The rural farmers had enough and joined together at Concord, Massachusetts North Bridge. They fired on and chased the British Regulars and German Hessians back to Boston. 20,000 rural and urban Americans surrounded Boston. April 19, 1775

The rural people in America have had enough too, 235 years later. Another revolution is brewing and it can't come soon enough.

Valley Forge, Middlebrook, New Jersey winter quarters December 12, 1777 to June 19, 1778.

General Washington, Martha with some 11,000 men starving and freezing. 2500 died.

General Washington could have easily found warmth and comfort and the surrounding communities could have easily helped, but they didn't. This was a 20 year war from 1763 to 1783.

"Yet, despite the ever-present fear of mutiny, no real dissaffection occurred. As Hessian Major Baurmeister conceded, the army was kept from disintegrating by the "spirit of liberty." Men and officers accepted their tragic plight with a sense of humor and extraordinary forbearance, but it was an ordeal that no army could be expected to undergo for long. Nathanael Greene wrote to General Washington, "God grant we may never be brought to such a wretched condition again."

One can analogize, we are nearing Valley Forge again. I can make an easy case, we never left.

America is freezing to death from the lies being fed to US.

To: Property Rights Groups, Friends, Montana and Washington Government, Puget Sound Media, Missoula and Bozeman Media:

What I am going to prove to you over some course of time and material will be the following. The original 13 constiutions and the "original constitution" were written more after British Municipal Corporations and NOT for true and honest Constitutional Republics. Then I will prove to you these illegitimate "constitutions" served as boiler plates which were orchastrated into the future territories as they were drawn into the "union". Thus the entire "union of the several states" and the individual states and all their applicable so called counties and cities are chartered and managed as British municipal corporations. We are going to reverse engineer the current preferred infratructure of taking property in America and the world to reveal this truth.

This will be made very easy with high level summeries and abstracts, pictures, tables, charts and links. You take two minutes to roll your cursor or 5+ years like it took me to assemble enough of the puzzle from credible sources to believe it was true. Near 100% of Americans cannot wrap their mind around the hard truth of the first American Revolution. Another 92% are in denial the second American Revoluition is brewing again. This will not be a civil revolution.

The hard truth has been flash frozen like permafrost and covered over by lies. We are living in a world of political, legal, scientific, monetary, financial, unalienable and emotional permafrost. We have been effectively, frozen to death by lies.

As this "silent" second American Revolution unfolds, only a fraction will understand what is happening. The media and government spin machinery is working hard 24 X 7 to blanket the country in artifical legal fiction codes of smoke and mirrors.

The vast majority of belief systems in America cannot, nor will ever grasp, the hard truths which have already enslaved us. The takings of ALL property and traditions are being funded by those who own the printing presses (currency, media, publishing) in these countries. This is why all of the takings make no sense because there is no economic or scientific

11/1/2010

independent unbiased facts to support the tsunami of takings over just the short 234 years of American history. All taxes upon the natural born, "man caused" global warming, "alternative" energy, "endangered" species, "growth management", "critical areas", "wetlands", and even wars are based on lies created by this Brotherhood of Darkness which funds, creates, indoctrinates and propagates these lies which is laundered through British Municipal Constitutional enacted Corporations in the where you think you are voting for officers of the same to change your reality.

Critical mass to effect change is very very small, e.g. the square root of 1% of the applicable population to 1%. The first American Revolution won the battle with 2/3 or 1% of 3,000,000 colonist, i.e. 20,000 men took down the world's most formidable army, the British Regulars and the German Hessians.

"At this time, King George III [of England] was trying to put down the American Rebellion.

His troops were being outfought by the hardy Americans, who were accustomed to wilderness battles.

Mayer Amschel arranged for King George to hire 16,800 sturdy young Hessian soldiers from the Landgrave, a considerable addition to the Hesse's fortune."

<http://snippits-and-slappits.blogspot.com/2009/09/mullins-nwo-11.html>

(great blog site check it out before it too is brought down)

There were ultimately 32,000 British regulars and conscripted Hessians who were sailed over to the colonies to suppress the growing rebellion. It took 100 years for the revolutionists to work up the necessary critical mass to throw off the growing British taxing and tyranny and suppression of all unalienable rights.

Does this sound familiar?

Mayer Amschel Bauer (later Rothschild) discovered that although loans to farmers and small businesses could be profitable, the real profits lay in making loans to governments.

<http://snippits-and-slappits.blogspot.com/2009/09/mullins-nwo-11.html>

Mayer had a great idea to profit from the brewing rebellion in the British colonies in America. King George was certifiably insane and a tyrant, but he was no fool. Mayer proposed a deal to King George III. He would hire 16,800 German Hessians for the equivalent of 50 cents per day and charge the British monarchy, the equivalent of \$1.00 per day.

This level of deception is beyond most people's self imposed bias. Most people refuse to believe the dire situation we are in, because most simply cannot comprehend there is such evil, nor can they understand how this same evil has so thoroughly integrated itself into every dark corner of our country, state, county and city and rural municipal corporations, i.e. syndicated rackets.

All resources, communications, property, travel, banking, fiat worthless coin and currency in your pocket, your jobs and savings you think you have, are and will be locked up before your very eyes. 73,000 blogging sites have been taken down already, see article below.

American's have not been doing their homework and we have been skipping history and science classes. We have thoroughly flunked all courses in the most fundamental subjects of maintaining our sacred and cherished freedoms, liberties and unalienable rights. One cannot comprehend the nature of ALL local takings UNLESS we understand the origin of these takings. Think global take local is the mantra of the dark side.

The Brotherhood of Darkness has an Achilles heel. Their empires melt when we expose them to the light. Conversely, they grow like an aggressive cancer in the darkness of ignorance, apathy, denial, bias and our inability to comprehend forces far larger than the self imposed puny little world we live in. Evil knows us much better that we know ourselves.

The offices of USA Inc. are only ceremonial and those in office are puppets by the Grand Master Puppeteers who move the players on the chess board in at least some 60 countries in the world including America. While the public is caught up in the orchestrated ceremonies on the stage, the real game is being played behind the curtains. Anything not based on truth is not based on love. Anything based on force is neither the truth nor love. This is the litmus logic to determine true and honest Constitutional Republics or Consolidated Republics based on righteousness, truth, love, peace and nonviolence. These are the 5 pillars of America which were given to us by God via the Laws of Nature and Nature's God (LONANG), the Declaration of Independence and the action and success of the first American Revolution.

The hard truth has been long taken down in America using legal fiction codes. You must understand the material below before you can win this war. Currently all property owners are on the defensive fighting within the the Matrix municipal corporation global cabal created and staged like a fly trap. If you wish to stop playing defensive and take control and go on the offensive in this war, then read all this material.

I urge you to go to these two site links below by Michael Tsarion and print out the material AND copy it onto your hard drives via Word and/or email them to yourself. You may also send the links to your nearest copy center with a note to print and bind the two documents. At Enumclaw copy center it's 9 cents/page for two sided printing, i.e. 78 pages = \$3.51.

Michael has been on Coast To Coast AM a number of times and is a great speaker who well knows his material and has done all the homework and much more. He is a Grand Master of how the global Grand Masters play their game.

These 78 pages are spine tingling material and a master piece fully referenced which matches up with my near 6 years of research on property rights which I undertook to better understand who is stealing ALL our property and traditions in America. This material is worthy of being printed and bound for your library as reference. I plan on printing hundreds as time and budget permit for hand out copies.

To fully comprehend how this evil global cabal comes into our country and communities and takes everything in front of our eyes, while we are totally hypnotized to believe we are free, WE MUST FIRST DO OUR HOMEWORK. The hand is truly quicker than the eye and the history is made to stand still for these global and national crooks who play games with the land we all so dearly love and have died for, some 13 generations since the landing at Plimouth Rock in 1620.

To see how evil works and how they span space and time, the next example I will send you will be on "The Corruption of the State of Washington Constitutional Conventions and THEIR Constitutions". This is a sterotypical cookie cutter process used especially since the original constitutional conventions from 1786 through May 29,1790. We will back into this history through reverse engineering.

I like to think I have good company, Lysander Spooner, Edward Griffin, Devvy Kid, Michael Tsarion and a few of the honest Federalist's and all of the anti Federalist who well know what the big boys were cooking up in these so called conventions.

Exemplifying Case #1

Michael Shaw on 1360 AM - Monday 19th 8:00 AM - with Ft. Collins, CO resident Stacy Lynne

I will be interviewing Stacy Lynne on Freedom Radio regarding ICLEI in Colorado this Monday and Tuesday on 1360 at 8:00 am. (Radio Liberty) Stacy is the brave women from Ft Collins who has single handedly taken on ICLEI and she is being persecuted.

To provide ICLEI information is the primary reason why I came to Denver, to address Good Neighbor Law, earlier this year.

ICLEI is the main instigator for globalist policy at the local level including the infusion of Global warming policy on the Colorado plains.

Without a focus on ICLEI cities you have no chance of avoiding globalist (Agenda 21) land use rules.

Stacy needs help.

I hope that you and your members can tune into the show and then join this fight.

Thank you,

Michael Shaw

Feds Ignore Due Process, First Amendment, Shut Down Thousands of Blogs

Kurt Nimmo
Prisonplanet.com
July 18, 2010

Once again, the Obama administration has violated the Bill of Rights. Earlier this month, the feds took down a free Wordpress blogging platform and **disabled more than 73,000 blogs**. The action was completely ignored by the corporate media. The site, Blogetery.com, was told by its hosting service that the government had issued orders to shut down the site due to a “a history of abuse” related to copyrighted material.

In late June, **Joe Biden and Intellectual Property Enforcement Coordinator Victoria Espinel** said the government would move to take down sites offering unauthorized movies and music. “Criminal copyright infringement occurs on a massive scale over the Internet, reportedly resulting in billions of dollars in losses to the U.S. economy,” said Preet Bharara, the U.S. Attorney for the Southern District of New York. Bharara’s office and the U.S. Immigration and Customs Enforcement launched **“Operation In Our Sites”** and executed seizure warrants against nine domain names.

11/1/2010

Blogetery.com claimed the shut down of 73,000 blogs “was not a typical case, in which suspension and notification would be the norm. This was a critical matter brought to our attention by law enforcement officials. We had to immediately remove the server.”

“That seems odd,” notes **Techdirt**, a website that covers government policy, technology and legal issues. “If there was problematic content from some users, why not just take down that content or suspend those users. Taking down all 73,000 blogs seems... excessive.”

The DMCA’s takedown actions are a direct violation of the First Amendment under prior restraint. However, explains law professor **Wendy Seltzer**, because “DMCA takedowns are privately administered through ISPs... they have not received... constitutional scrutiny, despite their high risk of error.” Seltzer adds that “because DMCA takedown costs less to copyright claimants than a federal complaint and exposes claimants to few risks, it invites more frequent abuse or error than standard copyright law.”

TorrentFreak worries that the Blogetery.com case has set a precedent. “Fears remain... that this action is only the beginning, and that more sites will be targeted as the months roll on. Indeed, TorrentFreak has already received information that other sites, so far unnamed in the media, are being monitored by the authorities on copyright grounds,” writes a blogger on the site.

“They say it’s because of copyright infringement, but is it really?... it would seem that only sites/blogs which were streaming movies and TV shows were shut down initially, but upon further perusal, it seems like the Feds just arbitrarily shut down a server with several tens of thousands of bloggers on it without due process as is usual with this administration,” writes **Smash Mouth Politics**. “How soon before they find some reason to shut down other servers or networks? What’s probably infuriating to the bloggers who were shut down is that they have no recourse. They have no idea why the server was shut down. And the Feds are mum about it. Also, if the bloggers can even get a hold of the server admin, they’re refused any explanation of why.”

In October, 2004, more than 20 Independent Media Center websites and other internet services were taken offline, not in response to alleged copyright infringement but for political reasons. The disappearance of the

11/1/2010

Indymedia servers was shrouded in secrecy and the ISP and government would not provide an explanation. On October 20, 2004, the **Electronic Frontier Foundation** filed a lawsuit in Texas and argued that “the public and the press have a clear and compelling interest in discovering under what authority the government was able to unilaterally prevent Internet publishers from exercising their First Amendment rights.”

It was later discovered that the ISP had shut down IndyMedia’s websites after they were contacted by the FBI. The FBI said a particular article on the website nantes.indymedia.org contained personal information and threats regarding two Swiss undercover police officers. It was later determined that the article contained neither threats nor names or address information and contained instead photographs of police agents provocateurs masquerading as anti-globalization protesters.

The Obama administration — in step with the Bush administration before it — does not have a problem ordering the government to violate the First, Fifth, and Tenth Amendments. In its declared effort to prevent online piracy of copyrighted material, the government has trashed the Bill of Rights. It has used the FBI and the Department of Homeland Security to intimidate ISPs to shut down web sites.

In June, a Senate committee approved a dictatorial cybersecurity bill that would allow Obama to **shut down the internet**. The bill, known as the Protecting Cyberspace as a National Asset Act, would grant Obama the authority to carry out emergency actions to protect critical parts of the internet, including ordering owners of critical infrastructure to implement emergency response plans, during a government declared cyber-emergency. Obama would supposedly need congressional approval to extend a national cyber-emergency beyond 120 days under an amendment to the legislation approved by the committee.
