## The Bad Laws And Policies That Affect So Many So Negatively

Who would have ever thought that our politicians would do this to us?

Have you ever thought that there could be a list of bad laws and policies as long as the one below?

Does it surprise you that each of these bad laws and policies does damage to or affects negatively at least 90% of us; in addition to our great nation?

Can you think of other laws and policies that should be on the list?

Have you ever seen such a list compiled before?

Do you find it to be astounding that our main stream media people have not clearly identified such a list before??

As you read the list can you think of any of them that you would like to see kept in place?

When you join us and vote on the list are you going to vote in favor of not fixing any of these?

The following list does not contain the necessary details for full understanding.

In the following list, the word "Laws" stands in place of the phrase "Laws and policies."

## The first part of the list includes those laws and policies that were in place before the 2008 Presidential election.

- 1. Laws establishing the privately owned Federal Reserve banking system as a replacement for a government owned central bank.
- 2. Laws that cause debasing and devaluation of the dollar.
- 3. Laws that authorize or encourage and cause deficit spending.
- 4. Laws that cause or enable and encourage inflation and the resulting devaluing of all our

assets and the purchasing power of our money.

- 5 Laws that merged the Social Security Funds with the general fund.
- 6. Laws that prohibit drilling for oil in and around the U.S.A. and prohibit or restrict the development of oil shale reserves and oil refineries in the U.S.A.
- 7. Laws that prohibit or place unreasonable restrictions on coal and nuclear power plants and restrict efforts to develop alternate energy sources such as wind or "clean" fossil fuel power plants.
- 8. Laws that force banks to make mortgage loans to individuals who do not qualify under well established and valid mortgage loan rules.
- 9. Laws that removed the prohibition

against and enable investors to gamble on the market by making unbacked side bets on companies without buying the stock (Credit Default Swaps).

10. Laws that enable investors to drive the price of commodities to be significantly out of line with what the price would be if driven only by supply and demand.

- 11. Laws that cause or encourage and facilitate outsourcing of jobs and moving of manufacturing and company assets to other countries.
- 12. Laws that produce the currently fraudulent Consumer Price Index (CPI). The government uses the fraudulent CPI to calculate a fraudulent inflation rate. These fraudulent data are then used in calculating raises, cost of living adjustments for government benefits and price changes for goods and services. The results are that expenses increase faster than income and everyone gradually gets worse off.
- 13. Laws that produce fraudulent federal budgets; not showing true spending levels and unfunded entitlements and other obligations.

- 14. Laws that produce the currently lying federal unemployment rate which no longer includes discouraged workers, many of whom are discouraged because the jobs they could qualify for are filled by illegal aliens.
- 15. Laws that encourage and aid illegal aliens including those that grant citizenship to children (anchor baby's) born to illegal immigrants.
- 16. Tax laws that create, encourage and facilitate cheating, unpaid taxes, the underground economy, confiscation of assets, tax increases without representation, and an adversarial climate between citizens, residents, businesses and the government.
- 17 Laws causing, or facilitating the dumbing-down of our education system and schools.
- 18. Laws that usurp infringe upon or override state's rights and laws.
- 19. Laws granting excessive protections, rights, facilities, food and treatment to addicts, and criminals, especially repeat offenders.
- 20. Secret laws, i.e. laws that are on the books but are not made public, but which government agencies can use against citizens and residents.
- 21. Laws enabling citizen surveillance without cause, review and regulation.
- 22. Laws restricting gun ownership rights.
- 23. Laws establishing a national police force and accelerating the slide into a police state.
- 24. Laws driving the stealthy push for a North American Union and a Trans-Atlantic

Union.

- 25. Laws increasing the FDA's ability to restrict citizen healthcare options and rights.
- 26. Laws granting a single political party increased ability to control all three branches of the federal government; specifically the 17th amendment to the constitution and laws restricting 3<sup>rd</sup>, 4<sup>th</sup> and 5<sup>th</sup> political parties.
- 27. Laws and policies that protect politicians from investigation and accountability for corruption and criminal actions in office.
- 28. Laws prohibiting or failing to require a "None of the above" option on ballots.

The following bad laws were put into effect after the 2008 Presidential election.
