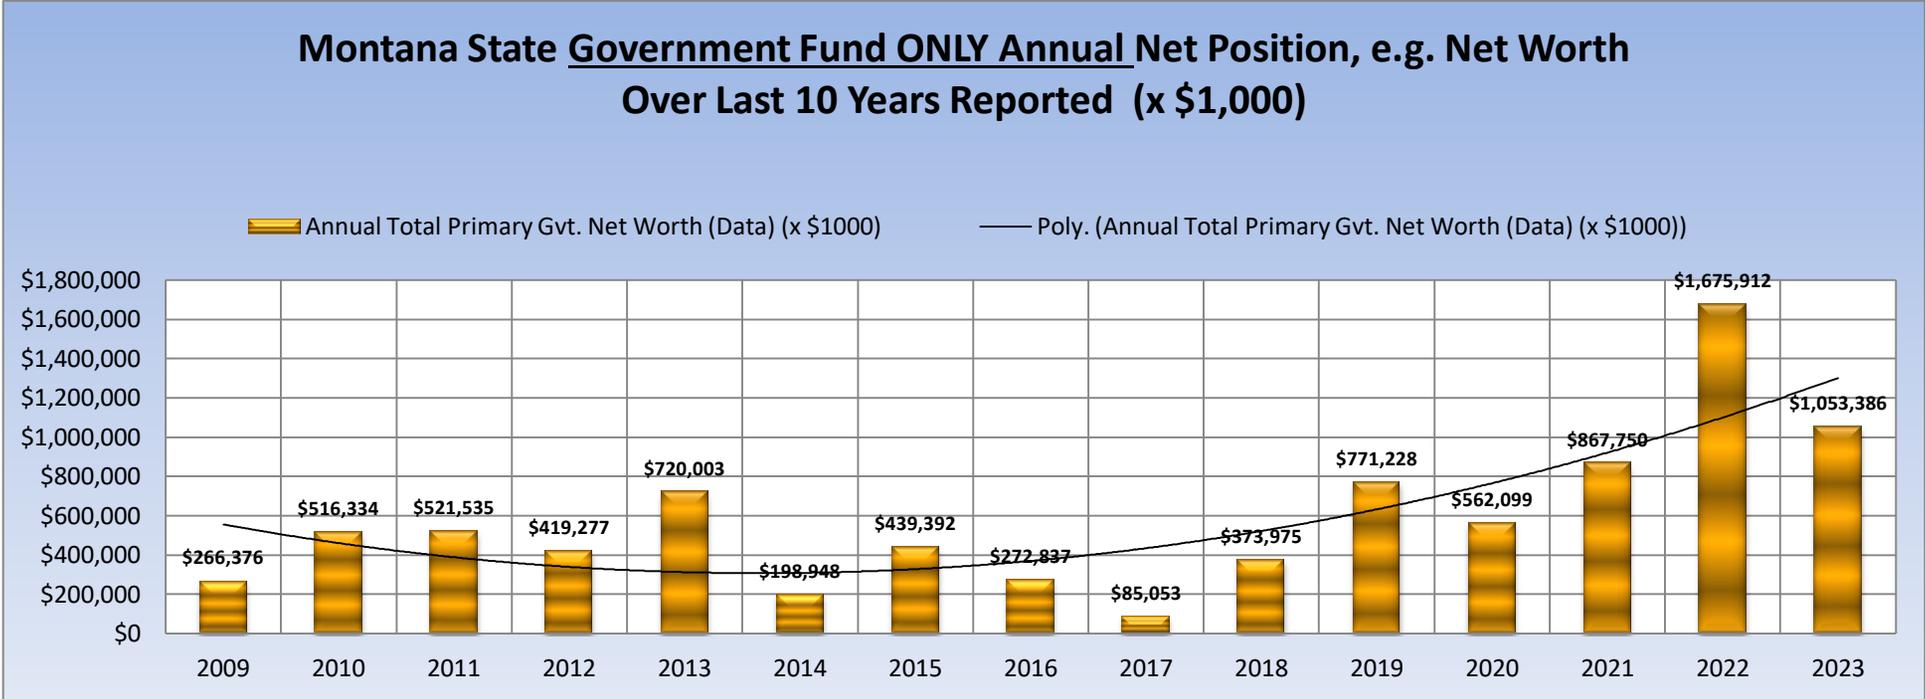

Below graph shows the increasing taking from the Citizen wages and pensions and property versus the less increasing taxing on the corporations.

Percent of Total Primary Montana State Revenue Paid By Individuals, Property & Corporate Tax Taking
