## *New tools for you*

Since the 1980s, Henry Lamb has given countless speeches promoting the principles of freedom and warning of documented plans pushed by environmental organizations and others in international circles who relentlessly seek to undermine individual freedom and abolish national sovereignty.

Now for the first time, four of his presentations have been discovered and are available on two DVDs.

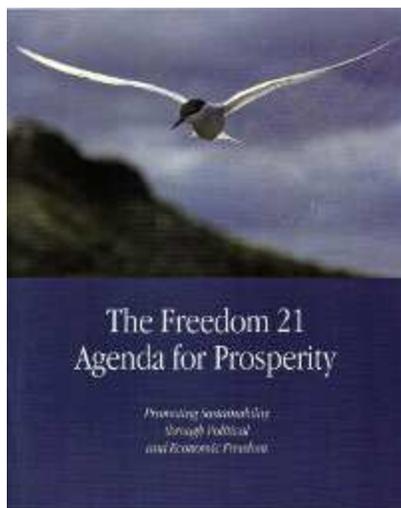

Three of the presentations are about 1 hour each, and the other is 22 minutes long. The speeches were delivered in 1996, 1998, 2002 and the last was in March 2006. He has not given a recorded speech since 2006.

You will be amazed by what you hear in these presentations, as Henry discusses the plans of the globalists, with citations from the literature available from the U.N. publications, and from books and newsletters written by environmentalists. He knew from his research that the American timber industry was headed toward disaster, that wetlands designations would devalue private property, that ever-tightening regulations to reduce air and water pollution would decimate many more industries, and that increased rules on the use of land would inevitably lead to rural depopulation as the range of available ways to earn a living gradually disappeared from the landscape.

## *Freedom21 Alternative for Prosperity*

Dr. Michael Coffman is the lead author and editor of this 72-page, 8 1/2 x 11 book. Several other authors contributed to this work, which was reviewed by 23 leading authorities in science and government. The book provides a point-by-point alternative to Agenda 21:

Chapter 1 - Population and poverty;

Chapter 2 - Land issues and property rights;

Chapter 3 - Air and water issues;

Chapter 4 - Chemicals and management of waste;

Chapter 5 - Meeting essential human needs.

Complete with 273 endnotes, this book provides all the evidence you will need to convince your neighbors or your elected officials that there is a better way to do everything than the way prescribed by Agenda 21 and by the President's Council on Sustainable Development.

### *Piping Mad*

Here is a new video that reveals just how badly environmental regulations are impacting coastal North Carolina. Several residents and business owners are interviewed. These are real people who have seen the federal government shut down business after business to protect the Piping Plover, rather than protecting the rights of humans. See and hear their stories [here](#).

*These items are available at our [Freedom Store](#)*
